## The Girl Not Worth Knowing

BY BEATRICE FAIRFAX

I am going to quote to-day at length the letter of a girl who voices the troubles which I firmly believe many girls have found taking all the happiness from their lives.

"This is what Marion writes: 'Since I was sixteen I have gone to different places of amusement with young men. They said they enjoyed my company, and I was always sociable and made it pleasant for every one with whom I came in contact. A young man would call frequently for three or four months and then he would remain away. They all seemed to be fascinated for a time, but I could not keep their lasting friendship. There has been a steady series of admirers, and I have been particularly loved and cherished by her youth goes and days vanishes with it. She is likely to make a marriage that is based on only two things—the desire to be loved (without particularly loving her sweetheart), and the longing to prove to the people who are watching old-maidhood steal upon her that she can hold a man's affections after all. Neither of these is a legitimate reason for marrying or can lead to any lasting happiness.

"To dispose of Marion's present problem briefly, let me say that it is ridiculous to measure whether or no you marry a man in terms of the friends he will bring you. If a girl of twenty-five loves a man three years her junior and he knows her age and does not feel that it is a barrier to their love, she is safe to marry him, provided she feels reasonably sure that he is mature enough to know what he is doing when he marries her.

"Eighteen dollars a week is not a large sum on which to set up household, but a clever, frugal woman can manage on that and encourage her husband to greater and greater effort and success.

"The point of Marion's letter that interests all girls is that quality of charm by which a girl attracts masculine admiration, but cannot hold it. There are various reasons for it—and the girl in like case will probably find that some of them applies to her.

"The girl who fails to hold admiration is often self-centered and is given to talking and thinking overmuch of herself. She may be peevish and prone to demand as her rights the things that she should graciously accept as favors.

"She may be forward and force attention, or try to interest them as meaning more than the man intends, or perhaps she tries to force the attention faster than the man likes, and so frightens him away. Or by cold selfishness she may come to impress him as the sort of girl who accepts everything and grants nothing in return, or who is interested only in herself, or who is interested only in herself, or who is interested only in herself.

"The way to have a friend is to be one, and the girl who attracts men and cannot hold their interest probably fails to feel a real honest interest in them as individuals. The one great fault in the nature of a girl 'who does not wear well' is the lack of unselfish sympathy for others.

## Important Consideration For Careful Poultrymen During Winter Months

### Rations Recommended by New Jersey Experiment Station a Good Guide

By Dr. Harry Reynolds Lewis  
Head of the Department of Poultry Husbandry of the New Jersey Agricultural Experiment Station

Copyright, 1914

During the winter months poultry in the colder climates get practically no green foods and are wholly dependent on what is fed them. It is therefore, highly important that they be fed scientifically the things they most need at the season and to make them egg producers.

Certain general rules can be laid down for the treatment of the flock, and with careful observation they should produce satisfactory results. The following article contains suggestions based on scientific experiments and is, therefore, more than ordinarily valuable.

The proper feeds and the methods of feeding the laying flock is one of the vital problems for the poultryman. During the winter months, in the colder climates, the birds get no natural food whatsoever. It is, therefore, necessary to supply it in the ration in an efficient and economical form. The food supply of the laying flock is the raw material from which they manufacture eggs and meat for human food consumption.

Without the proper food it is impossible for them to produce the proper quality and amount of eggs. When feeding for egg production, the following factors should be considered when mixing the feeds and supplying them.

First—Nothing but clean, wholesome food to be used.

Second—Considerable variety in the ration should be allowed so that each bird can balance her own ration.

Third—A liberal feeding of meat scrap is largely responsible for great production.

Fourth—Plenty of exercise should be compelled, by the feeding of grain scattered in deep litter. This keeps the birds active and in good health.

Fifth—Plenty of water should be supplied. Fresh, clean water should be kept before them all the time, and some form of succulent should be regularly given.

Sixth—The birds should be watched carefully and constant attention given to their health and appetite. Any abnormal conditions should be immediately corrected.

### Rations Recommended

The following rations are recommended by the New Jersey Agricultural Experiment Station, after years of experimental work and careful testing. They have given exceptionally good results throughout the State. The rations as recommended apply especially to the light active breeds like the Leghorns. Such modifications as are necessary for seasonal feeding and for heavier breeds are described.

Dry mash as mixed for winter feeding.

