

HOW SHE ENDED TEN YEARS OF SKIN-TORTURE

If you have an itching, burning, unsightly skin-trouble, you can imagine the feeling of Mrs. C. C. Roberts, when she wrote—"I had eczema on my face for ten years. Little red pimples formed in a small spot on my chin and then spread all over my face. They itched and burned me awfully. It was certainly embarrassing to me. And I would not be amongst people. I tried almost every remedy and treatment that could be used for this trouble, but nothing did me any good. I used Resinol Ointment and Resinol Soap and was relieved in a day or two. In one month I was cured. This was six months ago and the trouble has never returned."

Penna. Operators Ready to Concede Mine Run Demand

New York, Feb. 25.—The United Mine Workers from the central competitive bituminous coal fields, having been given an intimation that the Western Pennsylvania operators are ready to concede the mine run demand on certain conditions, went into caucus to-day to draft a tentative rate of wages on the run of mine basis to be submitted to the mine owners.

FIVE MINUTES! NO GAS, INDIGESTION OR ACID STOMACH

Instant relief from sourness, heartburn, headache, dyspepsia. "Pape's Diapepsin" is quickest and surest stomach relief known.

Why not get some now—this moment, and forever rid yourself of stomach trouble and indigestion? A dieted stomach gets the blues and rumbles. Give it a good eat, then take Pape's Diapepsin to start the digestive juices working. There will be no dyspepsia or belching of gas or eructations of undigested food; no feeling like a lump of lead in the stomach or heartburn, sick headache and dizziness, and your food will not ferment and poison your breath with nauseous odors.

Pape's Diapepsin costs only 50 cents for a large case at any drug store here, and will relieve the most obstinate case of indigestion and upset stomach in five minutes.

There is nothing else better to take gas from the stomach and cleanse the stomach and intestines, and, besides, one single dose will digest and prepare for assimilation into the blood all your food the same as a sound, healthy stomach would do.

When Diapepsin works, your stomach rests—gets itself in order, cleans up—and then you feel like eating when you come to the table, and what you eat will do you good.

Absolute relief from all stomach misery is waiting for you as soon as you decide to take a little Diapepsin. Tell your druggist that you want Pape's Diapepsin, because you want to become thoroughly cured this time.

Remember, if your stomach feels out-of-order, and uncomfortable now you can get relief in five minutes.—Advertisement.

SAYS BODY IS A POISON FACTORY

Urges everyone to drink glass of hot water before breakfast

Just as coal, when it burns, leaves behind a certain amount of combustible material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste, toxins and poison-like poisons are found and sucked into the blood.

Men and women who can't get feeling right must begin to take inside baths. Before eating breakfast each morning drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash out of the thirty feet of bowels the previous day's accumulation of poisons and toxins and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, backache, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the drug store, and begin practicing internal sanitation. This will cost very little, but is sufficient to make anyone an enthusiast on the subject.

Remember inside bathing is more important than outside bathing, because the skin pores do not absorb impurities into the blood, causing poor health, while the bowels pores do. Just as soap and hot water cleanse, sweetens and freshens the skin, so hot water and limestone phosphate act on the stomach, liver, kidneys and bowels.—Advertisement.

Eczema Is Conquered

Greasy salves and ointments should not be applied if good clear skin is wanted. From any druggist for 25c or \$1.00 for extra large size, get a bottle of Zemo. When applied as directed, it effectively removes eczema, quickly stops itching, and heals skin trouble, also sores, burns, wounds and chafing. It penetrates to the bottom of the case. Zemo is dependable and inexpensive. Try it, as we believe nothing you have ever used is as effective and satisfying.

Zemo, Cleveland.

FOODS THEY BUILD OR DESTROY

Amazing but Rarely Suspected Truths About the Things You Eat.

(Copyright, 1916, by Alfred W. McCann.)

CHAPTER 24 Modern commercialism puts putrefactive foods into the human body and then by refining food takes away many of the instruments with which nature fights these putrefactive products.

