TRAVELING ON RUBBER WHEELS

There were, last year, 9,221,991 automobiles and trucks registered in this country. Registration fees, including chauffeurs, operators and dealers, netted a sum to the United States of \$102,546,212.25.

The State of Pennsylvania has 570,000 machines, yielding a revenue of \$8,000,000. This revenue, each state turning in an alike sum, in proportion to the number of machines, should mean fine roads everywhere in this country, if the money is rightly used.

Our Requirements For New Capital

FEW people realize the tremendous demands for new capital by the public utilities of the country in their efforts to serve the public adequately.

It has been estimated that extensions and improvements of public utilities which have been postponed since the beginning of the war now call for the expenditure of one and a quarter billions of dollars.

The Bell Telephone System alone has increased its investment during the past eight years from \$750,000,000 to nearly \$1,400,000,000—almost double.

The new capital that will be required within the next few years by utilities and other enterprises will run into staggering figures and only those offering a safe investment and a good rate of return can expect to get a fair share of the capital available.

Realizing our obligations to give our patrons good and adequate service, we must earn enough to attract new capital.
