### WHAT NEURASTHENIA IS

Neurasthenia is a condition of exhaustion of the nervous system. The causes are varied. Continuous work, mental or physical, without proper vacation periods, without proper attention to diet and exercise, also worry over the struggle for success, are the most common causes. Excesses of almost any kind may produce it. Some diseases, like the grip, will cause neurasthenia. So also will severe shock, intense anxiety or grief.

The symptoms are over-sensitiveness, irritability, a disposition to worry over trifles, headache, possibly nausea.

The treatment is one of nutrition of the nerve cells, requiring a non-alcoholic tonic. As the nerves get their nourishment from the blood the treatment must be directed toward building up the blood. Dr. Williams' Pink Pills act directly on the blood and with proper regulation of the diet have proved of the greatest benefit in many cases of neurasthenia. A tendency to anaemia, or bloodlessness, shown by most neurasthenia patients, is also corrected by these tonics. Your own druggist sells Dr. Williams' Pink Pills.

Two useful books "Diseases of the Nervous System" and "What to Eat and How to Eat" will be sent free by the Dr. Williams Medicine Co., Schenectady, N. Y., if you mention this paper.—Advertisement.
