Thin Blood and Dyspepsia Thin-blooded people generally have stomach trouble. They seldom recognize the fact that thin blood is the cause of the indigestion, but it is. Thin blood is one of the most common causes of stomach trouble. It affects the digestion at once. The glands that furnish the digestive fluids are diminished in their activity, the stomach muscles are weakened and there is a loss of nerve force. In this condition nothing will more quickly restore appetite, digestion and normal nutrition than good, rich, red blood. Dr. Williams' Pink Pills act directly on the blood, making it rich and red, and the enriched blood strengthens weak nerves, stimulates the tired muscles and awakens to normal activity the glands that supply the digestive fluids. The first sign of returning health is an improved appetite and soon the effect of these tonic pills is evident throughout the system. You find that what you eat does not distress you and that you are strong and vigorous instead of irritable and listless. You are now on the road to health and care in the diet is all that you need. The Dr. Williams' Medicine Co., Schenectady, N. Y., will send you a little diet book free on request. Your own druggist sells Dr. Williams' Pink Pills.—Advertisement.
