THE CONCRETE SILO WILL WITHSTAND FIRE.

Last August, D. G. Harry, of Pylesville, built a concrete silo 12x30 feet. In September, the silo was filled. About the middle of November, his barn, together with his hay and wheat was destroyed by fire. The concrete silo withstood the fire. The contents were not damaged, except in small amounts where the wooden doors were burned out.

Mr. Baxter Bowers has been indisposed. The onion crop is a very good one, but the price is very unsatisfactory to the growers. Those who buy them for their own use in Baltimore have to pay a good price for them. So some one must be making a big profit.
