RIVER FRONT PARKS

FOR several weeks Park Commissioner Taylor has been negotiating with one contractor and another with a view to making available the large quantities of material which will be excavated at Second and Mulberry streets for the filling out of the narrow stretches along the river front in the northern section of the city.

In view of the fact that the appropriation of \$100,000 for the completion of the park system is available for the river strip it ought to be possible to find some way to utilize this large amount of material now in sight and which is needed so badly at this particular time to complete the river front improvement.

Unless the slope is put in decent shape the large sums which are now being expended for the construction of the retaining wall and the wide granolithic walk at the foot of the slope will be in a measure wasted insofar as the appearance of the river front is concerned.

Many of the newspapers throughout the State have taken up the cudgel against the proposed crippling of the State Constabulary by the withholding of an appropriation by the next Legislature. Candidates for the Legislature who have pledged themselves not to favor this appropriation are hearing from their constituents much more vigorously than could have been anticipated when the radicals who are opposed to the constabulary made their move some time ago.

STATE CONTROL OF GUNS

H. G. WELLS, writing from London, suggests that a great step toward the realization of the dream of universal peace shall have been taken when the nations of the world unite to forbid the manufacture of arms for private gain.

There is more in this than might at first appear. Certain noted manufacturers of guns in Europe have waxed enormously rich through the growth of the military spirit in Germany and elsewhere.

It is unfortunate for the Democratic party that the war happened so long before the November election. The Washington administration had hoped that the industrial disturbance resulting from the war in this country and the raising of the price of foodstuffs would all be charged to the European disturbance.

Company is a pygmy beside the great Krupp organization. Crush Kruppman, says Mr. Wells, and you will have done much to curb the military spirit, not only in Germany, but in all Europe.

President Wilson's proclamation to the people of the United States, advising strict neutrality not only in conduct, but in speech, is a wise and timely message, which ought to exert a restraining influence upon the hot-heads on this side of the ocean, who may take sides with one or the other of the fighting nations of Europe.

sharp advance in the price of this commodity being due largely to the shutting down of American sugar plants owing to the removal of the protective tariff.

But the people are learning every day and not even the excitement of the war is going to shut their eyes to the facts.

Gifford Pinchot, the Progressive candidate for United States Senator in this State, is to have the assistance of his bride in his campaign. Thus do we progress.

EDITORIAL COMMENT The czar is not the first monarch who in the emergency of war has appealed to "My beloved Jews."

AS "GIRARD" SEES IT [From the Phila. Public Ledger.] I Draw an imaginary, but crooked line from Harrisburg to Philadelphia. Having done that picture of the south side of the line two continuous rows of soldiers, elbow to elbow, reaching all the way.

AN EVENING THOUGHT If I have filtered more or less in my great task of happiness; If I have mated among my race, And shown no glorious morning face; If beams from happy human eyes Have moved me not; If morning skies, Books and my food, and summer rain Knocked on my sullen heart in vain— Lord, Thy most pointed pleasure take, And stab my spirit broad awake. —R. L. Stevenson.