Kind of Food, by weight, cost.	Amount	Approximate
Wheat bran	200 lbs.	\$3.20
Ground middlings	100 lbs.	1.75
Ground oats	100 lbs.	1.65
Gluten feed	50 lbs.	1.85
Meat scrap	25 lbs.	.75
Total	475 lbs.	\$8.20

This ration when mixed at home by the poultryman will cost approximately \$1.75 per one hundred pounds. The Morning Grain Ration.—In addition to the dry mash grain rations the following should be fed every morning, both winter and summer between seven and nine o'clock. In the winter this grain ration is usually scattered in the house. In the summer it can be scattered broadcast about the yard. The primary object of this morning ration is to induce exercise, thus keeping the birds busy and healthy.

Good Morning Meal

About five pounds of this scratch ration is fed to each one hundred birds in the morning. A special ration is made up as follows:

Scratching ration:

Kind of Food, by weight, cost.	Amount	Approximate
Wheat	100 lbs.	\$2.20
Oats	100 lbs.	1.93
Total	200 lbs.	\$4.13

This ration when mixed at home by the poultryman will cost about \$2.06 per one hundred pounds.

The Night Grain Ration.—Between four and five o'clock in the afternoon, the time varying somewhat with winter and winter, the night ration is fed. It is composed of whole and cracked grains, and is fed at the rate of about ten pounds to one hundred birds, or all that they will eat up clean.

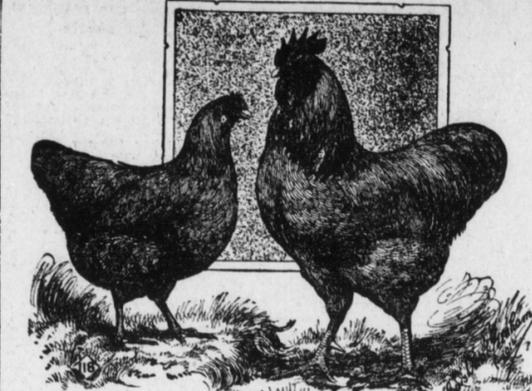

Night Ration

Kind of Food, by weight, cost.	Amount	Approximate
Cracked corn	200 lbs.	\$3.30
Wheat	100 lbs.	2.20
Oats	100 lbs.	1.93
Buckwheat	100 lbs.	2.00
Total	500 lbs.	\$9.43

This ration when mixed at home will cost the poultryman about \$1.80 per one hundred pounds.

The special feature of the above night ration is the fact that it has food material especially adapted to keep warmth in the birds' body at night, such as for example as corn and buckwheat. When the above ration is fed to the heavier breeds, which have a tendency to excessive body fat, it is good practice to eliminate one-half the corn and substitute barley for the buckwheat. During the summer months all that is necessary is a night ration of equal parts corn, wheat and oats.

The oldest of all the American breeds of poultry is the Plymouth

Copyright, 1914  
BUFF PLYMOUTH ROCKS  
By Louis Paul Graham

Rock. Its great popularity has caused it to be bred in a variety of colors beginning with the original barred variety and followed by the white, buff, partridge, silver penciled, Columbian and golden barred.

The white Plymouth Rock was bred from "sports" and albinos from the barred. The buffs, which were originated in the early '90s and for a time were the most popular, were the result of various crosses between the white Plymouth Rock, buff cochin, buff leghorns and Rhode Island red. In their early history they varied greatly in shades of color, but the fanciers of the breed by hard work succeeded in breeding them to a more even and better golden buff color than were their parents. Buff cochin and buff leghorns. Buff rocks also improved greatly in shape, and for excellence in breed type the buff is second only to the white rocks.

This is a fine farmer's fowl, doing exceptionally well on free range and possessing utility qualities that are desirable. It is a good forager and a consistently good layer of large brownish eggs, many of which are produced in winter when the farmer can get most money for them. The birds are hardy and of rugged growth, developing rapidly to broiler size and for such are much esteemed. When nearly full grown they make the best of roasting fowls, and their rich yellow skin and legs and full plump breasts appeal strongly to the American housewife.

The rich golden buff of their plumage, bright red heads, combs and wattles and golden yellow legs make them striking fowls either in the exhibition pen or on free range.

They have many devoted breeders who are banded together in a national club for the purpose of improving and popularizing the breed.

