**The Real Solution**  
 to the High Price of Fuel.

The fuel problem must be solved. Fuel this year is not only high in price and going higher—but IS SCARCE—and we cannot meet the situation by simply digging a little deeper into our pockets.  
 We must use LESS FUEL—so there may be enough to go around.  
 Yet we must keep warm. We must protect our families with well-heated homes. We must not let colds and influenza become rampant again this winter.  
 The practical answer to fuel economy—and in a large measure to winter-health—is the

**PIPELESS CALORIC FURNACE**  
 The Original Patented Pipeless Furnace

The Caloric saves from one-third to one-half the fuel. This is not guess work but an established record—fully proven in over 76,000 buildings where the Caloric is in use.  
 Caloric heat is circulated heat—constant change of air. Therefore Caloric heat is always pure and healthful. Why should anyone endure cold, stuffy rooms when they can have pure, healthful Caloric heat at LESS COST?  
 The Caloric is sold on the fair and square basis of guaranteed satisfaction—the broadest guarantee ever made in the heating industry. Why should any buyer of a furnace take chances with experiments when he can buy the Caloric on this definite guaranteed basis?  
 The Caloric is the Pioneer and Leader of Pipeless Heating, and embodies basic patents which are essential to efficient pipeless heating and which imitators dare not copy. The man who buys a Caloric gets advantage of these patents, and can have advantage of them in no other way.  
 Call, phone or write for further details of the Caloric—the heating system that gives you the most heat, in most convenient form at least cost.
