LUSITANIA'S SINKING JUSTIFIABLE SAYS GERMAN SOCIETY PRESIDENT

Edward Moeslein Declares Americans Knew Gunarder Was Playing Tricks and Carried Ammunition

Although admitting that it would have no effect on the ultimate result of the war, Edward Moeslein, president of the German Relief Society, of this city, and local distributor of "iron rings," believes that the sinking of the British liner Lusitania by a German torpedo was justifiable.

"Every person who sailed on the Lusitania knew that they were sailing into danger. They had been warned four days before the boat sailed not to go. They knew, too, that the Lusitania had been playing some bad tricks on the sea. They knew that she carried arms and ammunition for the foes of Germany."

This Invention For Rupture Sent on 60 Days' Trial

Won't Cost You A Cent If the Two Months' Test Doesn't Prove All Our Claims

Way With Worthless Trusses Like These

You can make a thorough prove-it-to-you test of this guaranteed rupture holder without having to risk a single cent.

We'll send it to you for sixty days' trial—practically lend it to you that long just to let you see for yourself how it takes all the misery out of being ruptured.

It doesn't keep your rupture from coming out or bothering you in any way—in spite of any work you do or any other strains—then it won't cost you a penny.

The Only Thing Good Enough To Stand Such A Test

A mere try-on—like at a drugstore—can't possibly prove whether a truss or anything else for rupture is going to do you any good.

Neither is just a few days' trial a safe test. A truss may seem alright the first week or so and then prove utterly worthless.

But you can't possibly make a mistake after sixty days' trial.

And there is only one thing of any kind for rupture that you can get on such a long trial.

Only one thing good enough to stand such a long and thorough test—That is our guaranteed rupture holder—the famous Clute Automatic Massaging Truss.

Made On New Principles

The Clute Truss is so radically different from everything else for rupture that it has received eighteen separate patents. Made on an absolutely new principle—far more than just a truss.

It has so thoroughly proved its merits in nearly 300,000 cases that surgeons in the U. S. Army and Navy and physicians in all parts of the world now recommend it instead of advising operation.

Will Save You From Operation

A rupture can't possibly be relieved—can't even be kept from growing worse—unless protected against all strains and constantly kept from coming out.

Next winter you will pay \$6.70 for the same size coal.

And then you are not sure of getting such good coal.

By a large margin we believe that the coal we are now selling is the greatest coal value in Harrisburg.

Though we know it is the best coal you can buy, we hesitate to call it such, because we know of many inferior kinds for which the same is claimed.

Naturally they cannot all be best. Exhaustive tests, comparisons and analysis showed us the kind that really stand among the first.
