

URIC ACID SOLVENT For Rheumatism and Kidney Trouble 50 Cent Bottle, 32 Doses FREE

Just because you start the day worried and tired, stiff legs and arms and muscles, an aching head, burning and bearing down pains in the back—worn out before the day begins, do not think you have to stay in that condition. These sufferers who are in and out of bed half a dozen times at night will appreciate the rest, comfort and strength this treatment gives. For any form of bladder trouble or weakness, its action is really wonderful. Be strong, well wonderful, with no more pains from stiff joints, sore muscles, rheumatic suffering, aching back, or kidney or bladder troubles. To prove The Williams Treatment cures kidney and bladder troubles, rheumatism and all uric acid troubles, no matter how chronic or stubborn, if you have never used the Williams Treatment, we will give you one 50c bottle (32 doses) free if you will cut out this notice and send it with your name and address, with 10c to help pay distribution expenses, to The Dr. J. C. Williams Company, Dept. 2332, General P. O. Block, East Hampton, Conn. Send at once and you will receive by parcel post a regular 50c bottle (32 doses), without charge and without incurring any obligations. One bottle only to a family or address.—Advertisement.

DANDRUFF MAKES HAIR FALL OUT

25 cent bottle of "Danderine" keeps hair thick, strong, beautiful.

Girls! Try this! Doubles beauty of your hair in few moments.

Within ten minutes after an application of Danderine you can not find a single trace of dandruff or falling hair and your scalp will not itch, but what will please you most will be after a few weeks' use, when you see new hair, and downy at first—yes—but really new hair—growing all over the scalp. A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and straggly, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance, an incomparable luster, softness and luxuriance. Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and grows as fast as it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.—Advertisement.

THE RAIN After the heat it came, the rain—With drops that were huge and bright, And the weary earth raised its drooping head, And smiled through the cloudy night. And people offered an earnest prayer, Who never had prayed before; And beggars, gasping beneath the sky, Laughed out as they asked for more. And, kneeling low by her baby's couch, Who was dithering home and pain, A mother sobbed, "It has come in time—Thank God for the blessed rain!" —Margaret E. Sangster, Jr., in The Christian Herald Almanac.

Ends Dry, Hoarse or Painful Coughs Quickly

A Simple, Home-Made Remedy, Inexpensive but Unequaled. The prompt and positive results given by this pleasant tasting, home-made cough syrup has caused it to be used in more homes than any other remedy. It gives almost instant relief and will usually overcome the average cough in 24 hours. Get 2 1/2 ounces Pinex (50 cents worth) from any drug store, pour it into a pint bottle and fill the bottle with plain granulated sugar syrup. This makes a full pint—a family supply—of the most effective cough remedy at a cost of only 54 cents or less. You couldn't buy as much ready-made cough medicine for \$2.50. Easily prepared and never spoils. Full directions with Pinex. The promptness, certainty and ease with which this Pinex syrup overcomes a bad cough, chest or throat cold is truly remarkable. It quickly loosens a dry, hoarse or tight cough and heals and soothes a painful cough in a hurry. With a persistent loose cough it stops the formation of phlegm in the throat and bronchial tubes, thus ending the annoying hacking. Pinex is a highly concentrated compound of genuine Norway pine extract, rich in guaiaic acid and is famous the world over for its splendid effect in bronchitis, whooping cough, bronchial asthma and winter coughs. To avoid disappointment in making this, ask your druggist for "2 1/2 ounces of Pinex" and don't accept anything else. A guarantee of absolute satisfaction, or money promptly refunded, goes with this preparation. The Pinex Co., Ft. Wayne, Ind.

SUBMARINE WAR TO BE DISCUSSED

Reichstag Will Take Up Motives Underlying Berlin's Attitude Toward U. S.

