Thin Men and Women

DO YOU WANT TO GET FAT AND BE STRONG? The trouble with most thin folks who wish to gain weight is that they insist on drugging their stomach or stuffing it with greasy foods; rubbing on useless "flesh creams," or following some foolish physical culture stunt, while the real cause of thinness goes untouched. You cannot get fat until your digestive tract properly assimilates the food you eat.

There is a preparation known to reliable druggists almost everywhere, which seemingly embodies the missing elements needed by the digestive organs to help them convert food into rich, fat-laden blood. This preparation is called Sargol and such remarkable testimony is given as to its successful

use in flesh building. Sargol, which comes in the form of a small nutritious tablet, taken with meals and mixing with the digesting food, tends to prepare its fat, flesh and muscle building elements so that the blood can readily accept and carry them to the starved portions of the body. You can readily picture the transformation that additional and previously lacking flesh-making material should bring with your cheeks filling out, hollows about your neck, shoulders and bust disappearing and your taking on from 10 to 20 pounds of solid, healthy flesh. Sargol is harmless, inexpensive, efficient. George A. Gorgas and other leading druggists of this vicinity have it and are authorized to refund your money if weight increase is not obtained as per the guarantee found in each large package.

NOTE: Sargol is recommended only as a flesh builder and while excellent results in cases of nervous indigestion, etc., have been reported, care should be taken about using it unless a gain of weight is desired.—Advertisement.
