Beautiful Homes Just Completed

When C. L. Long completed a number of homes of the semi-bungalow type, at Green and Woodbine streets, last year, he gave to Harrisburg a new and distinctive type of dwelling that met with instant favor on the part of the local public.

The remaining four houses are now being offered for sale at reasonable prices and on attractive terms. Not only are these homes distinctive in general outline, an idea of which can be gathered from the illustration, but in their construction, completeness of detail, and excellent finish, as well.

The walls are of substantial brick and stucco construction. The interior is laid out into spacious, well-lighted rooms, consisting of large reception hall, open stairway, dining room, parlor and kitchen on the first floor, with four bedrooms and tiled bath on the second floor.

Individual porches with grass plots and electric fixtures, beautiful papering, excellent wood finish, and art glass are employed in beautifying the interior, while steam heat, laundry and toilet in cellar, spacious closets, built in linen closets and the best type of kitchen ranges, are among the many modern conveniences which they possess.

The homes are located at the corner of Green and Woodbine streets, one of the most desirable residence sections in Harrisburg, and every day the sample house, is the mecca for many who are loud spoken in their praise of the thoroughness with which modern substantiality, convenience and beauty have been carried out.

A visit to the sample house, which is always open for inspection is indeed worth anyone's time, if only to become acquainted with the completeness of these houses, which have set a new mark in home building in Harrisburg.—Advertisement.

STATE DEPARTMENT ASSISTING BANKERS

The resolution also charges that the Nicaraguan National Railway was sold much below its value to the bankers, and that the last election in Nicaragua was intentionally influenced by the presence of United States troops in violation of the treaty with Nicaragua.