Babies and small children are handicapped if their parents or nurses neglect the meaning of the thyroid gland. Animals cannot live without the thyroid gland under certain conditions, and yet one of the elements necessary to the normal, healthy thyroid in child or adult is deliberately removed from the diet every day.

The ordinary grains of the field, barley, rice, wheat and rye, contain normal traces of iodine before they are refined, but there is not a chemist in the country who can discover a trace of this indispensable food mineral in a ton of refined white bread, biscuits, crackers, cakes, table syrups, cornstarch, tapioca, glucose, or sugar candy or in any of the other denatured foods which man is now striving to sustain a normal body under such dreadful handicaps.

The food mineral iodine is wasted with many of the other food minerals natural to normal food and it is only through the refining process which is reported here that the human family ever obtains a hint of the wonderful intricacy and profundity of nature's process.

The thyroid gland is a protecting policeman on guard in the human body. The young child eating food unnatural to its requirements possesses no such police protection. It lives in a state of physical anarchy. Excess meat in the diet affects not only the thyroid but the liver as well.

In the ingenious experiment conducted by Eck a ligature was applied to the portal vein leading to the liver, thus cutting off the liver from the portal circuit of a dog. It was found that a dog thus treated died in three days when fed upon meat, whereas animals which ate grass, clover and milk lived in excellent health for an indefinite length of time, notwithstanding the cutting off of its liver function.

Father showed that the liver has three times as much work to do on a meat diet as on a meatless diet.

According to Bryce, flesh foods, at the time they are consumed, contain on an average of 200,000,000 putrefactive bacteria in every gram. But he shows that nature has not left us to the tender mercies of these poison-producers. This is proved by the fact that auto-intoxication does not disturb the normal health, all of whose organs and glands, including the thyroid, either by good fortune or by the exercise of intelligent discretion are normally nursing children, enabling them to carry on their normal functioning.

The people of America are consuming more meat than any other nation in the world, and whether they know it or not they are consuming meat and meat products that have entered into advanced stages of putrefaction. The requirements of the human body are normally satisfied by cases of ptomaine poisoning to canned tomatoes, condensed milk, trucked beef, cheese sandwiches, and other foods. The real truth is never suspected. In twenty-six months I was able to

SOCIAL (Other Personals on Page 8.)

CARDS WITH MRS. SINGER AT "THE OAKS" IN DAUPHIN

Mrs. Wayne Singer of "The Oaks," Dauphin, will entertain at cards, Saturday evening at her home. The guests will include Miss Anna Hoffman, Miss Carrie Gerberich, Miss Anna Houck, Miss Esther Shaffer, Miss Sabra Clark, Miss Ora Bickel, Charles Gerberich, Ray Hoffman, Blon Welker, Edgar Forney, Walter Shaffer and Ernest Shaffer.

Derry St. Men's Class Entertained at Social

Two hundred and fifty members of the Men's Bible Class of Derry Street United Brethren Church, their wives and sweethearts, last night attended a Washington's Birthday social in the social rooms of the church, Fifteenth and Derry streets.

One of the interesting features of the evening was the introduction to the members of the class officers and executive committee by O. P. Beckley, one of the teachers. Each man appeared in a frame draped with the American emblem under a bright spotlight. A piano solo by Charles Mackey, a bass solo by Roy Mathias, orchestral music under the direction of Earle E. Renn and several interesting get-together numbers closed the evening's entertainment, which ended with refreshments. The social was arranged by a committee under the chairmanship of Raymond Gilbert.

COMPLIMENTARY PARTY

In honor of Charles E. Flue, Mr. and Mrs. Frank R. Fensel entertained at their home in New Cumberland last evening. Among those present were Mr. and Mrs. John C. Stine, Elmer C. Flue, Earl Ross, Charles E. Flue, Ray K. Lechtaler and the Misses Mae E. Flue, Sylvia Kaufman, Lillian E. Grove, Lillie A. Crumlik.

