## Too Much Cannot Be Said About Our Lingerie Blouses at 95c

You may think there would be little to tell about lingerie blouses, because of the seeming sameness.

But where quantities are unusually great; assortments unusually varied, and models stylish, most stylish; the story takes on a greater importance.

And that is not all. Aside from the bigness of stock, there are the finer points to be considered: fullness, stitching, seams, finishings and the like.

### "95c" On a Bowman Blouse, Signifies the Utmost in Style and Quality

This, however, you must pass upon. You must say whether or not it will stand the comparison test; and the fact that great and greater quantities are being purchased every day surely bears out our claim.

Complete in variety of latest models, there are dainty tailored effects; striking bars; lace in endless arrangements; tiny cluster tucks; pleats; embroidery inserts; neat colored stripes. Mostly, you'll find them in voiles and organdies; some mercerized. (Display in window).

Every authentic source of style information and inspiration has been enlisted in the perfection of the fashion service of this department, and the result as shown by this collection will surely meet with your admiration.

### Early Display of Fashionable Suits

Suits are showing the influence of sports. Belts, pockets and trimmings as well as materials radiate the out-door life of American women. For the more dressy occasion you will find silks quite the thing, with taffeta and gros de londre as favorites.

Checks are not the rarest in this fair assemblage. More diversified than any time previous they're here in small, medium, large, bright, subdued, and just the regular everyday kinds.

Brighter shades in general dominate the Spring suits — new ones are prettier because of their oddness and newness.

Smart little inexpensive models are a feature. Among these are fine serges, poplins and gabardines, in newest colorings and finishes.
