## DYNAMITE IN STOVE FAILS TO EXPLODE

### Columbia Man Crazy With Liquor Tries to Blow Up Home

Special to The Telegraph  
Columbia, Pa., March 31.—That John Cooper and his family, who reside in Manor street, are still alive, is due to the fact that a stick of dynamite which the father threw into the stove did not explode; otherwise the house would have been blown up as the man said he wanted it to be when he threw the explosive into the stove. For some unaccountable reason the dynamite flamed up a little and then continued to burn like an ordinary piece of wood.

Cooper arrived home in an intoxicated condition and beat his wife. Not satisfied with that form of punishment he decided to blow up the house and throw the stick of dynamite into the stove. He was crazed by liquor when he committed the act, having been drinking heavily for some time. Officers placed him under arrest and Justice J. F. Lutz committed him to jail for a hearing on several charges.

## Columbia Council Elects New Borough Solicitor

Special to The Telegraph  
Columbia, Pa., March 31.—Joshua E. Senft has just been chosen the second time as solicitor of the borough. His first election took place in January, when the new council organized, but at that time Hugh W. North was serving in that office, and under the Act of Assembly of 1913, claimed the right to hold over with other municipal officers, whose terms expired in even-numbered years, until the next odd-numbered year. For a few months the borough had two solicitors, both duly elected to the same office, but the situation was cleared when at the last meeting of council Mr. North resigned. Then Mr. Senft was again elected and is now the legal officer.

When Mr. North was chosen, council was Democratic, but the Republicans gained control of that body at the last municipal election and Mr. Senft was unanimously elected. He is a graduate of Washington and Lee University and to-day is observing the eleventh anniversary of his admission to the Lancaster county bar.

## Prevent Diphtheria.

A sore throat is a good breeding place for Diphtheria germs. Protect your children by never neglecting a Sore Throat. You can wisely depend upon TONSILINE. Give Tonsiline upon the first appearance of Sore Throat—don't give Diphtheria a chance in that throat in its weakened condition. When TONSILINE is swallowed it comes directly in contact with the diseased surface and induces a healthy condition of the membranes—then the system can better defend the throat if attacked by Diphtheria germs. Keep TONSILINE in the house where you can get it quick when needed. 25c., 50c. and \$1.00.
