EVERY THREE MINUTES ONE DIES IN THE U. S.

The Anti-Tuberculosis Society illustrates the frightful toll of consumption by extinguishing a light every three minutes, and shows that it is the man or woman, girl or boy, who neglects colds, whose blood is impure, who feels weak and languid, who is the very one to contract tuberculosis—and none are immune.

During changing seasons, or after sickness, blood-quality is most important, and if you and your family will take Scott's Emulsion after meals it will charge your blood with health-sustaining richness, quicken circulation, and strengthen both lungs and throat.

Scott's is free from alcohol—easy to take—it cannot harm. Get a bottle to-day. Scott & Bowne, Bloomfield, N. J. 15-25

ENLARGING THE WORLD

By Frederic J. Haskin

would doubtless have been in course of preparation now, if the European war had not interfered with certain expeditions.

Much Unexplored Land

Polar exploration is not the most important to the world's progress, although the knowledge it affords of glaciology, meteorology, geology and terrestrial magnetism gives it a high practical value. There are millions of square miles of unexplored country in more temperate zones, however, which are of greater importance.

Europe is the only country in the world which possesses no unexplored land. North America comes next, although half a century ago, North America as a whole was no better than Africa to-day. Thousands of miles of its northern portions are still unknown except to a few Indian trappers.

The European War has materially interfered with exploring expeditions in every country. In a letter to the National Geographic Society last week Sir Douglas Mawson intimated the possibility of joining the army as several of his comrades have done. Major Fawcett, the leader of an important expedition to the north Amazon valley, is reported to have fallen in battle. The French and Italian explorations in the interior of Tripoli and the Lake Tchad region have been abandoned, as have several British expeditions into the northern Himalayas and the South Sea Islands.
