Getting Rid of Blackheads, And Other Aids to Beauty

There is one simple, safe and sure way that never fails to get rid of blackheads and that is to dissolve them. To do this get about two ounces of plain powdered norexin from any drug store. Sprinkle a little on a hot, wet sponge, rub over the blackheads, wring dry thoroughly, and you will be surprised how the blackheads have disappeared. Blackheads are simply a mixture of dust and dirt and secretions from the body that form in the pores of the skin. Pinching and squeezing only cause irritation, make large pores and current get them out after they become hard. Let the powdered norexin and the water simply dissolve the blackheads as they were formed, leaving the pores free and clean and in their natural condition.
