Search Light Lamp to Throw Five Miles Being Tried in Navy

A new type of search lamp which at a distance of five miles will produce a beam of light as bright as the sun as the ordinary types will is being experimented with by the United States Navy. Heretofore in the attempt to produce more powerful search lamps, large reflectors have been used and large currents have been made to flow through the arc between relatively small carbons. The latest method, developed at the Naval Electrical World, the dimensions are kept small without causing the carbons to deteriorate rapidly, by rotating them in a stream of alcohol vapor. Although the vapor ignites and burns with non-luminous flame its temperature is so much lower than that of the carbons that it actually cools them, thus reducing the temperature of the arc and keeps it at the focus of the reflector, thereby causing the light rays to extend in practically parallel lines from the reflector and to produce intense illumination even at great distances.

WHAT NEURASTHENIA IS

Neurasthenia is a condition of exhaustion of the nervous system. The causes are varied. Continuous work, mental or physical, without proper vacation periods, without proper attention to diet and exercise, also worry over the struggle for success, are the most common causes. Excesses of alcohol, most nervousness patients is also connected by these tonic pills. Your own druggist sells Dr. Williams' Pink Pills. The symptoms are: over-sensitiveness, irritability, a disposition to worry over trifles, headache, possibly nausea. The treatment is one of nutrition of the nerve cells, requiring a non-alcoholic tonic. As the nerves get their nourishment from the blood the treatment must be directed toward building up the blood. Dr. Williams' Pink Pills act directly on the blood and with proper regulation of the diet have proved of the greatest benefit in many cases of neurasthenia. A tendency to anemia, or bloodlessness, shown by most neurasthenia patients, is also corrected by these tonic pills. Your own druggist sells Dr. Williams' Pink Pills. Cool Food For Hot Days

Better health comes with less meat and greasy food during the warm weather.

By proper and pleasant food one can feel cooler than his over-fed neighbor.

Grape-Nuts and Cream

—some fruit and a soft boiled egg, or two, is sufficient for the hot weather breakfast

An ordinary portion of Grape-Nuts and cream contains nourishment to sustain one until the noonday meal; and being a partially pre-digested food, it does not over-tax the stomach and heat the system as do heavy, greasy foods.

These suggestions, if followed, should show that one can have a cool body, active brain and energy—even in hot weather.

"There's a Reason" For Grape-Nuts