These fowls do well in small numbers which must be confined, and are therefore valuable for backyard or "home" flocks. Their color does not easily show the soil of confinement, light white plumage will do. The hens are good layers. They will sit, hatch and rear chickens so that a flock of buff rocks will supply the home table with eggs, broilers, roasters and fricassees and prove profitable to their owners.

When full grown, buff rock males weigh from 7 1/2 to 9 pounds, females from 5 1/2 to 6 pounds, and the latter reach laying maturity in from 5 1/2 to 6 1/2 months.

USE AND VALUE OF TRAP NESTS

The trap nest was a clever invention to weed out the lazy hen and discover which were the real workers in a flock.

It has proved its worth on thousands of farms, getting rid of drones and enabling the poultryman to scientifically manage his flock. It has turned many a losing farm into a paying proposition and long since become a permanent fixture on every well regulated farm. Next week's article will be on this subject. Look for it next Saturday, appearing exclusively in the Telegraph.

Next week Michael K. Boyer, poultry editor of the Farm Journal, will contribute an article on "Use of Trap Nests." The illustration by Louis Paul Graham will show "Black Langshans."

## State Board Is Actively Enforcing the Law Relative to Sale of Adulterated Wax

At the examinations conducted by the Pharmaceutical Examining Board in Pittsburgh and Philadelphia on November 6 and 7, seventy-one persons applied for registration as pharmacists, of which fifty were successful, and 144 as qualified assistants, of which ninety were successful.

During the meeting of the board which followed, five hearings were given Pittsburgh dealers under the drugs act, for selling adulterated white wax. Two persons were prosecuted since the last meeting for conducting drug stores without being registered as pharmacists, six unregistered persons for compounding prescriptions; five proprietors for permitting unregistered clerks to compound prescriptions, and one colored man for the unlawful sale and possession of cocaine. Three Italians were fined in Philadelphia for conspiracy in securing the registration of one of them as a pharmacist, by making false statements to the board under oath as to the applicant's experience in the drug business. All pleaded guilty in court. One pharmacist, applicant who swore to false statements in his application was arrested on a charge of perjury, and has not yet appeared in court under \$500 bail.

The next examinations will be held in the Technical High School, Harrisburg, on March 15, 1915.

Those who passed the examinations were as follows:

- PHARMACISTS**
- Carl S. Burkett, Emile F. Krapp, William H. Charles, Henry D. Pimas, Charles P. Powers, G. Arthur Herd, William J. Kirsch, all of Pittsburgh.
- Samuel M. Ankrum, Walter A. Arnold, William M. Boyd, George H. Broadbelt, Estella E. Brozelski, Samuel C. Hymen, Cohen, Abe Plinkman, Elmer T. Guest, John T. Harrison, George T. Morris, Sara Schuchman, Norman A. Shiller, Morris Seifer, William Udell, all of Philadelphia.
- Edw. H. Hinman, Allentown; Edward Stavin' Avalon; John R. Watson, Bristol; Leon E. Levy and Samuel D. Sanderson, Braddock; Alex. H. Hayes, Butler; Paul D. Coble, Chambersburg; Harold W. Fellows, Charleroi; Samuel M. Braddock, John H. Glenn, H. Long, S. Potter Brown, Jr., Greensburg; William R. Rovinsky, Jeannette; Charles H. Hays, John H. Schaeffer, P. Davidson, Newville; Chester L. McLaren, Phillipsburg; Harry N. Krisk, Sinking Spring; Bruce Salehury, Tyrone; Harry L. Miller, Washington; Harry E. Walker, Chambersburg; Ernest A. Steyer, Wiconisco; Isiah W. Morse, Atlantic City, N. J.; Clark H. Flaagan, Binghamton, N. Y.; Raymond Glazier, Belpre, Ohio, and Henry B. Becker, Hadler, Heights, N. C., all of Pittsburgh.
- QUALIFIED ASSISTANT PHARMACISTS**
- Vincent Calabrese, Martin C. Connelly, Philip Elivich, Julius Finkelpearl, James A. Harter, William G. Gantos, J. Frederick Kastner, Paul M. Williams, Curtis C. Crowther, all of Pittsburgh.
- Horace R. Aarons, Rudolph W. Adler, Harry Bradburn, Jacob Broxmeyer, John C. Brown, William J. Conley, Moses Feinstein, Simon E. Finkelstein, Abe Folshten, Abraham Green, M. Richard Goodman, J. H. Halban, Leopold E. Helfand, Jacob L. Medvedkin, Charles R. Monteith, Philip Mintzer, Frank M. G. W. Livingston, Keller, Fanny Nussbaum, Michael Pinzner, Leon Rovno, L. Gilbert Ruff, Jr., Herman H. Shanbacher, Aaron Slinkin, Henry L. Somers, Harry C. Thornton and Edward L. Weiss, all of Philadelphia.
- Alfred W. Shoemaker, Allentown; Earl D. Davis, Ashland; John S. Tress, Beaver Falls; David D. Pressner, Bethlehem; Robert R. Keely, Boyertown; Myron P. Riehton, Bloomsburg; Walter E. McClure, Conowingo; Paul H. Carroll, Conshohocken; Ernest K. Rapp, Doylestown; Hobart P. White, DuBois; Samuel R. Alloway, Erie; Howard E. Davis, East Downingtown; Thomas F. Grieff, Emlenton; Elmer J.

