

Women AND THEIR Interests

Are You in Love With Love

BY BEATRICE FAIRFAX

The world is full of girls who dramatically tell me that they cannot live without the love of a certain man, and beg me to tell them how to win it. Some of these girls are really in love with the man who has tired them out, and who does not reciprocate their affection. But more of them are in love with love.

The girl who is in love with love craves affection, but is in grave danger all the time because of her own emotional nature.

Love is a beautiful and holy thing. It is worth waiting for and striving for and working for and dreaming of. But in order to be worthy of real love when it comes, one must not waste her beautiful and holy power of feeling deep things in a series of light and trifling emotions. Affection can be spent like any other of life's great riches. It must not be wasted and scattered.

The girl who is in love with love is in danger from within and without. Her own nature inclines her to look for love, to idealize some man and even to try to force the knowledge of her charms on some one not at all attracted by her. It makes her forward and not so particularly lovable.

It causes her to be impatient of guidance and to foster silly affairs of which she would not dare let her parents know. It causes her to yield too quickly to flattery and blandishment and to find delight in all sorts of people against whom her sober judgment would warn her if only she gave it a chance.

The danger that menaces her from without is manifold. It lies in the fact that she is easily the dupe of spurious affection. The man who wins her need not be worthy of love—he need only be capable of meeting her love of love. He need not be loyal and fine and worthy if once he has come to be the object of her false ideas of love. He is tempted to permit her to lavish her affection upon him and to give only a sort of toleration in return.

There are a number of things in life besides loving and marrying and giving in marriages. Love and marriage do not come to every woman. The girl who fosters her own longing for home and husband at the expense of the work that is hers to do daily interferes with her own growth and advancement.

Day dreams are beautiful things—but they have a way of occupying time that ought to be given over to the actualities of the day. There is work for each of us to do. There are duties and striving and efforts that call for our best. And we must give our best to the tasks that are here and now instead of "mooning" about the romance that we long for in our lives.

Romance and fine sentiment come all the more readily into a life if it is not choked up with weeds of wasted emotions.

So to you unhappy little girls who tell me that you cannot live unless you have the love of a certain man I reply, are you really and genuinely and unselfishly in love with him—or are you foolishly and desperately in love with the glamorous idea of love? Don't let a longing for love sweep you into an ill-advised and unworthy love affair. Because you have real feeling in your heart, make it sacred and fine and save it for a lasting affection and a worthy man.

Experienced Women Advise Mother's Friend

Because it is so perfectly safe to use and has been of such great help to a host of expectant mothers, these women, experienced in this most happy period, advise the use of "Mother's Friend."

Applied externally to the abdominal muscles its purpose is to relieve the undue tension upon the cords and ligaments resulting from muscular strain. Beneath the surface is a network of fine nerve threads and the gentle, soothing embrocation, "Mother's Friend," is designed to soothe and lubricate the muscular fibres as to avoid the unnecessary and continuous nagging upon this myriad of nerves. It is a reflex action.

Applied internally it affords the proper massage to prevent caking.

Thousands of women have reason to believe in this splendid help under the trying ordeal of motherhood. Their letters are eloquent evidence of its great value to women. In use for many years it has come to be a standard remedy for the purpose.

There is scarcely a well-stocked drug store anywhere but what you can easily obtain a bottle of "Mother's Friend" and in nearly every town and village is a grandma who has used it in earlier years. Expectant mothers are urged to try this splendid assistant to comfort.

"Mother's Friend" is prepared by Bradford's Regulator, 419 Lamar Bldg., Atlanta, Ga. Send for our little book.

How to Eradicate All Superfluous Hair

As soon as women of to-day learn that permanent removal of ugly, repulsive hair growths can only be gained by reaching the hair root and not by using common, worthless depilatories such as burning pastes, powders, evil-smelling liquids, etc., the better it will be for their happiness and safety. Nor can the electric needle be depended upon to give satisfactory results without danger of horrible scars of facial paralysis. The best means I have ever found that never fails to remove all signs of disfiguring growths of hair on the face, neck, arms or hands is a simple, inexpensive preparation called Mrs. Osgood's Wonder. It is absolutely harmless, cannot injure the skin or complexion and in a surprisingly large number of cases has succeeded in killing the hair down to the very roots, source of all growth. When the roots are killed no more hair can grow. You can get Mrs. Osgood's Wonder from the Drug Store or any up-to-date druggist or department store. Signed Money-Back guarantee with every package. Let me caution you however, not to apply this treatment except where total destruction of hair is desired.

