

**Pennsylvania VACUUM CUP TIRES**

THIS highly attractive chestnut colored tread does more than add striking appearance to your car.

It adds absolute non-skid protection on wet, slippery pavements.

The Vacuum Cups operate on the only principle by which rubber projections can grip a smooth, treacherous surface—vacuum suction.

You pay only for the quality — the safety costs you nothing.

ing war treasure was the 126 feet at the mouth of the St. Lawrence to the Empress of Ireland. Last summer a little over \$5,000,000 was saved from the wreckage of the Alurentic, in 76 feet, off the Irish coast. Altogether treasure to the value of \$10,000,000-000 lies at the bottom of the sea as the result of war-time losses, and I shall be after the greater part of that, if I live.

Nine-tenths of the sunken treasure is at depths of less than 500 feet, just within the range of my suit. I am going to make the first trip myself to the Lusitania and take a good look around before letting any of my subordinates take the risk.

The idea of reclaiming another giant liner, the ill-fated Titanic, sunk after her collision with a mammoth iceberg, on Sunday evening, April 14, 1912, has finally been given up because, for one thing, its location is not known.

Many theories have been advanced as to the fate of the vessel. There are some experts who state that the ship could not reach the sea bed, owing to the pressure. It was sunk in the deepest ocean in the world—the North Atlantic.

They consider it is drifting about under the surface, midway between the surface and the bottom, at the will of under-currents.

Slowly being eaten away by sea action, it may one day drift into shallow waters, where it may become a menace to shipping, or where it may, by lucky chance, be discovered and forced to yield up its rich hoard.

Some there are who declare that she dived right down to the bottom, despite the terrific water resistance at that spot. Again, there are others who believe that pressure of water has long since burst her into atoms.

**Sunken Treasure Vessels**

Here are some of the sunken treasure ships:

Lusitania, sunk in 1915, with \$7,500,000 worth of gold and jewelry; ship and cargo \$18,000,000.

Arabic, sunk in 1915, with \$6,250,000 in gold.

Yasaka Maru, sunk in Mediterranean last December, with \$15,750,000.

Oceana, sunk in 1912, with \$5,600,000.

Merida, sunk off Cape Charles in 1911, with \$1,625,000 in silver bars and \$125,000 in cash and jewelry.

Geelong, sunk in Mediterranean with \$5,000,000 in jewels belonging to the Maharajah of Kaparthala.

Ancona, sunk with \$2,500,000 cargo. General Grant, sunk off Auckland Islands in 1866, with \$18,000,000 in gold bars and bullion.

Lizard, sunk off Cornwall, with gold estimated at \$90,000,000.

**HOST AT DEATH HOUSE FEAST JUST BEFORE BOTH DIE IN CHAIR**

The second Japanese to die in the chair at Sing Sing since electrocution, in 1891, succeeded the noose for carrying out the death sentence in New York State was dinner guest of his fellow sojourner to the beyond a few hours before the time fixed for execution of both Friday night.

Pietro Nunziata, nineteen, of Brooklyn, insisted on treating Saito Taizo, twenty-one, to his last meal, and Warden Lawes humored the doomed youth in his death-hour whim.

"This is on me," Nunziata told the Japanese, and both finally selected the same menu—beefsteak, French fried potatoes, coffee, ice cream and cigars. The cost was duly taken out of the small fund to the credit of Nunziata, who was not content until assured that this had been done.

Nunziata and three others sought to rob Prof. Wilfred Kotkov of the Jewish Theological Seminary at Woodhaven, L. I., walking alone across a lonely field there Feb. 23, 1921, and killed him when he resisted.

Taizo invited Mitaro Hara, a Japanese chef, to stop with him overnight in a Broadway hotel near 65th street, Oct. 4, 1921, when he discovered Hara had several hundred dollars he had saved. He disabled Hara by a jiu jitsu trick and strangled him.

W. C. Rost of Peekskill, who is blind, was a witness, which is unprecedented. He said he wanted to "sense the feeling in the death chamber."

