Tires at Before-War Prices

Yet We Never Got Choicer Rubber We Never Built Better Tires

There exists now a new reason---most compelling---for buying Good-year Tires. It results from war conditions.

These leading tires---built of extra-fine rubber, in the same way as always---are selling to-day at June Prices.

Due to Quick Action Early in August---when war began---the world's rubber markets seemed suddenly closed to us. Rubber prices doubled almost overnight.

Men could see no way to pay for rubber abroad, and no way to bring it in. We, like others---in that panic---were forced to higher prices. But we have since gone back to prices we charged before the war, and this is how we did it:

We had men in London and Singapore when the war broke out. The larger part of the world's rubber supply comes through there. We cabled them to buy up the pick of the rubber. They bought---before the advance---1,500,000 pounds of the finest rubber there.

Nearly all this is now on the way to us. And it means practically all of the extra-grade rubber obtainable abroad.

To-day we have our own men in Colombo, Singapore and Para. Those are the world's chief sources of rubber. So we are pretty well assured of a constant supply, and our pick of the best that's produced.

We were first on the ground. We were quickest in action. As a result, we shall soon have in storage an almost record supply of this extra grade of rubber. And we paid about June prices.

Now Inferior Grades Cost Double About the only crude rubber available now for many makers is inferior. In ordinary times, the best tire makers refuse it. Much of it had been rejected. But