By Associated Press. Berlin, March 15, via London, March 16.—The Reichstag will probably devote Friday and Saturday of next week to open discussion of the international situation and political problems which have arisen from Germany's methods of submarine warfare. A special committee of the Reichstag met to-day and found that there is a general desire of all parties for a frank and open debate on the motives underlying the government's attitude towards neutral powers and in particular towards the United States. It is believed that Dr. Von Bethmann-Hollweg, the Imperial Chancellor, will decide to make a speech explaining the policy in accordance with which Germany has conducted her foreign affairs department and its reflex action on her internal policy. In the present temper of a section of the Reichstag, the debate, it is expected, will bring out some caustic and unfriendly references to the United States but the fact that ten days ago the United States government regarded as the immediate cause of irritation will probably serve to tone down the present bitterness openly expressed by certain members of the Reichstag. The ways and means committee of the Prussian Diet to-day crossed swords with the administration regarding the Diet's competence to discuss the American and other issues of foreign and military policy. Herr Irmer, spokesman of the conservative party defended the claims of the Diet to the right of criticism. Foreign Minister Von Jagow while admitting the Diet's right to discuss anything it saw fit, declared that the government could not and would not accept advice or criticism on those matters which are beyond the competence of the Prussian parliament. The newspapers generally refrain from alluding, even guardedly to the source of the conflict.

Admiral Von Tirpitz Is Withdrawn With Honors

Amsterdam, March 16.—A semi-official statement issued in Berlin says: "The withdrawal of Admiral Von Tirpitz from the naval ministry takes place with all honors. His resignation is generally regretted in view of his great services in making of the German fleet the highly valuable instrument which it has proved to be during the course of the war. The choice shown in the selection of his successor is a guarantee that with regard to methods of naval warfare and downy at first—yes—but really new hair—growing all over the scalp. A little Danderine immediately doubles the beauty of your hair. No difference how dull, faded, brittle and straggly, just moisten a cloth with Danderine and carefully draw it through your hair, taking one small strand at a time. The effect is amazing—your hair will be light, fluffy and wavy, and have an appearance of abundance, an incomparable luster, softness and luxuriance. Get a 25-cent bottle of Knowlton's Danderine from any drug store or toilet counter, and prove that your hair is as pretty and grows as fast as it has been neglected or injured by careless treatment—that's all—you surely can have beautiful hair and lots of it if you will just try a little Danderine.—Advertisement.

Change Does Not Signify Any Modification of U-Boat War

Berlin, March 15, via London, March 16.—A change in the head of the Ministry of Marine is now an accomplished fact. It is official in that in order to avoid misunderstanding and wrong conclusions it must be noted that this change does not signify any modification of the submarine policy of the German government, which is based unwaveringly on the memorandum of February 2 last, issued by the Foreign Office to neutral powers regarding the government's intention to destroy armed merchant vessels of enemy countries; nor is there any intention to change or weaken its policy in any respect. It may be said, however, that no sharpening of the submarine warfare may be expected and that efforts which have been made to have the submarine warfare extended to neutral shipping bound to and from enemy ports have no chance of success.

It has been indirectly reported that the Wolff Bureau, German semi-official news agency, has announced that Admiral Alfred Von Tirpitz, German minister of marine, has retired on account of illness and that Admiral Von Capelle, director of the administration department of the admiralty, has been appointed his successor.

ELOPING TO WED SOLDIER BOY

Called for the girl at police headquarters. Pauline was sobbing in the next room. Mrs. Wike this morning told the story of the girl's infatuation. The mother claims Miss May Brown, the dancing girl, is responsible for Pauline's attempt to leave home. Joined "Correspondence Club." "Pauline, soon after she met May, sent her name to a correspondence club, some time ago. The Wikes believe. Ever since then she has been getting letters and pictures regularly from a number of persons, most of them men. She has returned home, he was a private in the army and sent Pauline a picture, which he said was of himself. "She corresponded, too, but I didn't think she would leave home. She might have fallen into the snares you hear so much about these days, for she never saw the man who wanted to marry her. "She was all right and listened to me until she met those other girls, and since then she has sent pictures away and corresponded for months. Her father is almost overcome with grief because she tried to run away and get married. And only 17 years old, too." The mother sighed.

Orpet Prosecution Relies on Miss Davis' Story

Chicago, Ill., March 15.—It is expected that Miss Josephine Davis, chum and confidant of Miss Marian Lambert, victim of the Lake Forest, Ill., tragedy, will be the chief witness for the prosecution when William Orpet is put on trial for the murder of the girl. It is declared that the only two persons who knew how the pretty high school girl died are Miss Davis and Orpet. "When one watches a canary daintily picking at its little box of bird seed, one is not likely to reflect upon the large quantity of that food which is eaten every year. Nevertheless, during the past year the canaries of this country consumed a total of four million seven hundred and four thousand six hundred and twenty-five pounds, or two thousand three hundred and fifty tons of bird seed. At the advanced price of five and one-half cents a pound which has been in force since the war made it difficult to import this material, the tiny birds have cost their owners two hundred and fifty-eight thousand seven hundred and fifty-four dollars and eighty-eight cents.—Popular Science Monthly.