**WOMAN, UNDER GYPSIES' SPELL, IS ROBBED OF \$1000 IN HOME**

Believed to have been either drugged or hypnotized by two gypsy women who sought to tell her fortune, Mrs. Mary Smeltzer, aged 40 years, of Polish Hill, near Duquesne, Pa., awakened two hours later and discovered that she had been robbed of \$1000.

According to the woman's story, the gypsies called at her home, and while she was sitting in the dining-room they began to tell her fortune. Mrs. Smeltzer, in describing her experience stated that if she looked into the strangers' eyes, as directed, she felt a numb, sleepy feeling coming over

could not keep awake. In a short time she lapsed into unconsciousness, and when she awoke shortly before 2 o'clock she was alone and the money, which she kept in her bosom, was gone.

Mrs. Smeltzer said that on Thursday morning the gypsies first called at her home. In telling her fortune, the woman said that the gypsies told her that she was not going to continue in her present home and that in a short time Mrs. Smeltzer, with her family, would move to the country.

Mrs. Smeltzer volunteered the information to the strangers that she intended purchasing a farm, stating that she was in ill health and wanted to live in the country. The gypsies left, stating that they would return Friday morning, and would treat her for her illness, declaring that Mrs. Smeltzer would never regain her health if she continued taking treatment from a physician.

**Traveling in Sweden.**

Sweden is a country in Northern Europe, with long, cold winters and short, cool summers. One needs heavy clothing, even an overcoat in June and July. We saw all kinds of fruit, such as berries, cherries, currants, gooseberries, pears, etc. Prices and wages are high, so are the taxes.

There are pensions for people out of work and for the aged. The Swedes are music-loving people. The principal crops are wheat, rye, oats, barley, potatoes and beets.

There are hundreds of miles of boulders (large stone) fences. Trees grow among huge boulders. They have fine forests of pine and spruce. Feather beds are common, but rather small for all people.

**The Oldest Woman in the United States.**

In "The Golden Age," of Brooklyn, N. Y., issue of April 12, 1922, a magazine making a specialty of helping old people, we find the following:

"The very oldest woman of whom we have any record at this office is, Mrs. Sarah Quinn, of Chicago. Sarah was recently overcome with gas in her home. She was rushed to the hospital and revived. Upon waking she said that she felt as well as usual, and desired to return home at once so that she could do the dishes. Sarah is 115 years old, and shows much more enthusiasm than some girls 100 years younger show, with respect to the same job, and this is no joke, even if it does sound like one."

**YOU PAID**

To have lightning rods put on your buildings, then why not get the reduction on your insurance.

We write your insurance for 10 Per Cent. Less Premium if you have lightning rods properly installed.

DIAGNOSTICIAN  
Specialist in chronic diseases.

I make study and treatment of any kind of disease the family Doctor is not curing. Tell me your trouble and I'll tell you what is your disease and what can be done for it. I'll send blank and specimen case. Give me your name.

HAGERSTOWN, MD.

**IT WAS**

There was an explosion in the powder mill and the proprietor hurried over to ascertain the damage.

"How in the world did it happen?" he asked the foreman of the mill as he viewed the wreck. "Who was to blame?"

"Well, you see, sir," replied the foreman, "it was this way. Bill went into the mixing room and inadvertently struck a match. He—"

"Struck a match!" exclaimed the proprietor in amazement, "I should have thought that was the last thing on earth he would do."

"It was, sir," replied the foreman, sadly.—London Telegraph.

**SEA DIVER GOING AFTER LUSITANIA**

VICTIM OF HUN ATROCITY LIES DEEP, BUT WITH SPECIAL APPARATUS CAPTAIN LEAVITT HOPES TO REACH IT

By Captain Benjamin F. Leavitt in the Philadelphia Record.

Before September of this year I hope to dig at least \$15,000,000 out of the bed of the sea off the Irish coast. This represents roughly the amount that went down with the Lusitania and the Arabic, but that will only be the beginning of my task, for at the present time there is reposing on the bed of the ocean vast treasures besides which the fabled treasures of the past fade into insignificance.

