MARROW ESCAPE AT DAUPHIN CROSSING

Automobile of H. V. Lukins Struck by Philadelphia and Reading Train

Special to The Telegraph
Dauphin, Pa., Oct. 20.—A train on the Philadelphia and Reading Railroad arriving in Dauphin at 10.05 o'clock yesterday at grade crossing just before reaching the station. The machine was owned and driven by H. V. Lukins, of Duncannon, and a forerunner whom he had picked up on the road was in the car with him. The engineer could not see the automobile on account of a sharp curve in the road. Several people motioned to him but he thought they were waving and paid no attention to them. When the train hit the car, both men were thrown out, but neither was seriously hurt. The front wheel, shield, and axle of the car were broken, but a blacksmith, near the scene of the accident, repaired it and Mr. Lukins continued on his way home without the company of the forerunner, however, for he ran away after he was thrown out of the automobile.

The appearance of heaviness disappears when

Rengo Belt

Reducing Corsets

are worn by stout and medium women. Their great strength and elastic freedom eliminates, also, the feeling of heaviness.

These characteristics belong exclusively to **Rengo Belt** corsets. They are the direct achievement of the famous patented **Rengo Belt** feature, which has proven its worth by over five years of growing popularity. Inserts of elastic enable the strength of the garment to be more perfectly applied and actual reduction is thus accomplished with comfort. The boning is of *double watch-spring* steels—very pliable but extra strong—and is *guaranteed* not to rust. The crowning features of **Rengo Belt** corsets are their thoroughly strong materials and tailoring—without which all other reducing corsets fail.

THIN FOR YEARS

"Gains 22 Pounds in 23 Days"

"I was all run down to the very bottom," writes F. Gagnon. "I had to quit work I was so weak. Now, thanks to Sargol, I look like a new man. I gained 22 pounds in 23 days."

"Sargol has put just 10 pounds on me in 14 days," states W. D. Roberts. "It has made me sleep well, enjoy what I ate and enabled me to work with interest and pleasure."

"I weighed 132 pounds when I commenced taking Sargol. After taking 20 days I weighed 144 pounds. Sargol is the most wonderful preparation for flesh building I have ever seen," declares D. Martin, and J. Meier, adds: "For the past twenty years I have taken medicine every day for indigestion and got thinner every year. I took Sargol for forty days and feel better than I have felt in twenty years. My weight has increased from 150 to 170 pounds."

When hundreds of men and women—and there are hundreds with more coming every day—living in every nook and corner of this broad land voluntarily testify to weight increases ranging all the way from 10 to 35 pounds given them by Sargol you must admit, Mr. and Mrs. and Miss Thin Reader, that there must be some thing in this Sargol method of flesh building after all.

Hadn't you better look into it, just as thousands of others have done? Many thin folks say: "I'd give most anything to put on a little extra weight," but when someone suggests a way they exclaim, "Not a chance. Nothing will make me plump. I'm built to stay thin." Until you have tried Sargol, you do not and cannot know that this is true.

Sargol has put pounds of healthy "stay there" flesh on hundreds who doubted, and in spite of their doubts. You don't have to believe in Sargol to grow plump from its use. You just take it and watch weight pile up, hollows vanish and your figure round out to pleasing normal proportions. You weigh yourself when you begin and again when you finish and you let the scales tell the story.

Sargol is absolutely harmless. It is a tiny concentrated tablet. You take one with every meal. It mixes with the food you eat for the purpose of separating all of its flesh producing ingredients. It prepares these fat-making elements in an easily assimilated form, which the blood can readily absorb and carry all over your body. Plump, well-developed persons don't need Sargol to produce this result. Their assimilative machinery performs its functions without aid. But thin folks' assimilative organs do not. This fatty portion of their food now goes to waste through their bodies like unburned coal through an open grate. A few days' test of Sargol in your case will surely prove whether or not this is true of you. Isn't it worth trying?

