CRIMSON CLOVER

Read Farmers Bulletin No. 575 on Crimson Clover. It's Free. Address U. S. Dept. of Agriculture, Washington, D. C. A bushel of Crimson Clover Seed sown on four acres of ground will increase the succeeding yield of Corn or Cotton about the same amount as would a ton of complete fertilizer applied at the rate of 500 lbs. per acre. A good stand of Crimson Clover turned under will ordinarily double the yield of the crops which follow. The physical condition of the soil is also materially benefited. The Sandy Soils are increased in Humus and Nitrogen Contents. The Silt, heavy clay soils are rendered more open and friable. Crimson Clover makes an excellent grazing crop, hay, ensilage and pasture for all classes of live stock. Much cows make considerably more milk when pastured on Crimson Clover. It is also valuable as a honey plant, furnishing an abundant supply of nectar in the Spring. The plants retain for the use of the trees the following season much of the plant food which would otherwise leach out of the ground during the Winter and early Spring. A good stand of Crimson Clover not only reduces the erosion and the gullying of the fields, but on sandy fields, the blowing of the soil by the wind is greatly lessened. The plants also serve to hold the snow to a greater extent than if the field was left bare during the Winter. More and more each year farmers are realizing the importance and great value of Crimson Clover.

\$1,635,000 Hidden In This Year's Goodyear Tires

Here are amazing facts: Goodyear Fortified Tires contain five costly features found in no other tire. They have other features not common.

Users Save \$5,000,000 Yet our 1915 price reduction—made February 1st—will save Goodyear users about \$5,000,000 this year. And that was our third reduction in two years, totaling 45 per cent.

If we omitted those features, this year's probable output would cost us \$1,635,000 less. We could add that much to our profits. And you would never know it until troubles came.

This year's improvements alone will cost us \$500,000 yearly. Most of this goes into extra rubber—all into extra tread.

These extra features—used by us alone—will save users millions more.

That's why Goodyears dominate. They have long outsold any other. They are gaining new users faster than we can supply them. We hope, for your own sake, that they'll soon win you. Any dealer will supply you. (2419)
