This Frees Your Skin From Hair or Fuzz

(Toilet Tips) The method here suggested for the removal of superfluous hair is quick and certain and unless the growth is extremely stubborn a single application will do the work. Use a stiff paste with some powdered delatone and water; apply this to the hairy surface, and after about 2 minutes rub it off, wash the area and the hair is gone. To avoid disappointment, be sure your druggist sells you delatone.—Advertisement.