If you want a beautiful and well-rounded figure of symmetrical proportions if you want to gain some solid pounds of healthy stay-there flesh, if you want to increase your weight to normal, weigh what you should weigh, go straight to your druggist to-day and get a trial package of Sargol and use it as directed. Sargol will either increase your weight or it won't and the only way to know is to try it. A single package of Sargol easily enables you to make this test. Sixty days' use of Sargol, according to directions, is absolutely guaranteed to increase your weight to a satisfactory degree or your druggist will refund all the money you have paid him for it. Sargol is sold by leading druggists everywhere and in Harrisburg and vicinity by

G. A. GORGAS AND OTHERS

AN EASY WAY TO GET FAT AND BE STRONG

The trouble with most thin folks who wish to gain weight is that they insist on drugging their stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract assimilates the food you eat. Thanks to a remarkable new scientific discovery, it is now possible to combine into simple form the elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This master-stroke of modern chemistry is called Sargol and has been termed the greatest of flesh-building Sargol aims at increasing its generative, re-constructive powers to coax the stomach and intestines to literally soak up the fattening elements of your food and pass them into the blood, where they are carried to every part of the body. This master-stroke of your body. You can readily picture the result when this amazing transformation has taken place and you notice how your cheeks fill out, hollows about your neck, shoulders and bust disappear, and you feel like a new man. Sargol is absolutely harmless, inexpensive, effective. It is sold in every drug store. Caution—While Sargol has given excellent results in overcoming nervous dyspepsia and general stomach troubles, it should not be taken by those who do not wish to gain ten pounds or more.

HOW THIN PEOPLE CAN PUT ON FLESH

A New Discovery

Thin men and women—that big, hearty, filling dinner you ate last night. What became of all that fat-producing nourishment it contained? You haven't gained a weight one ounce. That food passed from your body like unburned coal through an open grate. The material was there, but your food doesn't work and stick to the plain truth is you hardly get enough nourishment from your meals to pay for the cost of the food. This is the true cause of the world over. Your nutritive organs, your functions of assimilation, are not out of gear and need reconstruction.

Cut out the foolish foods and funny sawdust diet. On the plain and simple, eat everything but eat with every one of those single Sargol tablets. In two weeks note the difference. Five to eight good solid pounds of healthy, stay-there flesh will be the result. Sargol, too, mixes with your food and prepares it for blood in an easily assimilated form. This people gain all the way from 10 to 25 pounds a month while taking Sargol, and the scientific combination of six of the best flesh-producing elements known to chemistry. They come in a tiny package, are pleasant, harmless and inexpensive, and George A. Gorgas and other leading druggists sell it at an absolute guarantee of weight increase or money back.

THIN PEOPLE CAN INCREASE WEIGHT

Thin men and women who would like to increase their weight with 10 or 15 pounds of healthy "stay there" fat should try eating a little Sargol with their meals for a while and note results. Here is a good test worth trying. First weigh yourself and measure yourself. Then take Sargol—one tablet with every meal—for two weeks. Then weigh and measure again. You'll find a question of how you look or feel or what your friends say and think. The scales and the tape measure will tell their own story, and most any thin man or woman can easily add from five to eight pounds in the first fourteen days by following this simple direction. And best of all, the new flesh stays put.

Sargol does not of itself make fat, but mixing with your food, it turns the fats, sugars and starches of what you have eaten, into rich, ripe, fat-producing nourishment for the tissues and blood—prepares it in an easily assimilated form which the blood can readily accept. All this nourishment now passes from your body as waste. But Sargol stops the waste and does it quickly and makes the fat-producing contents of the very same meals you are eating, now develop into solid pounds of healthy flesh between your skin and bones. Sargol is safe, pleasant, efficient and inexpensive. George A. Gorgas and other leading druggists sell it in large boxes—forty tablets to a package—on a guarantee of weight increase or money back.
