Senator Joseph Irwin France's Record as a Constructive Statesman

This outstanding record merits the approval of the voters of the State for his re-election to the United States Senate.

Senator France A National Figure

Almost immediately after he entered the United States Senate, the people of the entire nation began to indicate their strong approval of the broad American statesmanship of Senator France. Today he stands without a peer as an exponent of American interests for Americans in the upper house of Congress.

Senator France Opposed Obnoxious Lever Act
He was one of FIVE Senators who refused to vote for the obnoxious Lever Bill, empowering the government to take wheat from our farmers at its own price and the power arbitrarily to fix profits, wages and conditions for our farmers, mine operators and miners.

Senator France First Favored International Conference
He was for immediate peace at the close of the war, his Resolution, in January, 1919, also providing for an International Economic Conference. This was the first proposal for a world conference upon the floor of the Senate.

Senator France For Medical Care for Soldiers
He first proposed in the Senate adequate hospital facilities for wounded soldiers. This Bill had the endorsement of the Surgeon General and leading Army surgeons. Senator France helped to write the first hospital bill which became a law.

Senator France Secured Great Hospital for Maryland
His Public Health Service Soldiers' Hospital established as a government plant at Perryville. It has become one of the most important hospitals in the entire country.

France Voted Against Esch-Cummins
Law
presented it did not offer a solution of the confrontation and that it would ultimately mean this situation such as now in fact country, Senator France opposed

Senator France Saved Country Nine Hundred Million Dollars

Believing an extra session of Congress necessary for reconstruction legislation and a fair consideration of the appropriation bills, he forced the extra session, which cut Nine Hundred Million Dollars from the Democratic-controlled Congress bills.

Senator France Opposed An Imperial League of Nations

He was unwilling to see Free America enter into an alliance with European empires that would have made our country a party to their endless contentions and strifes. He has always favored a True Association of Peoples.

Senator France An Expert on Export Trade

Realizing that industry in America could not revive and Europe could not be restored without vigorous exportation of American goods, he has spoken on this subject in all parts of the country before business men and his views have been commended by the conservative press of the nation.

Senator France's Russian Policy

In 1920 he advocated sending an economic commission to Russia to study conditions with a view to restoring business relations. The efforts of President Harding to establish a basis of trade with Russia at this present time is proof of the foresight and practical wisdom of the entire record of Senator France in the matter of trade with Russia.

2,000 Strikes.

More than two years this country has had 12,481 strikes and lockouts, says the Bureau of Labor, Senator Capper says, "These strikes and lockouts cause great losses to all concerned. Capital squeezes labor and labor gets what it can, and neither has much regard for the general public. Other ways must be found for adjusting working conditions than by means of these great losses inflicted on the country, and all who live therein, besides the privations, inflicted on the wage earner and his family. We must find means to enforce agreements peacefully instead of by strikes and turmoil, and these agreements must be based on living conditions and what is fair."

The Inventor of the Telephone.
Mr. Alexander Bell, born in Scotland, 75 years ago, after giving to the world the telephone, one of the most useful inventions of the age of 29, passed to his reward. Threatened with tuberculosis in his youth he moved to Canada, and soon migrated to Massachusetts, where he taught a class of deaf mutes. There he met a lady who had lost her speech and hearing through an attack of scarlet fever. He married her, and her father financed him in helping to get out the great invention, which was destined to make him rich and famous.

Two women and a man were murdered and another man wounded at Canton, O., early by an unknown man who lay in wait for his victims and struck them down with an iron bar as they entered the house. The murderer escaped.

Had To Sit Up In Bed To Breathe

Baltimore Business Man Says He Was In Almost Constant Misery From Indigestion—Feels Fine Now.

"I believe in giving everything its due and I want to say right now I just can't praise Tanlac too highly for what it has done in my case," said Harold S. Spicer, 718 East 21st street, Baltimore, manager of the Enis Tire Store, in an interview, a few days ago.

"Before taking Tanlac I was in almost constant misery for two years from indigestion, irregular and hasty eating certainly don't pay, for that is what got my stomach all out of fix and came near wrecking my health. I was troubled so bad with indigestion and gas on my stomach that many a night I had to sit up in bed in order to breathe. I felt weak, tired and draggy all the time, had no energy and simply had to force myself to do anything. I ate scarcely anything and had so little strength that the least exertion would exhaust me. I also had blinding headaches and would get so dizzy I could hardly stand up."

"Well, no one seemed to understand my case and nothing got me any good until I began taking Tanlac. I began to feel better on the very first day I took it. In all I have taken four bottles of Tanlac and am now feeling wonderful. I eat and digest anything I want, never have a headache or a dizzy spell, sleep like a child, and feel fine all the time. I am convinced that Tanlac is without an equal for troubles like I had."

Tanlac is sold at all good druggists.