Mr. Henry McCormick and Miss Ann McCormick are going to Florida early in March for an extended stay.

Mr. and Mrs. John C. Stine, of the Reynolds, are home after a three months' stay in Wernersville owing to Mr. Stine's health.

Mr. Otto J. Buxbaum, of North Second street, who underwent an operation at the Harrisburg Hospital, is as comfortable as can be expected.

Miss Jennie Dull and her brothers, Charles and Daniel M. Dull, are going for a pleasure trip to Nassau.

Mrs. James Fry Bullitt and Miss Margaret Bullitt, of Bellevue Park, are spending a day or two in Philadelphia. Mr. and Mrs. Stanley C. Smith, of 1605 Green street, attended the dance of Zemo Temple at the hotel New Brunswick, Lancaster, Wednesday evening.

Ho, For Twenty-three at This Celebration

Mr. and Mrs. W. J. Meck entertained at a stag party in celebration of the twenty-third birthday of their son, Edward Meck. The figure "23" figured largely in the event, as it was the age of the host, the day of the month and number of the guests. The supper table bore a large birthday cake adorned with twenty-three tiny flags.

In attendance were H. W. Keitel,

obtain forty-seven convictions in the courts against meat packers, sausage manufacturers, and wholesale provision merchants for selling deodorized rotten meats and meat products, chemically treated, so as to disguise from the unsuspecting purchaser their true condition.

I have also obtained the removal from office of veterinarians, and inspectors in the employ of health departments and of the Bureau of Animal Industry for intruding with corruption through the assistance given by them to influential but conscienceless food packers who have not headed the laws of life in their pursuit of dollars.

The details of these convictions, shocking in the extreme, are a matter of court record. In the meantime, even when the meat is honest, fresh, wholesome, and cut from carcasses of animals that have been free from infectious and contagious diseases at the time of their slaughter, it requires normal organs to dispose of it properly.

These normal organs require the elements found in natural food to keep them normal. Modern commercialism helps to put putrefactive products into the human body and then by refining food takes away many of the tools with which nature fights these putrefactive bodies.

The thyroid gland and the many other physical organs follow a disturbing of its functions help to emphasize the necessity in the diet of every individual, adult or child, of the food minerals which should show you are squandered by modern civilization with a reckless abandon never equaled by savages.

Springtime is the season of high spirits in nature. Man alone in the Spring complains of lassitude. All around him under the action of nature's unmoisted law he witnesses the miracle of rising sap, the quickening strength that swells the sap, the compelling energy that forces the spear of grass to lift itself upward through the power and mastery, the sparkle and glow, the warmth and buoyancy of Spring, yet just as the earth has the green grass in its depths so has he the freshening of his blood.

Man contracts the weariness which he the freest nature in his heart. He is just as much a part of nature; nature's law grips him just as tightly in his grasp. He needs his "tonic" or thinks he does, because he does not follow the laws of life, but closes his eyes upon them and sets up standards of his own. Unhappily his standards are at war with heaven, and so he pays his price in death.

Those stern mortality records, compiled by the census director at Washington, showing that nearly 400,000 children under ten years of age die in the United States every year, should lead us to realize that as a nation we have been busier building tunnels, subways, railroads, skyscrapers, bridges, air-planes and growing liners and living in luxury than in developing healthy, normal bodies.

The time has come when we must teach the child that if he wishes to live and grow strong, he must eat the food which God has made necessary to the growth of his body. We shall soon learn how to select that food.

Entertain Spicer Class at the Colonial Club

Members of the J. Henry Spicer Sunday School Class of the Market Square Presbyterian Church and their ladies were happily entertained last evening at the Colonial Country Club by Andrew M. Morrison and John D. Gray.

