

PUTTIN' a boy through college won't give him the ripe knowledge that only years can bring. But it'll fit him to use that knowledge better.

PUTTING tobacco through the mixing, shredding and packing machines is only one step in its "education."

Nature takes the big step—by ageing.

Nature demands two years for tobacco to mellow—to lose the "bite" (otherwise harshness) that is there with the strength.

In VELVET these two years are spent in sealed wooden casks, dated and stored with every care. Artificial processes do not remove the "bite." Nature's way—the VELVET way—is the only way.

Of course, the tobacco leaf itself must be specially grown and selected to get the full smoothness and fragrance. That's why VELVET is the pick of the Burley crop—the world's finest smoking leaf.

KEEP AWAY THOSE GRAY PAIRS WITH SAGE TEA

With Sulphur, it Restores Natural Dark Shade. Guaranteed. Sage Tea, combined with Sulphur, has been the favorite remedy for generations for darkening gray hair. Your grandmother made this compound herself, but you can save yourself the trouble and at the same time have a far more effective combination if you get from your druggist a 50c bottle of Sulpho-Sage. Local druggists say it contains all of the virtues of the good old-fashioned preparation plus other ingredients which are found to be of exceptional value. No matter how long you have been gray, Sulpho-Sage will bring back the rich, dark shade to the faded hair—will stimulate it to new life and leave it glossy, lustrous and youthful looking. It restores color naturally and evenly. It is entirely unlike hair stains or dyes, because they leave a dull, lustreless effect which tells what you are using. No more willow weepers! It promotes growth, and keeps new gray hairs from showing. These results are guaranteed or George A. Gorges, who sells and recommends Sulpho-Sage in Harrisburg, will give you back your money.—Advertisement.

The Dream

Young manhood, in Robert Plank personified, had just completed high school in a small town. The city beckoned. He would go to Harrisburg, a prosperous city, there carve a name and a career.

The Reality

Robert Plank did come to the city, and by dint of work and equipped with vigorous health secured a good position. A substitute for club life he secured through the following Classified Ad taken from the "Rooms and Board" classification of Telegraph Classified Ads.

EDUCATION BOARD HAS 2 VACANCIES

Governor Also Has Two Water Supply Commissioners to Appear to Complete List

Two vacancies now exist on the State Board of Education, one having been created by the appointment and confirmation of John S. Rilling, of Erie, as a member of the Public Service Commission and the other by the resignation early in the present Governor's term of David E. Oliver, the vice-chairman of the board. The board now consists of Dr. Nathan C. Schaeffer, Superintendent of Public Instruction, who is ex-officio chairman; Dr. W. C. Jacobs, of Philadelphia, who succeeded the Governor; Robert C. Shaw, Greensburg, just appointed; and James M. Coughlin, Wilkes-Barre, the last three constituting the three successful educators of high standing connected with the public school system of the Commonwealth, which the school code provides shall sit on the board. The other member is William Lauder, Riddlesburg. Messrs. Oliver and Rilling were members of the school code commission and of the first Board of Education. There are also two vacancies on the Water Supply Commission, each carrying a salary of \$3,000, which were not filled last week. These vacancies were caused by the death of John Birkinbine, the distinguished engineer, who was chairman of the commission from the time of its creation, and the resignation of Congressman-elect B. K. Focht. The name of Mr. Lauder has been heard in connection with the Focht vacancy.

OATS AREA JUMPS WITH PROSPECTS

Belief That There Will Be Heavy Demand For the War Causes Larger Planting

Prospects of a brisk demand for oats for the use of the draft animals and cavalry horses of the European armies are believed at the Capitol to be the cause for the increased acreage devoted to oats this Spring by the farmers of Pennsylvania. State reports show that 1,094,460 acres are devoted to oats this year, some land sown in wheat last Fall having been plowed under in April and sown with oats. The area given to oats is 2 per cent. greater than that in 1914.

An improvement of 2 per cent. over the condition on April 1 is reported in the May summary of the wheat crop prospects by the State bureau. The summary for April showed the crop is to be 88 per cent. as compared with an average for ten years. The May summary shows 90 per cent. The summary says: "The weather during April was favorable and our estimate for May 1 shows an improvement of 2 per cent. This indicates that the yield per acre will be approximately 15 bushels. The crop will probably be governed by weather conditions in May. In some sections of the State a small percentage of the wheat was abandoned and the ground seeded with corn and oats. The June report will show the approximate area of wheat plowed down. The yield last year was approximately 18.5 bushels per acre. The rye conditions are 92 per cent. of an average at this season of the year and estimates for fruits are from 90 to 93 per cent. About 27 per cent. of the farmers are spraying orchards. The average date of starting sowing oats was April 12, although in some of

MR. AND MRS. ROBERT GREEN CELEBRATE ANNIVERSARY

The fifty-third wedding anniversary of Mr. and Mrs. Robert B. Green was quietly celebrated yesterday at their home, 1018 South Cameron street, with most of their family in attendance. There are five sons and three daughters, twenty-three grandchildren and five great-grandchildren. Mr. Green is a Civil War veteran.
