FRESH AIR AND HEALTH

Mental work calls an unusual supply of blood to the brain; the process of digestion calls the blood to the stomach. Brain work immediately after a hearty meal often causes indigestion because the brain has first call on a supply of blood that should be helping the stomach. Wherever, in the economy of the body, work is to be done there is a demand for bright red blood. Thin blood or blood dark with impurities will not do because it is the oxygen carried by the blood that does the work and oxygen-bearing blood is bright and red. This life-sustaining oxygen is taken up by the blood from the air which it meets in the lungs. Hence the great need of fresh air every hour of the day and night. But fresh air is useless if the blood cannot take up the oxygen which it gives. Dr. Williams' Pink Pills enable the blood to take up more oxygen because they increase the part of the blood that carries the oxygen. This corrects the lassitude, palpitation of the heart, shaky nerves and the pallor that are the results of thin, impure blood. You must have pure, rich blood to enjoy complete health. A booklet, "Building Up the Blood," will be sent free on request by the Dr. Williams' Medicine Co., Schenectady, N. Y. All druggists sell Dr. Williams' Pink Pills.—Advertisement.