Bowling, games, contests and refreshments were enjoyed by J. Henry Spicer, the Rev. Dr. and Mrs. George Edward Hawes, Mr. and Mrs. John A. Fries, Mr. and Mrs. William McDowell, Mr. and Mrs. J. A. Underwood, Mr. and Mrs. Walter Cummings, Mr. and Mrs. D. W. Wright, Mr. and Mrs. Hanselmann, Mr. and Mrs. Charles F. Spicer, Mr. and Mrs. Harry Bankes, Mr. and Mrs. William C. Enterline, Mr. and Mrs. Boyd Whalen, Mr. and Mrs. John Gray, Mr. and Mrs. G. Schooley, Mr. and Mrs. D. Hilliard, Mr. and Mrs. W. J. Fisher, Mr. and Mrs. Frank Rogers, Mr. and Mrs. Frederick B. Miller, A. M. Morrison, F. Roy Croll, W. H. Huber, Burton Cummings and John Wells.

Mr. and Mrs. Howard Heyn, of Glen Rock, were recent guests of Mr. and Mrs. J. H. Smyser, 123 North Eighteenth street.

Dr. and Mrs. Henry M. Stine gave a small dinner last evening prior to the Poole concert.

Miss Anna B. Baker, of 716 North Third street, is on a business trip to New York.

Miss Ruth D. Shure, of 352 South Thirtieth street, returned from a house party at Williamsport.

Mr. and Mrs. Ralph Morghanthal have returned home to Jersey City after a brief stay among relatives in this vicinity.

Grant Conquers Three Mountain Trails in Day

Through snow and sand, over boulevard and mountain road, a Grant Six made one of the most remarkable motor achievements of the season last week.

The car was called upon to visit Knight's Camp in Big Bear Valley, Camp Baldy and the summit of Mt. Wilson, California, in one day. It was in the nature of a carburetor and efficiency test, and resulted in an altitude and endurance record for car and carburetor alike.

With Milo Bekins, of the Bekins-Speers Company and W. M. Jenkins, of the Master Carburetor Company, alternating at the wheel, the car went into Bear Valley over the Santa Ana Canyon and Clark grade route.

The return trip was made by the same route.

The car penetrated San Antonio Canyon to Camp Baldy and climbed to the summit of Mt. Wilson, registering at all three places, before returning to Los Angeles.

The entire trip covered a distance of 248 miles, and the total altitude climbed was 18,616 feet. The car was a stock model and one which has been given severe usage already. It is a veteran of long, hard trips, having made three trips from Los Angeles to San Francisco and return.

NEW OF STEELTON SCHWAB'S PLANS FOR P. S. CO.

INVOLVES HUGE EXPENDITURES Will Issue Bonds Secured by Mortgages on Properties For Improvements; Millions Already Spent; Grace's Rapid Rise

How Charles M. Schwab really paid \$21,900,000 for the control of the Pennsylvania Steel Company; how he made reservations for the issuance of mortgage bonds to raise the indebtedness of the company and to pay for proposed improvements; his plans for increasing export trade; just what Mr. Schwab intends to do with his purchase and ending the seemingly interminable discussion concerning stock holdings in the Pennsylvania Steel Company and its ultimate status came a formal announcement on February 18 that the latter company had passed to the Bethlehem Steel Corporation. After a meeting of the Bethlehem Steel Corporation on that day, at which E. G. Grace, president of the Bethlehem Steel Company, was elected president of the corporation to succeed Charles M. Schwab, who had been both president and chairman of the board, the following statement concerning the Pennsylvania Steel Company purchase was made:

The purchase price aggregates approximately \$21,900,000, which is at the rate of par on the preferred and about \$27 per share on the common stock of the Pennsylvania Steel Company. This amount is to be paid in 5 per cent. 20-year purchase money bonds of the Bethlehem Steel Corporation and in a mortgage upon the purchased property, with the reservation of bonds to retire underlying issues and to provide for improvements and additions.

The outcome of the determination reached by the Bethlehem Steel Corporation some time ago to add to its output bessemer products and other special steel lines, such as castings, frogs and switches, girder rails, rail fittings, etc., "For a number of reasons it seems that it would be better to accomplish these ends by acquiring the plant of the Pennsylvania Steel Company rather than to await the erection of additional plants at Bethlehem. The Pennsylvania Steel Company plants admirably supplement those at Bethlehem.

