Marshall Criticises Educational System; Favors Socialism

Washington, D. C., May 18.—Vice-President Marshall's declaration that one of America's ills to-day "is that there is too much science in the social educational system and too little God Almighty," occasioned comment in Washington to-day. The statement was made at a church gathering here last night.

"There is this thing wrong in many of the churches," said the Vice-president, "that because church and State are separate and the States makes the schools, the church feels itself absolved from any duty in the direction of education of youth."

"The State is permitted to mold children from the age of six up through the time when they are going through colleges, where many of the professors are agnostics and atheists. But now the church is awakening to the fact that the children should be reared in the way of Christian faith from the nursery upward. I believe that there is in this country today a great spirited awakening, and the church is beginning to see that it has turned entirely too many of its functions to the State."

The Vice-president also let it be known that some day he would forget all of the other political parties and join the Socialist. "But," he added, "I shall never do this until it becomes a fault of the church; never while its flaunts on the streets a red banner in the face of faith in God and the marriage service. The Socialism in which I believe and to which I hope some day to adhere, is not that which concerns itself with consideration of power and property, but that of spirit."

Coffee Finds Its Place

The Literary Digest, of March 28, 1914, quoting the New York World, says:

"Cocain and its allied intoxicants appear to be about the cheapest things in the market. They are seemingly cheaper than whiskey, cheaper than beer, cheaper in proportion to effects than tea or coffee."

The best teaching of to-day is distinctly against the use of coffee, tea and other drugs, and drug-bearing beverages—especially among the young. It is well established that headache, nervousness, indigestion, sleeplessness, and other aches and pains are commonly caused by coffee drinking.

People are becoming alive to this fact and thousands have quit coffee and now use
