New-Plan Corn Remedy That Never Fails. The Simple, Common Sense Way.

You poor corn-limpers, with corn-wrinkles and heart-pains. Sit down to-night and put a few drops of "Gets-It," the simplest corn remedy in the world, on your corns. You can apply it in just a few seconds, without fuss

"Gets-It" Ends Corn Pains. It's Sure and Safe, too! or trouble. What's the use applying salves that make toes raw and sore, that make corns swell, bandages that make it misery to walk, tape that sticks, greasy ointment, and other contraptions. Get rid of corns the easy way, quick, simple, sure. New way. That's common sense. Try "Gets-It." It can't hurt—the corn loosens, and comes right off—clean off.

"Railroad buying is becoming a real factor just as reports of car shortages are coming up in the Middle West. Orders have been placed this week for 4,000 cars, chiefly for the New York Central, 15,000 to 20,000 cars are under inquiry, including 10,000 for an important trunk line.

"The New York Central has ordered 120,000 tons of rails for 1915, of which 55,000 tons were for the Illinois Steel Company, 55,000 tons to the Lackawanna Steel Company and 10,000 tons to the Cambria Steel Company. The Burlington ordered 15,000 tons and Seaboard Air Line 9,000 tons. The September rail bookings of the Steel Corporation have been about 140,000 tons.

"Steel billets for rolling and forging are commanding premiums of \$2 to \$3 a ton for early delivery. In the Central West forging billets are sold up to \$29, Pittsburgh mill. With the scarcity of steel so pronounced, no open-hearth capacity is being rushed to completion."

LARGER COMBINE Baldwin and Cambria May Be Parts of Huge Corporation Now Said to Be Forming

Talk of a still larger steel combination is now heard in industrial circles. It is now intimated that the Baldwin Locomotive Works will probably be merged with the Midvale Steel Company, according to statements made yesterday by bankers close to those who are carrying on the negotiations.

Reports are circulated that the new combination, of which Midvale is to form the nucleus, proposes to manufacture nothing but munitions so long as the European war demands lasts. Questioned on this point, the Midvale people do not commit themselves, saying that this was no time to disclose their plans.

Whatever the outcome of the negotiations, now generally conceded to be in progress for a merger in one combination or another, of the various steel plants, the financial district was satisfied yesterday that the Baldwin will play an important part in one of the deals.

Whether or not Cambria Steel is to be included in the Baldwin-Midvale merger, there has been a sudden shifting of certain plans that brought President Donner back to Philadelphia from New York yesterday, for it was stated at his office on Monday that he had gone off on a trip, presumably to look over the Lake Superior ore lands with President Clark, of the Cambria. At any rate, he was back in Philadelphia yesterday, and held a long session with E. F. Morris, of the best information is that Donner was negotiating for the execution of the balance of his option on the Pennsylvania Company's holdings of Cambria Steel. It was learned that up until yesterday Donner had only taken over only 50,000 of the 450,082 shares covered by his option. When asked as to when some official information regarding the Cambria deal might be expected, Morris said that Donner was not yet ready to make an announcement. From other sources the information was obtained that the news will be given out this week.
