What's done as much as anything else to fill up the movie houses

LOOK at the crowds that step out of their cars in front of the movies every summer evening.

The movie managers would be renting half of their theatres for store space, if it weren't for the automobile.

It is typical of Americans that they took to the automobile as a matter of course—just as they have to the movies and to every other great invention of the last half century.

And the same thing has happened everytime. Taking things as they come is a fine way to foster waste and extravagance.

As regards tires, the comeback is about due. People are pretty near through pay-

ing for something that isn't there when they look for it.

What a man pays for in a tire is *quality*—not a limited number of miles or the privilege of getting a rebate in case the miles don't come up to the limit.

U. S. Tires are guaranteed as to quality—with *no limitation of mileage*.

And that holds just as good for the *small car tire* as for the biggest U. S. Tire we've got. There's *only one* standard of quality with U. S.—and the size of the car has *nothing whatever to do with it*.

We represent U. S. Tires in this town. You'll find it worth while to talk to us before you buy any more tires.
