

Your "Batting Average"

can't be kept up on goods that are deficient in muscle-making material, that heavily tax the digestive organs. The effort to digest high-proteid foods in Summer uses up vitality and lays the foundation for disease.

SHREDDED WHEAT

will keep the body at top-notch efficiency for work or play. It is what you digest, not what you eat, that supplies strength for body and mind. Every particle of the whole wheat grain is digested and converted into sound muscle, bone and brain. Your grocer sells it.

Always heat the Biscuit in oven to restore crispness; then pour over it milk or cream, adding salt or sugar to suit the taste. Deliciously nourishing for any meal when served with sliced peaches, milk or cream, or with fresh fruits of any kind. Try toasted Triscuit, the Shredded Wheat Water with butter, cheese or marmalades.

Made only by The Shredded Wheat Company, Niagara Falls, N. Y.

ORAL HYGIENE

The human mouth is the most important organ of the body from the standpoint of prevention of disease, although through ignorance of this fact it is the most neglected. The mouth is a breeding place for harmful bacteria of many kinds. Statistics prove that over 90 per cent. of humanity have conditions obtaining in their mouths which are harmful and dangerous to the health of their internal organs.

Health organizations have spent millions to free food, water and air from bacteria which would produce disease within the bodies of the consumers, while at the same time many of these same harmful bacteria inhabit the neglected mouths of such a great proportion of the human race.

If you are afflicted with any disease of the internal organs, first of all have your mouth put in a sanitary condition and keep it clean. Do not eliminate the condition of the mouth and teeth as a probable cause. Drugs taken into your stomach do not destroy the bacteria growing in and about your diseased teeth and gums.
