HOT WEATHER IS TIME TO TAKE CARE

Dr. Dixon Gives Some Excellent Hints About the Daily Living in Summer

State Commissioner of Health Samuel G. Dixon gives some excellent hints about how to live in the hot weather. The Commissioner has been observing folks in all kinds of weather for years and his suggestions are apt and well worth following. In his bulletin on the weather and how to endure it Dr. Dixon says:

"Overcome by the heat." This will be a frequent headline in the papers for the next three months. In the minds of the majority of the people all ills resulting from excessive heat are grouped under one head. There are as a matter of fact two distinct types of ailment from this cause, heat stroke or thermic fever and heat exhaustion. In the first of these the patient usually runs a high temperature and the treatment calls for ice baths. In heat exhaustion the heart and respiration are depressed. When the humidity is high over-exertion is more apt to cause heat exhaustion. In extreme weather endeavor to secure some circulation of air in the dwelling and workroom. There is less likelihood of prostration when the air is in motion. No time should be lost in securing the services of a physician when anyone is overcome by the heat. No layman is competent to distinguish between the two types and give the treatment required.

In beginning the summer months it is well to fix these few maxims in your mind.
Don't hurry—remember it was the tortoise that won the race.
Don't worry—for your sake and the other fellows.
Eat regularly but sparingly—even an omelet should use some discretion in hot weather.
Alcoholic beverages—if you use alcohol burn it in a chafing dish.
Avoid ice water and ice cold beverages—it is dangerous to paralyze your stomach because the thermometer is on the rampage.