Cumberland Valley Railroad TIME TABLE

In Effect May 24, 1914.

FRANKS leave Harrisburg for Winchester and Martinsburg at 5:02, 7:50 a. m., 3:40 p. m.

AN INTERESTING AUTUMN NOVELTY

A New Coat That is Eminently Smart Yet Easy to Make

By MAY MANTON

8375 Fancy Double Coat, 34 to 42 bust.

The double coat makes an exceedingly interesting feature of autumn styles. Undoubtedly it owes its inspiration to the cape yet it is distinctly a coat and one that will be found very generally becoming. This model is exceedingly simple to make since the sleeves are in the Japanese style and the various pieces can be put together without difficulty. In the picture, only the collar is of a contrasting material but this is a season when we will see a great many combinations of silk with wool, and of plain material with fancy material and a quite different and equally handsome effect could be obtained by making the under coat of one material while the over coat and vest portions are of another, wearing the coat with a tunic skirt treated in a similar way.

For the medium size, the coat will require 5 yds. of material 27, 4 1/4 yds. 36, 3 1/2 yds. 44 or 50 in. wide, with 1/4 yd. 27 in. wide for the collar.

The pattern 8375 is cut in sizes from 34 to 42 inches bust measure. It will be mailed to any address by the Fashion Department of this paper, on receipt of ten cents.

Bowman's sell May Manton Patterns.

CIVIL SERVICE EXAMINATIONS

HOW TO PRESERVE MILK IN SUMMER

Here Are Little Rules in Regard to Keeping It Sweet During Hot Spell

Always take the milk into the house as soon as possible. In warm weather put the dish where the sun cannot shine on it. Milk is frequently spoiled because it has been in the sunshine two or three hours.

Except in very cold weather milk cannot be kept properly without ice.

Always put it in the refrigerator as soon as it is received, and unless the milk bottle is in actual contact with the ice it will be colder in the bottom of the refrigerator than in the top, as the cold air settles rapidly.

Do not take the milk from the original bottle and fill it when needed. It should never be stored in a bowl or pitcher, says The Mother's Magazine. Always clean the edge of the milk bottle and wash off the top of the cap before removing the cap. Keep the cap snapped in place except when actually pouring the milk from the bottle.

No matter how clean your home may be, milk will deteriorate if exposed to the air. One of the best ways of serving milk on the table, from the sanitary standpoint, is in the original bottle. Always keep in mind the fact that milk is easily contaminated from dust, odor and flies. As many as 100,000 typhoid bacteria have been found on a single fly, and in thousands

of cases intestinal disorder in infants has resulted from flies contaminating the milk upon which the babies were fed. In one experiment 414 flies were examined and were found to carry an average of 1,250,000 bacteria per fly, such as might readily cause fatal intestinal disorders in infants.

Always keep the refrigerator clean and sweet. Inspect it out every week, wiping up at once any particle of food, liquid or solid, that may be spilled in it. Do your share in keeping the empty bottles clean. Do not wash them with soap or a cloth but first rinse them with cold or slightly warm water, and then scald them. If you scald them before rinsing with cold or warm water, the boiling water will make the milk stick to the glass.

Be fair to your neighbors, just as you would have them be fair to you. If any contagious disease breaks out in your family, do not return any of the bottles to the milkman until you have consulted your doctor and he has advised you how to sterilize them.

WANTED
Apprentice Girls
For our Millinery Work Rooms. We pay a salary while learning. Apply at once, Millinery Department. (Second Floor.)

Yes, men actually wonder why the quality of King Oscar Cigars never varies. It seems most unusual for a cigar to be regularly good for 23 years when so many brands come and go (emphasis on go) in half the time and less.

Well--

King Oscar 5c Cigars

are unusual--the longer you smoke them the more you will appreciate their superior quality for the money.

Standard Nickel Quality For 23 Years
