TODAY'S BEAUTY HELPS

Nothing excites more criticism than a woman with her face all daubed with face powder in her desire to hide a fault or an aging skin. Instead of using powder, which clogs and enlarges the pores, it is far better to use a good face lotion that will improve and permanently benefit the skin. By dissolving four ounces of spumax in a half pint of hot water you can make an inexpensive lotion that will do wonders as a skin whitener and complexion beautifier. It removes all shininess, sallowness and roughness, and gives the skin a smooth, velvety tone, while it does not rub easily like powder, nor does it show on the skin. By washing the hair with a tea-spoonful of canthox dissolved in a cup of hot water, afterward rinsing thoroughly with clear water, one finds that it dries quickly and evenly, is unstrained, bright, soft and very fluffy, so fluffy, in fact, that it looks more abundant than it is and so soft that arranging it becomes a pleasure. This simple, inexpensive shampoo cleanses the hair and scalp thoroughly of all dandruff and dirt, and leaves a clean, wholesome feeling. All scalp irritation will disappear, and the hair will be brighter and glossier than ever before.

A UNIVERSAL FOOD. Following Nature's Footsteps. "I had a boy, two years old, weighing forty pounds and in perfect health who has been raised on Grape-Nuts and milk. This is an ideal food and evidently furnishes the elements necessary for a baby as well as for adults. We have used Grape-Nuts in large quantities, and greatly to our advantage." One advantage about Grape-Nuts food is that it is partially pre-digested in the process of manufacture. The starch contained in the wheat and barley is transformed into a form of sugar by the same method as this process is carried out in the human body, that is, by the use of moisture and long exposure to moderate warmth, which grows the diastase in the grains, and with long baking makes the remarkable change from starch to sugar. Therefore, the most delicate stomach can handle Grape-Nuts and the food is quickly absorbed into the blood and tissue, certain parts of it going directly to building and nourishing both body and brain. "There's a Reason." Name given by Postum Co., Battle Creek, Mich. Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

After missing scores of teams and autos they collided with the car of Earl Dietrich, wrecking the machine.

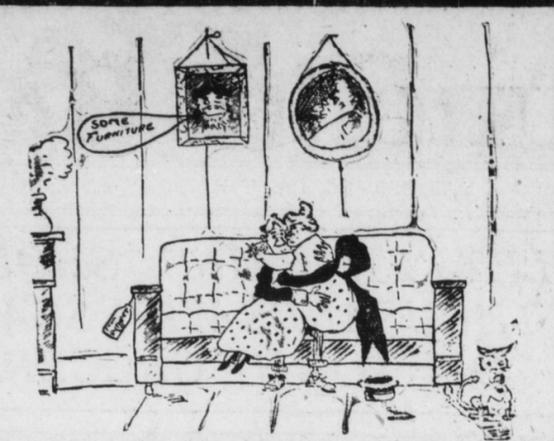

Sh!!! Don't Wake Him Up

I wish I was a rock a-sittin' on a hill. A-join' nothin' all day long. But just a-sittin' still. I wouldn't eat, I wouldn't sleep, I wouldn't even wash; I'd just sit there a thousand years. And rest myself, By-Gosh!

Just One Crack

At the fellow of small ambition above. That man who wished he was a rock a-sittin' on a hill, Would be a blessing to mankind. If he could keep that still. He couldn't cuss, He couldn't knock, He couldn't take up room. That's needed by the man who tries To make this old world boom.

They Didn't Fool Caruso!

Caruso went. But the "loud blast" arrangement didn't meet with his artistic approval. Moving over to a Victrola, he grasped the modifying doors, and opening and closing them he exclaimed: "That is the way to do what you are trying to do." It is desirable that you should be able to control the volume of sound and that is done by the modifying doors of the Victrola—no makeshift device is necessary. Everything that is best in talking-machine construction is incorporated in the Victrola. The modifying doors are among the numerous exclusive patented Victrola features, and with the Victor system of changeable needles they give you full control over the volume of sound without in any way interfering with the artist's interpretation. Come in and let us show you how easily they enable you to increase or diminish the volume of sound. Then you'll appreciate what a valuable feature this is—how much it adds to your enjoyment of the instrument. Victrolas \$15 to \$250. Victors \$10 to \$100. Easy terms to suit your convenience, if desired.

Efficiency the Keynote of Business Success

How the Efficiency of These Five Stores Makes for Savings to Purchasers of Furnishings

In these days of straining competition a business, to be successful, must consider very carefully each small detail of service and merchandising. The sum total of all this detail constitutes its highest efficiency. Germany, through this attention to detail, which they have carried to a very high degree, has won its place as a leading commercial world power. In merchandising one of the greatest details, at which this efficiency can be directed, is the buying end of the business. Quantity buying is an expression of efficiency because of the price advantages it offers. Through our five stores we are quantity buyers. In this respect we are efficient.
