Campaign

It was said among the ministers last night that Dr. Stough's evening sermons seem to be rising by steps in power and effectiveness.

There has been no disturbance by persons having the alcoholic fever in any part of the tabernacle thus far. The ushers and "cops" are on the job and everybody must keep quiet.

William E. Bachman, of Hasleton, spent last evening at the newspaper reporters' desk.

Miss Palmer addressed the W. C. T. U. meeting at the home of Mrs. Burkholder, 722 North Sixteenth street, this afternoon. Mrs. C. M. Spahr is president and Mrs. E. A. Reigle is vice-president.

The neighborhood prayer meeting committee and officers will meet with the Rev. Mr. Cahwright at the close of this afternoon's services in the tabernacle.

The personal workers committee will meet this afternoon at the close of the services in Section 7.

Dr. Stough says: "I suppose I am the most misquoted man in town."

"The biggest gang of knickers is the crowd that never come to hear me."

"There are churches in hell to-night with presiding elders, deacons and even bishops, for it is the desire of sinners to repeat in the world of woe what they were wont to do on earth."

Many visiting ministers attend the evening services on the ministers' gallery. Among those present last night were the Rev. S. C. Enck, United Brethren, Philadelphia; the Rev. E. O. Burton, United Brethren, Palmyra; the Rev. J. S. Seldomschick, United Brethren, Elizabethtown; the Rev. N. A. Ulrich, United Brethren, Paxtang; the Rev. P. H. Houghton, D. D., Baptist, Steelton; the Rev. N. A. Barr, United Evangelical, Church of the Rev. Robert C. Ellwood, D. D., Presbyterian, Atlantic City; the Rev. Mr. Johnson, Presbyterian, Dunannon, and Professor Harvey Rodgers, Dunannon.

All Boy Scouts of this city met with Miss Eggleston at 4 o'clock at the tabernacle to-day.

There will be a great mass meeting for children at the tabernacle to-morrow.

At the opening of each afternoon service experiences are given by persons who have attended morning prayer meetings.

Many people go to the tabernacle at 6.5 o'clock in the evening. Doors open at 1.30 o'clock in the afternoon and 6.30 o'clock in the evening.

For persons from out of town who bring lunches to eat in the tabernacle, a garage can be had provided at a corner of the building.

It has been said that Harrisburg chorus is better and larger than "Pitts" Sunday's chorus was when at "Pitts."

FACES AS FAIR AS A SUMMER DAY

Are Possible If Stuart's Calcium Wafers Are Used For a Short Time After Each Meal.

Many people have been heard to say that they used creams and lotions for years without effect, yet after five or six days of Stuart's Calcium Wafers their complexions were perfectly clear.

"I Got Rid of Blackheads in a Jiffy by Using Stuart's Calcium Wafers."

It's easy to understand why. Creams and lotions only get at the surface, while Stuart's Calcium Wafers go right into the blood and instead of a slugging deposit in the skin the impurities that cause skin diseases are destroyed in the perspiration that is exhaled through the pores in the form of invisible vapor. You'll never have a good complexion without pure blood, but you positively will have a fine, beautiful complexion if you use Stuart's Calcium Wafers.

They contain no poisonous drug of any kind, are perfectly harmless and can be taken with absolute freedom, and they work almost like magic. Calcium Sulphide, their principal ingredient, is the greatest blood-cleanser known to science.

No matter how bad your skin may be, Stuart's Calcium Wafers will quickly work wonders with it. It's goodly to blackheads, pimples, acne, boils, rash, eczema and a dirty "filled-up" complexion. You can get a box of Stuart's Calcium Wafers at any drug store at 50 cents a box, and you will be positively delighted with their wonderful effect. A small sample package mailed free by addressing E. A. Stuart, Co., 175 Stuart Bldg., Marshall, Mich.—Advertisement.

Sidelights

Thousands of men are expected to attend the lecture on "Winds and Whirlwinds," by Dr. Stough, in the tabernacle Sunday, November 8. Doors open at 10 o'clock. The ladies will assist in the chorus, then leave for Ridge Avenue Methodist Episcopal Church. Admission will be by ticket.

Dr. Stough said: "Some of the Harrisburg churches are refrigerators instead of incubators."

The subject of Dr. Stough's sermon to-night will likely be "What is a Christian?"