U. S. May Take Steps to Punish Mexican Bandits

Top: MAJOR GENERAL FREDERICK FUNSTON, COL. H. J. SLOCUM Below: BRIGADIER GENERAL JOHN J. PERSHING. Washington, D. C., March 15.—It is said at the White House that vigorous steps will be taken to punish the Villista bandits, who under the personal leadership of Francisco Villa, rode into Columbus, N. M., and killed seventeen American citizens, among them United States soldiers. Colonel H. J. Slocum is in command of the soldiers who were killed and who fought off the bandits. He reported to his superior, Brigadier General John J. Pershing, who is in command of the troops along the border. In case a military move against the bandits, Major General Frederick Funston, in command of the American troops in the southwest, will take charge.

SCENE LEADS TO CHAPEL LECTURES

Really, truly way the world-old expression of Mr. W. Shakespeare's tale of the lady who leaned from a balcony some years ago. And one of Central's prettiest, dark-eyed brunettes (which is taking some discriminatory chance) and one of Central's most dashing, devil-may-care, blasé athletes played the title part. That the foot of the broad stairway in plain view of the OFFICE and frowning teaching corps, subdued for the time being as a balcony, is a mere difference of detail in stage setting than a matter here nor there. The high lights in the little scene that set all Central by the ears, figuratively speaking, of course, are these: On the "Sub" Balcony Said dashing, etc., athlete (so the story goes), in athletic clothes, was en route to be photographed again. Central's prettiest brunette was on her way to recitation. The brownest eyes of Central, the prettiest mouth of Central (this is the high school reporter's descriptive stuff, mind you) smiled; and the athlete (so the story goes) did just what most anyone else would have done. "Aren't you going to kiss me 'good-bye'?" "Yes!" "Oh, Mercy! Whether maid or youth voiced question or answer is a trifling matter; suffice it to say there was that old-fashioned sound that would have startled the sleepiest horse into a jog trot; a suppressed shriek from groups of classmates on the stairs; a scamper of small feet heavenward; much flashing of silk stockings and yellow and gray gaiters; faculty hands and eyes up-lifted in horrified amazement; an audible snigger from hurriedly departing athletes; the slam of doors— Later (la, how the story runs) there were two distinct and separate solitary lectures with Professor Dibble as lecturer and the prettiest brunette and the dashing, etc., athlete as respective pupils. In fact of the evidence there was pointblank denial, to wit: "The Denials "Why, Professor, I DIDN'T kiss HIM. HE kissed ME!" "Say, Prof, honest, I DIDN'T kiss HER. SHE kissed ME!" Then, still later, the earnest lectures behind the closed doors of chapel wherein certain things about the behavior of young men and young ladies of high school age were the chief subjects of discussion. Just how the denials of the principals were reconciled is a matter of the secret archives of the OFFICE. But, if the statement which Principal Dibble is reputed to have made thereon can be accepted, the stories dovetailed except in this single detail— The distance between their lips!

