

DELCO-LIGHT

NEWS IN

CARROLL AND HOWARD

The local Delco-Light representative is in receipt from the Underwriters Laboratories, Chicago, Ill., that Delco-Light in both the 32 volt and 110 volt systems and embracing every model is the only independent electric Farm Lighting Plant that is so constructed as to have the approval stamp of that board.

Wm. Numsen & Son, Inc., Cannery located at Asbestos after using a certain make of independent electric lighting plant, are replacing it with one of the Delco-Light heavy models. It will be in operation in ten days. They express their troubles with the former plant as lack of service.

The John Robinson's "10" Big Shows which paid our county a visit last week had its entire train lighted by a score of Delco-Light plants. The manager, Mr. Jerry Muggins, remarked to the local Dealer, here, that they had tried almost everything that could generate electricity, but that they found that something only when they made their purchase of Delco-Light.

Mr. Denton Leister lost but little time in purchasing Delco-Light when he learned it could pump water, operate the washer, turn the grindstone, do the ironing, light his buildings, etc., with a gallon or two of coal-oil per week. Mr. Leister you will soon have joined in with a family of 80,000 happy farm users.

Mullinix, Leatherwood & Weller after buying a plant constructed something of a pattern of Delco-Light decided to buy the real thing rather than a sample copy. Their new store building at Woodbine will soon be lighted by Delco-Light.

Mr. Charles Maus while having under consideration the erection of a concrete tank on a hill, chanced to hear of the Delco-Light way of direct from the well water. He thinks that will be an advantage over running it through expensive pipes to get warm and stale in a warming tank on the hill.

The Domestic Engineering Company, builders of Delco-Light are improving and enlarging

their present facilities to accommodate 100 per cent more farm electrical appliances than they are able to take care of at present.

Mr. E. O. Davidson, Greenmount is having Delco-Light and Delco-Direct from the well water installed. He has watched the service of his neighbor for two years and now feels satisfied that it is the proper way.

We have been challenged to prove that Delco-Light is the only Electric Farm Lighting plant that has the approval of the National Board of Fire Underwriters. Just address a letter to this board at 207 E. Ohio St., Chicago, Ill. It will be a short argument.

Someone has remarked that the Delco-Light people are asleep. They do sleep but with one eye mostly open.

The Manchester Theater after turning down several offers to have plants installed almost free of charge have bought Delco-Light to replace their present 10 horse power two-cylinder opposed engine. This will be the first Moving Picture Parlor in the County to be operated by Delco-Light.

Someone has said a peculiar affair resembling a house is moving about the County lately. It might be of interest to those in need of a house to get full information from N. C. Erb, of the Westminster Mill & Body Co.

Dr. Rolland Diller has decided to not wait for that which might or might not be a reality and will furnish his modern home with Delco Light and Delco-Direct from the well water.

John C. Easter, Clarksville, has been converted to the idea that to pump good cold water from his well and let it warm on his attic is not practical. It took one good hot summer and a bit of sickness from stale water to remove his new present water system and install the Delco-Direct from the well water system.

Mr. Charles Trump, Proprietor of Central

Garage, Manchester, has had several offers of late to replace his New Delco-Light Plant, but he evidently thinks Delco-Light serves him well since he refused \$100.00 to make the change.

When Mr. R. H. Mercer learned that the Delco-Direct from the well water system would have the same fire protection that can be had from city water pressure, he lost no time in making his purchase. Yes, Mr. Mercer, Delco-Light will put water on the roof of anything you may erect.

Mr. Edward Carlisle, New Windsor, after considering many ways to solve his water problem has decided in favor of the Delco-Light and Delco-Direct from the well way. Mr. Carlisle you may rest assured that Delco-Light and Water will serve you long and well.

When Mr. John Dasher & Son came to Maryland, they brought the Delco-Light and Water idea along with them. They had seen it in use no doubt in some distant part of the country. Their modern home will be equipped at an early date.

A well informed farmer walked into one of the local Delco-Light Dealer's offices recently and wanted a ten year guarantee on his Storage Battery. He was informed that the battery was none of the cheap kind of goods that sells on the guarantee such as is used by the average cheap catalogue house or a business concern doing a questionable business. It was hard to make him believe this however, until he was told that Delco-Light came equipped with Exide Batteries made by the Electric Storage Battery Company of Philadelphia. Needless to say, he no longer doubted the sincerity of the dealer's argument that selling on a strong guarantee is usually resorted to by a questionable product. A good product sells on its merits and on the reputation of the maker.

Mrs. Charles Carroll of "Homewood" Residence will soon have that modern home equipped with Delco-Light. This is one of the oldest homesteads in the State. Mrs. Carroll you can congratulate yourself on your selection.
