Shoes Shoes Shoes For Men, Women and Children, at Reasonable Prices

You have heard and probably read a lot about the high price of shoes and every word of it is really true. Leather and all the other materials that go into the manufacture of shoes from nails and thread to the tissue paper and paper box that wraps them are higher than they have been for many years; but in spite of these conditions you will be surprised at the low price of shoes here. We anticipated this condition and have for months been stocking our shelves that we may hold down the prices of shoes which are everybody's necessity. It is true that we have been compelled to advance some shoes 10 or 15 cents, but this is nothing compared with the enormous advance the manufacturers are asking.

Ralston Shoes for Men The product of one of the best manufacturers of men's fine shoes. Unequaled at their price for style, wear and fit. Men's Work Shoes We are carrying today more than twenty styles of men's work shoes. Not just a few pairs or a kind, but a complete run of sizes of every kind. Does any other store in the county carry so many? All these work shoes are offered today in the same good qualities and at the same prices as a year ago—\$1.50, \$2.00, \$2.25, \$2.50, \$2.65, \$3.00, \$3.50 and \$4.00.

SPRAYING Don't Pay Freight on Water—Buy Your Spraying Materials in the Powdered Form

You will save a great deal on your Spraying Materials if you buy the B. T. S. powdered compound. After several years experiments it has proven to be fully as efficient as the solution in the liquid form. Besides it is a great deal cheaper. See the following comparisons:

Table comparing 100-pound can of B. T. S. Powdered Compound (400 gallons) vs 50-gallon barrel of Lime and Sulphur Solution (400 gallons) vs 100-pound can of B. T. S. Powdered Compound (\$6.00) vs 50-gallon barrel Lime and Sulphur Solution (\$9.00).

So you see you will save \$3.00 on every barrel of the Lime and Sulphur Solution if you use the B. T. S. in the powdered form.

Besides there are other advantages over the solution. It is a great deal easier to haul a 100-lb. keg of the dry form than to haul a 50-gal. barrel of the liquid. It can be kept over to the following season in the dry form without any loss from evaporation or crystallization whilst in the liquid form there is bound to be a loss in carrying it over.

I SELL THIS B. T. S. POWDERED SOLUTION IN ANY QUANTITY FROM ONE POUND UP.
