RECOVERY FROM GRIP

The form of influenza popularly called grip lasts but a short time, is seldom fatal, but causes suffering and misery out of all proportion to its importance.

The reason is this: When the acute stage of the grip is passed there often remains a neurosis that persists for months if not properly corrected. The patient is moody, in poor spirits, suffers lack of appetite and vigor and feels indisposed to work or even to enjoy life. Warmth and quiet alone give comfort and these not for long at a time. Sleep is restless and does not refresh the nerves, which are always at high tension.

Try to correct this after-effect of the grip by building up the blood, and there is no better blood builder than Dr. Williams' Pink Pills. As soon as the revitalized blood courses through the system you are aware of its soothing influence. Gradually the color returns to the pale cheeks, appetite and digestion improve and you are on the road to health.

The free book, "Building Up the Blood," contains a chapter on the after-effects of the grip. Send now for a copy to the Dr. Williams' Medicine Co., Schenectady, N. Y. You can get Dr. Williams' Pink Pills at the nearest drug store or by mail on receipt of price, 50 cents per box; six boxes \$2.50.—Advertisement.