## Importance of Keeping Body Well Nourished

In time of war, the greatest effort is always made toward cutting off the enemy's base of supplies. It is the well-nourished people who fight the longest and live the longest and contribute most to human progress. In your stomach doing its duty—does it convert food into good blood and tissue?

Dr. Pierce's Golden Medical Discovery has been so successful in the treatment of indigestion, that thousands of former sufferers owe their good health of to-day to its wonderful power, and test mounts to prove it.

It causes the little muscular fibres into activity and causes the gastric juices to thoroughly mix with the food, you eat, simply because it supplies the stomach with pure, rich blood. It weak, impure blood that causes stomach weakness. Get good blood through the use of Dr. Pierce's Golden Medical Discovery, and you will have no more indigestion.

It is the world's proved blood purifier. It's not a secret remedy for its ingredients are printed on the wrapper. Start to take it to-day and before another day has passed, the impurities of the blood will begin to leave your body through the liver, kidneys, bowels and skin, and in a few days you will know by your steadier nerves, firmer step, keener mind, brighter eyes and clearer skin that the bad blood is passing out, and new, rich, pure blood is filling your veins and arteries.

The same good blood will cause pimples, acne, eczema and all skin eruptions to dry up and disappear. Dr. Pierce's Golden Medical Discovery is the helpful remedy that nearly every one needs. It contains no alcohol or narcotics of any kind.—Advertisement.

## HEPTASOPHS TO VISIT LODGE

All the convalesces of Harrisburg and vicinity of the Improved Order of Heptasoph have appointed a booster committee and will go in a body with fellow-lodgemen to pay a visit to West Fairview Convalesce, Tuesday, December 1. The committee with fellow Heptasophs, will meet at Market Square Tuesday night, December 1, at 7:45, and go in a body to Heptasoph Hall, West Fairview.

## TO DIVIDE 11TH WARD INTO FOUR PRECINCTS

Too Many Voters to Be Handled in Two Precincts; Propose New Arrangements

Owing to the large registration in the Eleventh Ward it has been found necessary to add two precincts to that territory. A meeting of the Board of Election Commissioners on Tuesday, December 22, 1914, the total registration was 391 voters—517 in the First Precinct and 474 in the Second Precinct. At the November election, 475 votes were polled in the First Precinct and 443 in the Second Precinct.

The present division is: First Precinct, Kelter street to Delaware avenue and Front to Sixth street; Second Precinct, Delaware avenue to Macly street and Front to Sixth street. It is now proposed to create four precincts, as follows:

First: Front street to Logan avenue and Kelter street to Delaware avenue.

Second: Logan avenue to Sixth street and Kelter street to Delaware avenue.

Third: Front street to Logan or Orange street, and Delaware to Macly street.

Fourth: Logan or Orange street to Sixth street and Delaware to Macly street.

This arrangement would embrace the following figures:

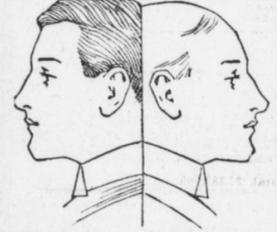

First Precinct: 300 dwelling houses, 282 registered voters.

Second Precinct: 260 dwelling houses, 255 registered voters.

Third Precinct: 207 dwelling houses, 240 registered voters.

Fourth Precinct: 277 dwelling houses, 232 registered voters.