The Sparrows Point plant gives to Bethlehem a plant at the seaboard which is long desired for the development of its export trade. The purchase also brings favorable properties both in this country and Cuba and also important coal deposits. The Cuban iron ore properties, approximately \$1,900,000—represents \$100 a share for the \$20,587,500 of preferred stock of the Pennsylvania Steel Company, slightly under \$27 a share for the \$19,750,000 of common stock and \$8,500,000 to take up indebtedness of the Pennsylvania Steel Company to the Pennsylvania Railroad.

The purchase price of the Sparrows Point plant and the Sparrows Point plant gives to Bethlehem a plant at the seaboard which is long desired for the development of its export trade. transfers involved in the Bethlehem acquisition, nothing is available as to the official changes that will result. The Bethlehem officers will visit the Steelton and Sparrows Point plants this week, partly with a view to determining what new construction will be advisable.

[Editor's note: The result of President Grace's visit to Steelton has already been told fully in these columns.]

"For some time it has been known that the Bethlehem Steel Company had plans for the building of a bessemer plant looking to the production of bars, tin plate and possibly wire. It is not unreasonable to expect that these plans will now be carried out, in part at least, at Sparrows Point, on which much of the export operations of the company will naturally center.

The property acquired by the Bethlehem Steel Company consists of a total annual producing capacity of up to 3,500,000 tons of ingots and a total of 17 blast furnaces represented in a broad way what the acquisition by the Bethlehem Steel Company of the Pennsylvania Steel Company's properties means. Both the Steelton and Sparrows Point plants have bessemer converters and are flexibly equipped for some time. The Pennsylvania Steel Company has 7 blast furnaces, including two low-phosphorus stacks at Lebanon, the Maryland and Virginia steel company of the Bethlehem Steel Company 6 stacks. The Pennsylvania and Maryland plants are each rated at 750,000 tons annual ingot capacity, and the Bethlehem Steel Company's ingot capacity is generally put at 1,400,000 tons, with close to 600,000 tons capacity, part completed and part under construction with the Bethlehem Steel Company.

Besides a heavy addition to its steel rail capacity with the Maryland mill at Idewater, the Bethlehem has expanded greatly its shipbuilding facilities, has acquired the important Mayari ore deposits of Cuba, has a 54-1/2 per cent. interest in the Cornwall Ore Bank Company, Cornwall, Pa., and the Lehigh Valley Coal Company, a property of 10,000 acres of coal lands in Indiana county, Pa., which produced 729,000 tons in 1912.

The Maryland Shipyard The shipyards of the Maryland Steel Company build vessels up to 600 feet in length as well as floating dry-docks and other steel structures, and come now under the same control as those of the Union Iron Works Company, San Francisco; the Samuel L. Moore & Sons Corporation, Elizabethport, N. J.; the Laurian & Hollingsworth Corporation, Wilmington, Del., which also has a car building plant, and the Fore River Shipbuilding Company, Quincy, Mass.

The Cuban iron ore properties, owned through the Spanish-American Iron Company, at Mayari, Nipe Bay, Cuba, consist of about 20,000 acres of land and the Mayari mines, which produced 450,000 tons in 1913, and 52,000 acres, known as the Mayari mines, which produced 676,000 tons in 1913. With these nickel-chrome ores the Pennsylvania Steel Company has possessed a special product for castings and rolled products outside of the ordinary competitive field.

The Steelton rail facilities include girders for street railroad work and its structural rolling mills, with facilities for heavy castings, will add appreciably to the 450,000 tons capacity of the Bethlehem steel plant. Besides a remarkable bridge shop at Steelton, there is a large frog and switch shop, and the output includes also manganese and other steel castings and forgings.

President Grace The election of E. G. Grace as president of the Bethlehem Steel Corporation is recognition of the excellent constructive planning and for administration which have marked the rapid advance of
