Taft Praises President For Neutrality Stand
Special to The Telegraph
Madison, Wis., May 7.—Commending President Wilson for the policy of neutrality "which he has so conscientiously followed"; declaring against a change in the present international rule which would prohibit neutrals furnishing foodstuffs and ammunition to belligerents and urging an arbitral court of the greater nations which would make war in the future impossible, former President W. H. Taft yesterday addressed the Wisconsin legislature.
Referring to the war, the ex-President said: "We are in a state of anxious expectancy—a state of sorrow. For a time we are enjoying a feverish activity in many branches of industry. We must take care that we are not overjoyful and misled—that all of this is real prosperity."
"We have been criticized for the sale of arms and ammunition permitted under the international rules. The rule has always been that neutrals could furnish arms and foodstuffs. As a nation we should not place ourselves at a disadvantage and take an opposite view of this question."
"We are always unprepared for war. We must always expect aid from neutrals in case of war. It would be an unwise policy in my judgment for us to change the rule."
