A SMART COAT WITH WIDE BELT

A New Design With Plaits to Give the Fashionable Flare.

By MAY MANTON

8743 Child's Coat, 4 to 8 years.

The newest coats for little girls follow the general trend and are made with skirt portions full and flaring. This is a very charming one with a wide belt that is arranged in a distinctly new way. In the picture, the coat is made of gabardine and the trimming is velvet, while the bands and the belt are of white broadcloth and the combination of materials is as interesting as the design, but as a matter of course, this coat can be made of many different materials. Broadcloth is to be fashionable for the autumn and poplin weaves will be worn, velvet is always handsome for the later season and if something very dressy is wanted for between seasons, the model would be charming developed in white broadcloth or in white gabardine, whereas the blue coat is good for harder usage. For immediate wear, taffeta would be pretty made in this way with the collar and cuffs of the same, scalloped and, perhaps, with the belt of white broadcloth.

For the 6 year size will be required 4 1/2 yds. of material 27 in. wide, 3 1/2 yds. 36, 3 yds. 44 and 3/4 yd. 20 in. wide for the collar and cuffs and 1/4 yd. 50 for the belt and banding.

The pattern No. 8743 is cut in sizes from 4 to 8 years. It will be mailed to any address by the Fashion Department of this paper, on receipt of ten cents.

CITIES BUILT TO ORDER; BY FREDERIC J. HASKIN

[Continued from Page 6.]

fact that the highest efficiency of the worker can only be expected under the best living conditions.

Gary, Ind., built in the open on a prearranged plan, generally looked upon as the most efficiently organized industrial city in the world, is still less than ten years old. The first shacks for its construction gangs were thrown up in 1906. The founders wished to avoid the materialism which had proved so detrimental to the civic development of Pullman, one of the earliest preconceived industrial cities of the country, without falling to the hazard of which had developed so many inconveniences in all cities of the past.

The homes for the employees were built with the consideration for the health and comfort of the workers. They could be purchased upon easy terms if desired. The parks, streets, recreation centers and other adjuncts were well outlined. The public schools have been recognized as the best in the country, as is evidenced by the fact that New York city arranged last month for the construction of twelve schools after the Gary pattern. They are to be built and organized under the supervision of the city school superintendent, Dr. William Wirt.

Town planning has received so much attention within the past ten years that it is developing into a new profession and one that promises to be most remunerative. The obvious advantage of a brand new city, built up from the ground on a plan in harmony with the modern developments, over the city which was evolved from a small village in which sanitation, convenience and civic beauty were unthought of, has been recognized by a number of corporations in the selection of sites for manufacturing plants. The need of persons competent to plan new cities as well as to remodel old ones led the University of Pennsylvania to establish a course of city planning this year in connection with its summer school. The instruction for the present season will close next week. It has been under the direction of B. Antrim Haldeman, city engineer of Philadelphia; Carol Aronovitch and Bernard Newman, of the Philadelphia Housing Commission, and Professor James P. Lichtenberger, of the university.

A number of cities are now establishing commissions for the purpose of securing a definite plan suited to individual municipal need. New York recently established such a commission and the group of public buildings which are adding so materially to the efficiency and beauty of Cleveland were built from plans which recognized the peculiar and distinctive conditions of that city. Dallas and Galveston, Texas, Birmingham, Ala. and Reading, Pa., are among other cities which have recently adopted a definite plan upon which future improvement will be based.

The well organized plan provides for filling each municipal need with the greatest possible efficiency. Streets, parks, schools, hospitals, lighting, water supply and other civic amenities, are considered as service which the municipality must supply uniformly for its people. It must administer to their needs as well as their physical nature by giving them at all times an attractive environment. All of this service must be rendered at a minimum cost.

At a recent gathering of world-renowned architects Eduard Henard, architect for the city of Paris, presented a paper which included a number of novel suggestions as to the requirements in the city plan of the future. He prophesied that public service within the next quarter of the century will include many details not yet even under consideration. Most of these are to be supplied by tube and provisions for a perfect network of service tubes must be made in city planning. They would seriously interfere with present arrangements. Vacuum cleaning may be one of these, and it will require a pipe from every house for the pneumatic dust

The Center of Interest to the Public of Harrisburg Will Be The Largest Ready-to-Wear Department Store

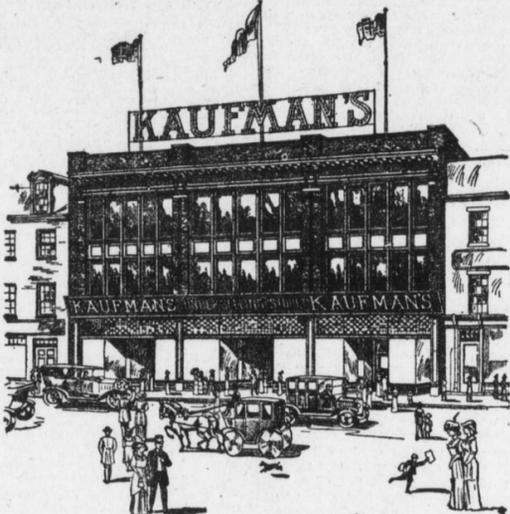

[In This Section of Pennsylvania]

Complete Stores of Dress Accessories

L. W. COOK

Newsies to Hold Outing at Good Hope Mills

The Harrisburg Newsboys' Association has completed arrangements for its first annual outing, to be held on Labor Day, at Good Hope Mills.

