Weather Has Been Good For Crops, Says Report

Reports received at the local weather bureau, from the Department of Agriculture, at Washington, show favorable crop conditions. The report for the week ending yesterday for Pennsylvania, says: "The weather and temperature conditions were favorable for farm work of all kinds, and for the growth and development of crops. The rains were light to moderate, but sufficient for all needs. Oats harvest has begun, with prospects for unusually large yields. Wheat is mostly in stack or in the barns. "The yields will be up to or slightly above the average except in some of the southeastern counties, where there was much damage by Hessian flies. Corn is in good condition, except second plantings which are somewhat late, and about one-half of the fields have been cultivated for the last time. Potatoes are extra fine, and the largest crop for years. Fall damaged tobacco in some parts of Lancaster county, but not extensively or seriously."

stirring exhibition of horsemanship, discipline and drill. It was as pretty a spectacle as has been witnessed here at any camp. The cavalry from the three states were marched from camp to the main parade grounds by different routes and assembled in a great hollow square, facing inward, its sides at least 1,500 feet apart. The men were then dismounted and allowed to rest while troops I and L of the Fifth Cavalry rode into the center of the immense field and gave their demonstration. They first went through an elaborate drill as single troops, then joined and proceeded as a provisional squadron. For nearly one hour they walked, trotted and galloped, wheeled, turned, broke into squads, came back into line, deployed as skirmishers, reformed in a solid phalanx and carried out all the intricate formations and evolutions possible to such a small body of troops. After the drill the militia square was broken up and the various troops proceeded with their morning's work of

WHEN SPRING COMES

Spring had wandered north to the Height-of-Land. The ice, honeycombed by the May sun, had already left a thousand lakes. Choked streams, whitening into cascades and wild rapids on their way to the sea, sang madly of soft days that June would bring. Birch ridges shimmered in pale green above valleys aflower, and the buds of willow and alder reddened the river shores while every breeze roamed heavy with wood odors. On spruce spire and balsam top the throats of thrush, warbler, and white-throat swelled with the joy of the young year. —From Scribner's.

Without exception, cooking authorities agree that deep frying not only is more healthful but more economical than shallow frying.

You can fry many foods in deep fat which you now fry in the pan or skillet.

With Crisco there is no smoke in the kitchen because Crisco reaches frying point without smoking. Test for proper heat with a bit of the food you are about to cook.

Use plenty of Crisco—about 3 lbs. on an average, so that the heat will not be reduced when the raw food is added bit by bit. There practically is no absorption if plenty of Crisco is used and the temperature kept high.

There is a great saving, because of the small amount absorbed and because you may use the same Crisco over and over. In fact, you can fry fish, onions and potatoes all in the same Crisco. Strain out the food particles after each frying.

A crisp, brown crust forms almost instantly. Then the inside bakes instead of soaks. Because of this fact and Crisco's vegetable origin, fried foods now are most wholesome. Here is an excellent recipe:

Potato Croquettes

(Level measurements)

2 pints mashed potatoes 2 tablespoonsful Crisco
2 eggs 1 tablespoonful chopped parsley
Salt, pepper and red pepper to taste

Mash potatoes by rubbing them through wire sieve with back of wooden spoon; dissolve Crisco, add it to potatoes with 1 of the eggs well beaten and seasonings. Mix and divide into 10 or 12 pieces, form them into neat croquettes, brush over with remaining beaten egg, toss in breadcrumbs, and fry in hot Crisco.
