**A NAME THAT FITS.**

The more the New York Herald talks about the pending Profiteers' Tariff bill the more pointed and emphatic are its utterances. This great Republican newspaper, like the man who was driving a balky horse which would so if called a certain name, has called the pending tariff bill every name it could think of. At last it has thought of the right name to characterize this particular piece of legislation, saying:

"The New York Herald, reflecting the protective principles and convictions of its owner, is a consistent and steadfast advocate of the American tariff system. But the owner of The New York Herald cannot stand for damn fool protectionism and the New York Herald will not stand for it."

**WASHINGTON LETTER.**

By Wallace Bassford.

Special News Correspondent.

Washington, D. C., Aug. 21.—The Senate, by its action on sugar, has definitely raised the cost of all sugar to American consumers by about 10 cents per pound. Here are the basic facts about sugar: the United States refineries receive and refine for domestic consumption about 4 1/2 million tons of raw sugar in a year. About 1 million tons of this are produced in the United States proper; about 1 million other tons come to us from our island holdings—Hawaii, Porto Rico and the Phillipin. The other 2 1/2 millions come from Cuba. It is alleged that Senator Smoot, representing both the beet sugar people and the cane sugar people in the Senate; proposed to the Cuban sugar growers that the import tariff on their raw sugar would be held down to 2 cents if they would agree to limit sugar shipments to the United States to 2 1/2 millions of tons per annum. The effect would be to give this country just barely enough for its needs, thus enabling the sugar refiners to get a better price for their product and to more closely control the prices. In other words, sugar would never be plentiful, and in the course of a few years, or at any time there should happen to be a short crop here at home, our supply would not be sufficient for our needs, owing to the steadily increasing population. The 2 cent tariff means that the consuming public will pay one hundred millions per year into the Treasury as tax on the sugar coming in from Cuba; that is not so bad, in a way, as it helps pay the enormous bills of the government, but this tax puts up a wall of protection for the benefit of the sugar growers here at home, in Hawaii, Porto Rico and the Phillipines, enabling them to charge two cents more per pound for their raw sugar. This takes eighty millions additional from the pockets of the sugar-users and places it in the pockets of the sugar growers. This is typical of the Republican position on the tariff; it is to assess the general public to enrich special favored interests, which in turn can be counted upon to pay a portion of their artificial gains into the Republican campaign chest in order to enable this party of the few to continue to exploit the many. It is the same old practice of the despotic kings who sold privileges to friends at court. All Republican tariff bills revolve around the manufacturing groups of the big industrial centers. The Democratic view of the tariff is that it should produce revenue to run the government, economically administered while laying the lightest possible burden on the consumer. Of course, any tariff is bound to carry with it some incidental protection to the American manufacture.

An unrestrained whoop of victory is heard from the vicinity of the White House over the fact that Carmi Thompson, supposed to represent the feeble wailings grouped as "the Harding policies," won the nomination for Governor of Ohio over the opposition, divided among the candidates of eight men. It is well that the whoop came before the facts and figures, which show that Thompson, carrying the load of "Harding policies" plus Harding unpopularity, in spite of his own personal followings, which is large, polled only about forty per cent of the vote cast in the primaries. If forty per cent satisfies Harding and makes the clan happy, then take it and welcome, is the attitude of the Democrats; another such victory and the Republican party is in the boneward. But the cold truth is that Thompson won through by the fact that he is personally the most popular Republican in Ohio and was gotten into the race for Governor in the hope that he could pull off Doc Fess through for Senator and save the face of the Harding administration at the same time by keeping the State in the Republican column this fall. It is remindful of an irreverent epitaph from a tombstone up in New England, which runs like this:

Here lies the body of Mary Ann,  
Safe in the bosom of Abraham;  
It's mighty nice for Mary Ann,  
But pretty tough on Abraham.

And so it seems tough on Abraham Thompson to have to hear the political sins of Mary Ann Fess, all the little Fesses now on the House payroll, and the unpopular "Harding policies" from now until snow-fall. Incidentally, it comes to Washington from some of the best sources in Ohio that the Fess family will fail to transfer from the House payroll to that of the Senate, due largely to the fact that Fess can't hold his own party vote.

One choping block of the high-tariff Republican Senators is Germany; they picture the danger to the home market from the manufactured goods of the Vaterland. If they accomplish their desires Germany will remain for generations financially helpless and debt-ridden. Even now they sell to us a fraction of what we sell them, but if they sell us nothing, how can they continue to buy? In 1921 we sold them \$400,000,000 of goods and bought from them \$80,000,000 worth. Every tariff schedule seems aimed at the ruin of Germany. Some had thought that the war is over.

Mr. and Mrs. Ralph W. Study and sons, of near Pleasant Grove, were visitors in this place on Monday evening.

**New German Cars.**  
In a Hong Kong, China paper we find the following: "In Germany one of the latest models of passenger automobiles has the appearance of a submarine. The steering gear is placed in the front, but the engine and connecting parts are in the rear. The new type, it is said, assures more effective coolers and reduce dust and gas difficulties."