Everything known to cause fun and a good time has been included in the program for the newsboys' first big outing. The crowd will meet at 9 o'clock in the morning at the rooms of the association, 304 North Second street, and will leave on motor trucks for Good Hope Mills, where they will spend the day.

Prizes and "eats" to make the affair a success have been furnished by the merchants of the city. Although all the tickets have not been turned in yesterday, the officers expect to have a neat balance for the treasury when expenses have been paid. The committee in charge for the outing includes Michael Klawansky, chairman, Park Weaver, the Rev. E. P. Robinson, David Klawansky, Philip Bloom, J. Sharp and Arthur Kopolovitz.

FRIENDSHIP BRINGS HIM \$10,000

South Bethlehem, Pa., Sept. 1.—Rollin Benner, steward of the fashionable Northampton Club, is heir to \$10,000. Some years ago, while on a hunting trip to the Pocono Mountains, near Canadensis, Mr. Benner befriended a man named Turner, who owned 800 acres of woodland, well stocked with game. He died recently and bequeathed his estate to Mr. Benner.

Good Catches on First Day of Oyster Season

Special to The Telegraph
Port Norris, N. J., Sept. 2. — With the oyster season once more here, the great fleet of oyster boats hurried into Bivalve, Maurice River and Greenwich Piers yesterday afternoon with their big deck-loads. A few of the captains, who had rush orders for their product, got in earlier than the rest and shipped by train immediately, but the great majority of the oysters brought in have been put on the floats to get out of them and will be shipped to-day to all the markets of the East. Fully fifty carloads, probably more, will leave Bivalve and Maurice River to-day.

The oysters have not made remarkable growth during the Spring and summer, but they are fat and white and in excellent condition. Planters and shippers are looking forward to the best year they have had for a long time. The parasites known as the bore does not seem to have done as much damage to the oysters as usual, and those whose planting has escaped the ravages of the drumfish have cause to rejoice.

MCADOO NOT A GOVERNMENTAL CANDIDATE

Special to The Telegraph
Washington, D. C., Sept. 2. — Secretary McAdoo of the Treasury has no thought of becoming a candidate for the Democratic nomination for Governor of New York. A publisher reports that he was sympathetically watching a movement with this purpose in view caused amusement at the Treasury Department yesterday. Mr. McAdoo's friends said the report was "pure buncombe." Mr. McAdoo understands and is perfectly content with his present position.

The Best Remedy For All Ages

The directions with every box are very valuable—especially to women.

Roosevelt Is Pleased, but He Has His Doubts

Special to The Telegraph

Oyster Bay, N. Y., Sept. 2. — Colonel Roosevelt, when seen at his home at Sagamore Hill, said he was pleased to learn of recent developments regarding the attitude of Germany. He made this statement:

"On its face, this appears to be most gratifying, and if the acts of the Germans bear it out and suitable amendments are made for the lives lost in the Lusitania, Falaba and similar cases, and if there is no provision expressed or implied as to action on our part such as was requested by Germany before—regarding England and France—the result will be in every way satisfactory.

"I wish to call attention, however, to the fact that this is in no sense a concession from Germany, as it has been styled in some of the newspapers. It is an announcement that she intends to stop the policy of assassination.

"To stop such a policy establishes no claim of gratitude. I take it for granted there will be most ample amendments, so far as such amendments are possible, not only for the property loss, but for the lives of American men, women and children who have been assassinated during the four months and over, while the policy has been carried out."

Overland-Harrisburg Co. Has Leased Display Room

The storeroom at 212 North Second street has been leased by the Overland-Harrisburg Company and will be used as a showroom in which to display the various models and as a headquarters for this district. The room is 160x21 feet, the rear door of which leads directly into the Overland service station, which fronts on Cranberry street. This makes a convenient arrangement, as cars may be run direct from the display room into the service station and permits all mechanical facilities directly adjoining the main office and showroom. The service station has

Von Tirpitz Reported Ill; Will Suspend His Activity

Special to The Telegraph

London, Sept. 2. — A dispatch to the Exchange Telegraph from Amsterdam says reports received there from Berlin are to the effect that Admiral von Tirpitz, the German Minister of Marine, is ill from overwork and exhaustion, and on the advice of his physician intends to leave Berlin for a holiday, which will extend over several weeks.