Among the visiting ministers in attendance Wednesday night were Bishop W. H. Fouke, Naperville, Ill., of the United Evangelical Church; Rev. N. A. Kiracofe, United Brethren, Mechanicsburg; the Rev. E. P. Robinson, Presbyterian, Dauphin; the Rev. J. J. Slinger, D. D., Church of God, Linglestown.

Harrisburg will see a great demonstration on Tuesday evening when the young people's rally and campaign walk-around will take place. All of the church societies will meet thus body and march to the tabernacle. All persons interested are urged to be at the tabernacle this evening. Miss Lura M. Bullock and Benjamin Whitman have the arrangements in charge.

The offering on Tuesday amounted to \$104.

LIVE WIRE WORKERS

The Rev. E. A. G. Bessler, pastor of State Street United Brethren Church and statistical secretary of the East Pennsylvania Conference, is an evangelistic worker for the Stough campaign. He is one of the new city pastors, having come here a little more than a year ago after a very successful pastorate of six years at Steelton. He has taken an active part in the campaign from the beginning and was the first of the United Brethren pastors of the city to sign the call to the Stough campaign. He is also one of the workers in the erecting of the tabernacle, volunteering about five days of service in various parts of its construction. The Rev. Mr. Bessler is a firm believer in evangelism and particularly in a union of churches in a great campaign for righteousness such as is now in progress in this city. He has succeeded in securing the cooperation of the members of his church in the campaign, dispensing with both the Sunday morning and evening preaching services and every other service except Sunday School. He thoroughly believes in Dr. Stough's methods and heartily co-operates in every movement of the campaign, and accordingly has a profound conviction that this united effort under the leadership of Dr. Stough will result in a great moral and spiritual uplift to the city and community.

The Rev. W. E. Yes, one of the live-wire workers in this city, has become so popular that it keeps him busy to stay out of organizations in order of looking for something to do. He has entered on the fifth year as pastor of the Fourth Street Church of God and is the only pastor in this city holding a political office, being a member of the State Board of Education. He is also president of the board of trustees of Findlay College. During the building of the tabernacle he was one of many preachers and laymen to assist in erecting the mammoth structure. He knows how to carry 20-foot planks as well as preaching the Gospel.

GREAT GEOGRAPHER OF COUNTRY IS DEAD

[Continued From First Page]

gineer for the Water Supply Commission of Pennsylvania; and two daughters, Mrs. May Backus and Miss Alice Gannett. Farley Gannett received word of his father's death yesterday morning and immediately left Washington, but he failed to reach his father's bedside before death came.

Henry Gannett was born at Bath, Maine, August 25, 1842. He was educated from Lawrence Scientific School and Hooper Mining School (Harvard), taking two degrees. Later he received the degree of LL. D. from Bowdoin College.

He was for years a foremost authority on matters pertaining to the science of geography, and has done probably more to advance that science than any other man of his day and age. From the start he was identified with geographic work, his early exploits during the seventies as topographer on the famous survey of the territories, under the direction of F. V. Hayden, being not among the least of his achievements. With the creation of the United States Geological Survey he became affiliated with that branch of the government service, and in 1882 became its chief geographer, which position he held until recently. His name stands to-day perpetuated on hundreds of the engraved maps issued by the Survey. He was geographer of the tenth, eleventh and twelfth census, and served as director of the census of the Philippine Islands in 1902, and of Cuba in 1907.

He also was conspicuous on many important boards, notably as geographer for the Conservation Commission; as chairman of the United States Board of Geographic Names, and as chairman of the American Commission appointed by Congress to decide upon the discovery of the North Pole, contested by Perry and Cook. At the time of his death he was president of the National Geographic Society of Washington, of which he was one of the founders twenty-three years ago.

Mr. Gannett was a member of the American Geographic Society, the Scottish Geographic Society, the Philadelphia Geographic Society, the American Statistical Association, and the Washington Academy of Science. He was the author of a large number of publications, mostly relating to geography, principal among these being his Manual of Topographic Surveying, his Dictionary of Statistics, Commercial Geography, Building of Nations, and various census publications. He was a contributor to the Encyclopedia Britannica and the New International Encyclopedia. He prepared a number of important reports on forest conditions in the United States and issued gazetteers for eleven States.
