WOMEN CAN HARDLY BELIEVE

How Mrs. Hurley Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Eldon, Mo. — "I was troubled with displacement, inflammation and female weakness. For two years I could not stand on my feet long at a time and I could not walk two blocks without enduring cutting and drawing pains down my right side which increased every month. I have been at that time purple in the face and would walk the floor. I could not lie down or sit still sometimes for a day and a night at a time. I was nervous, and had very little appetite, no ambition, melancholy, and often felt as though I had not a friend in the world. After I had tried most every female remedy without success, my mother-in-law advised me to take Lydia E. Pinkham's Vegetable Compound. I did so and gained in strength every day. I have now no trouble in any way and highly praise your medicine. It advertises itself."—Mrs. S. T. HURLEY, Eldon, Missouri.

Remember, the remedy which did this was Lydia E. Pinkham's Vegetable Compound. For sale everywhere.

It has helped thousands of women who have been troubled with displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, that bearing down feeling, indigestion, and nervous prostration, after all other means have failed. Why don't you try it? Lydia E. Pinkham Medicine Co., Lynn, Mass.

COLLEGE ATHLETES MUST TAKE CARE

Dr. Dixon Says Overindulgence in Athletics Is Bad For Folks in Later Years

College athletics are all right in their way, but people should take care not to allow habits formed in sport at college or High school to work into their daily life. Proper exercise is essential, but there is danger of over-strain. This is the opinion of Commissioner of Health Dixon. In one of his hygiene talks Dr. Dixon says: "Many a boy and girl entering college dreams not alone of success as students, but are anxious to gain recognition for athletic achievements. To warn the young is like casting water on burning oil and yet it were well for the students who contemplate severe training to seriously consider as far as possible their probable occupation through life and if it is to be sedentary they should refrain from hard competitive athletics which will develop the muscles to a degree that cannot be kept up by the successful lawyer, doctor, teacher, or the majority of those engaged in business. Over-training in youth is almost certain to result in physical deterioration in after years. The full value of athletics is obtained by the individual who achieves a rational all-around development. Such a training is far more apt to stimulate one in after life to continue those athletic exercises which are available in the business and professional man or woman. No occupation should prevent the student or the professional man from taking a reasonable amount of outdoor exercise daily. If nothing else a good swinging walk, say five to ten miles a day in the open air will always prove beneficial not only during youth but to a less degree in old age. The young woman who goes in for athletics should be particularly careful. If indulged in to a reasonable extent under the supervision of a properly trained director of athletics, exercises and sports of a not too violent character will be a benefit. Over-exertion is apt to incur a serious penalty with either sex but is perhaps more harmful for women than men. The fact should be kept in mind that exercise is a means to an end and properly indulged in it should stimulate the body and re-act healthily on the process of the brain. For the college man or woman this is the practical side of athletics and the one which should be kept in mind."