I intend to devote the rest of my life to the task of raising the great treasures that lie buried fathoms deep. The expedition in its first stages will cost \$500,000 at least, and there are more than 600 shareholders in the company behind me.

To reach the Lusitania we shall have to dive 285 feet, and for the Arabic 315 feet, which is just twice as far as any diver has ever gone in the ordinary rubber suit.

I have spent six years working out the plans for this expedition, most of the time being given to perfecting the diving suit that would enable us to go down deep enough.

In my first test with the suit I established a record by going down 338 feet and staying there long enough to prove that my outfit is good enough for the job we have on hand. Altogether I have had eight diving suits made, at a cost of \$500 each.

Suits Made of Metal

The suits are made of manganese bronze, a quarter-inch thick, the torso and breastplate solid, and the legs made of ribbons of bronze incased in rubber, with ball bearings at the shoulders.

Salvage work has never yet been possible lower than 150 feet, because the pressure is too great. Air lines get tangled, and no diver can work even at that depth for more than 20 minutes at a time, with an hour and a quarter to lower and pull up.

It takes nearly all the 20 minutes getting used to one's surroundings, without being able to have time for locating the wreckage. With my suit a novice can go down from 300 to 500 feet, and remain down for four hours at least.

The only line that connects the diver with the ship above will be a half-inch non-twisting cable. Inside this will be a telephone wire connecting with a transmitter and receivers within the headpiece. The suit weighs 350 pounds, but the enormous water pressure reduces this to only 75 pounds on the ocean bed.

To aid me in the task I shall have another invention of my own—one that will revolutionize the diving art. This is a deep-sea light, a glass globe half an inch thick, containing a 300-candle-power bulb. A series of these will be dropped on weights, enabling the diver to see perfectly over a radius of seven feet.

The salvage ship will be held over the sunken ship by six five-ton anchors, and by electric detonation dynamite charges will be used to force open the strongrooms of the Lusitania and Arabic, so that we can get at the bar gold and other treasure therein.

Depths Formerly Reached.

**A Better Commercial Car**

The nation-wide demand for the Overland Commercial Car is the natural tribute to extraordinary value.

1. Specially designed commercial chassis.
2. Rear axle designed for heavy loads (removable shaft).
3. Triplex Springs protect fragile loads.
4. Maximum body space.
5. Long frame supporting entire body.
6. Highest gasoline mileage and economy.
7. Lowest price of any three-speed commercial chassis.

**D. R. Geiman & Son**

**WHICH?**

**DOES IT PAY TO FERTILIZE?**

Tests of Agricultural Stations have proven that by the use of good, commercial Fertilizer you can double your crops, and that one dollar invested in Fertilizer will bring an increase of many times the amount expended.

You can cut your acreage practically in half and by fertilizing produce just as large yields. This means a saving of one-half on your labor, implements, etc. By continuous farming of lands you have worn out the soil, robbed it of its plant food. Then, to grow profitable crops, you must use a good quality fertilizer which contains the necessary plant food. Royster's Fertilizers are specially prepared to fill these needs. Royster's have stood the field tests for forty years with highest results. Ask your dealer for Royster's or write us.

F. S. ROYSTER GUANO CO., BALTIMORE, MD.

These cattle will all be tested and a good quality at the very lowest market price. I also want your

**FATHOGS**

as I have orders for them now right along. Being very busy with my farming and threshing and a little later on hulling clover seed is the reason why I can't come to see you all, so call to see me, or phone 824-F6 Westminster, Md.

Butchers, I can furnish you with your Fat Cattle right along. Prices low.

**J. ELMER MYERS,**  
Westminster, Md.

**TABLE MANNERS.**

A Texas father was dining with his son in a Texas hotel, and in the course of dinner the son got into an argument with a cowboy. The cowboy called the son an offensive name, and the young fellow grabbed his knife in his fist and started around the table to be avenged.

But his father seized him by the coat-tails.

the old man hissed.

"But, pop, ye heered what he called me, didn't ye?"

"Yes, I heered all right, but that ain't no ground for yer forgettin' yer table manners. Put down that yer knife and go at him with yer fork."

—Detonator.
