

METZ CAR SHOWN BY MONN BROTHERS

The Metz "22," the little roadster that won America's road classic, the 1913 Golden Tour, from Minneapolis, Minn., to Glacier National Park, Montana, is represented in Harrisburg by Monn Brothers, 1637 Swatara street. This tour was an endurance contest from start to finish, starting and traveling four days in pouring rain, over the gumbo roads of South Dakota. Three standard Metz cars won America's greatest annual road contest, without losing a single point from start to finish. Many makes and prices of cars competed, including the pick of America's best, but the Metz team of three cars was the only team that went through with a perfect score. The Metz "22" is a fully guaranteed

car, torpedo, semienclosed body, left-hand drive and center control, fitted throughout with standard equipment, including 4-cylinder 22½ horsepower water-cooled motor, Bosch magneto, 30 degree artillery wheels, best quality Goodrich clincher tires, etc. Makes 5 to 50 miles per hour on the high speed, is a remarkable hill climber, and the makers claim twice as much mileage out of tires and gasoline as the average car. Its gearless transmission entirely does away with gear trouble. It is one of the most practical cars on the market and economical to operate. The above picture is of J. C. Monn. His brother, L. G. Monn, will devote his entire time to the selling of Metz roadsters.

Automobile Accessories and Tires

The Dives, Pomeroy & Stewart department of automobile accessories, in the Basement, is an important factor in the up-keep of any car. Special prices prevail throughout the year on the finest grades of automobile tires and parts.

This department needs no introduction to the man who already owns a car, but it can be of almost invaluable aid to the man who is new in the game.