## Shall It Be Hair or No Hair

## Its Your Choice Cuticura Soap

Shampoos and light dressings of Cuticura Ointment clear the scalp of dandruff, allay itching and irritation, and promote hair-growing conditions in most cases of premature loss of hair.

## STOUGH-AULHOUSE WEDDING

Miss Irene May Aulhouse is bride of William A. Stough

Mechanicsburg, Pa., Nov. 28.—The marriage of Miss Irene May Aulhouse, daughter of Mr. and Mrs. Andrew Aulhouse, of Williamsport, Pa., and William A. Stough, was solemnized at the bride's home by the Rev. E. C. Castle, pastor of the First United Brethren Church Thursday. The wedding march was played by Joseph Connelly, of Harrisburg, cousin of the bride. Miss Anna Firestone, of Camp Hill, a cousin, was maid of honor and Miss Mildred Connelly, of Harrisburg, was bridesmaid. The best man was Francis Simmons, of Lenoxye. A wedding dinner was served to about seventy-five guests from Harrisburg, Carlisle, Martinsburg, Shiremanstown, Leominster, Camp Hill, Dillsburg, Beavertown and Mechanicsburg. Mr. and Mrs. Stough will reside in Mechanicsburg. The wedding took place on the twenty-eighth anniversary of the marriage of Mr. and Mrs. Aulhouse and was a double celebration.

## Coal For the Turkey Dinner

The day of all days when the range should be on its best behavior—when the fire must burn evenly to brown the turkey just right for the Thanksgiving dinner.

Kelley's range coal will produce a happy result in the kitchen on this and all other days.

All pea, nut, pea and nut or any mixture desired.

Kelley's for a good cooked dinner!

## WINS MECHANICSBURG BRIDE

John K. Lenker and Miss Beulah L. Mountz Married

Mechanicsburg, Pa., Nov. 28.—A quiet wedding was solemnized on Wednesday evening at 6 o'clock at the home of Mr. and Mrs. S. J. Mountz, when their daughter, Miss Beulah L. Mountz, was united in marriage to John K. Lenker, of Harrisburg, victor in a marriage. The Rev. E. Victor Rolland, pastor of Emanuel Lutheran Church, Harrisburg, officiated. A wedding supper was served at the home of the bride. The immediate families of the young couple. The bride is an employee of the Moorhead Knitting Mill at Harrisburg. Mr. Lenker is connected with the Morton Automobile Works in Harrisburg. They will reside in that city.

## Miss Fairfax Answers Queries

NOT A SUITABLE MATCH.

DEAR MISS FAIRFAX:

I am a young man of twenty-one and in love with a widow of forty. I am a poor clerk, while she has a fortune, left her by her late husband. She has promised to set me up in business, saying that we can be married before winter.

My parents, because they do not believe I love her, but I do. Please advise me. TOMMY J.

You are young enough to be the son of the woman you are considering making your wife. She would despise you before long for letting her money establish you in business. And you would hate her for having "bought you." This marriage could not bring lasting happiness to either of you. Work your own way in the world; marry a young girl who are able to take care of some day.

## TOO MUCH OF A RISK.

DEAR MISS FAIRFAX:

Several weeks ago I met a young lady I admired; since then my admiration has turned to the most sincere love. She is just the sort of girl I desire for my wife. My mother has met her and is of the same opinion. She is about five years my senior. I have told her of my love, also that I would not be in a position to marry for at least five years. She thinks that by the time I am ready to marry, as she will be twenty-nine, I will have lost my mind, though I assure her that I will not. E. M.

The girl who waits five years for a man runs a risk of losing her love and her youth together. You can give no real assurance of how you will feel five years from now, and as simple mathematics shows you to be sixteen years old now, I do not think you are stable enough to be at all sure of yourself. The affair seems to me to be most inadvisable.

Some Women—Are as true as their straight hair and freckles, others more genuine than their marcel waves and ruby lips—and you can fool most of the men most of the time.

## It Makes Hens Lay

### Pratts' Poultry Regulator

Gets the laying hens into the egg-a-day class and starts up the lazy ones. Puts life and vigor into the whole flock and gives a healthy relish to the feed.

Costs but a trifle—the extra eggs pay for it many times over. Come in and let us prove to you that it will make hens lay. If it fails, we will give you your money back. 25-lb. pail only \$2.50. In packages at 25c., 50c. and \$1.00.