FORECASTS TREND OF AUTO INDUSTRY

Predictions of John N. Willys Have Since Been Confirmed

Possessed with an uncommon amount of business sagacity and knowing the automobile situation like a book, John N. Willys, president of the Willys-Overland Company is regarded by many as the oracle of the motor car industry. His ability to forecast coming events is nothing short of marvelous. A year ago he made a prediction to the effect that when the 1916 shows took place there would be at least five 12-cylinder cars on exhibition. And when the twin sixes were counted this year it was found that he had foretold the exact number. This was but another striking example of the foresight and keen business acumen of the Toledo manufacturer. Not only has he the ability to judge in advance, but his knowledge of the different phases of the best reputation of being one of the best posted men in the field. In 1913 and the year following his calculations as to what the public would demand were almost uncanny. He foretold the type, size and price that would meet with the approval of the majority of motorists. That he was correct is evidenced by the fact that the total production, amounting to 90,000 cars for the year period, was not nearly enough to supply the demand. Another prediction made by Mr. Willys a year ago was that the Overland factory would be shipping 600 cars a day before the end of 1915. At that time the Toledo plant was setting the pace for all motor car manufacturers with the exception of one. Its daily output was about 100 cars, but even though its growth had been phenomenal, few lectured outside of Mr. Willys believed it possible to quadruple its production during the year just passed. However before the end of September the factory had fulfilled the prediction of its president. Not only did Mr. Willys make good on his 600-a-day program but he increased the manufacturing facilities of the plant so that it is now possible to build 100 cars a day. Time after time he has pitted his business judgment against that of experts in some particular line and the result invariably has been the same. Before the war sent prices soaring, the material market was at normal. Many manufacturers bought only enough of the raw products to last them through the next season. Willys, however, decided to take advantage of the low prices and the result is that while most every automobile manufacturer in the country is clamoring for raw materials at three times the price, the Overland is provided with ample supplies to take care of its entire 1916 production. In addition alone the Willys-Overland Company has been able to save three and one-half million dollars while the saving on steel amounts to another million. It is due primarily to these economies that the Toledo concern was able to deduct \$55 from the original price of its Model 33B, even in the face of a rising material market.

50,000 BIRD MEN NOW FLYING

To the average American, the aeroplane still is a wonder, a miracle, a creation of magic. In Europe men and observers, there are more than 50,000 men now flying in daily flights above ground. The number increases from day to day and before the war is ended it is possible that the number will have reached to 100,000. A hundred thousand human beings taking to the air every day—and only five years ago Glenn H. Curtiss made his first long flight down the Hudson river—a wonderful feat chronicled in the press of the world!—Popular Science Monthly.

OUR BIG BIRD SEED BILL

When one watches a canary daintily picking at its little box of bird seed, one is not likely to reflect upon the large quantity of that food which is eaten every year. Nevertheless, during the past year the canaries of this country consumed a total of four million seven hundred and four thousand six hundred and twenty-five pounds, or two thousand three hundred and fifty tons of bird seed. At the advanced price of five and one-half cents a pound which has been in force since the war made it difficult to import this material, the tiny birds have cost their owners two hundred and fifty-eight thousand seven hundred and fifty-four dollars and eighty-eight cents.—Popular Science Monthly.

JOSEPHINE DAVIS. STORY OF RUSS GUERRILLA WAR IS FASCINATING

Harassed and Worn Down Tired Germans All Winter

Petrograd, March 1.—(Correspondence of the Associated Press.—When the history of Russian guerrilla warfare on the northern front during the past winter is written it will prove a fascinating and remarkable story. Although little has appeared about it in the press, it has accomplished some important results and the general staff has frequently commended it in the highest terms. The people speak of it as "our little war." Through the long winter months, when the regular operations are impossible, the Russians have kept at this guerrilla activity with the idea of wearing down the Germans and undermining their morals. Late last autumn schemes for the conduct of guerrilla warfare were invited from the army, while it was still engaged in the long and steady withdrawal before the German invasion. Every smart young officer hastened to draw up his ideas of the best means of wearing down the enemy. The plan finally adopted was one proposed by a young cavalry officer. His scheme encouraged officers and men to volunteer for this dangerous service by assuring them of promotion, honors and money rewards, care being taken to frame the conditions so that only the best men of any rank had a chance of getting into the new branch of service. One of the conditions was that nothing whatever was to be published of the exploits of those chosen, and the only occasion when this rule has been broken was when the author of the scheme captured two German generals and their whole staff and escort in the Pinsk marshlands. The work has been going on without intermission throughout the winter over the whole northern front. The enemy has never known a quiet night anywhere within fifty miles of his front trenches and in some sections this feeling of threatened security was made to extend a hundred miles into the territory occupied by the Germans. Storehouses were fired, ammunition trains exploded, trains derailed, bridges dynamited, telegraph wires cut, officers and dispatch riders killed. Night after night exhausted sleeping men were attacked or set on fire—this was the kind of exploit that the Russian guerrillas kept up continuously. Its nearest counterpart is found in the guerrilla activity which so harassed the northern troops during the American Civil War, except that the Russian scheme has been far more complete. The Germans at first sought a remedy in reprisals upon the scanty remaining population of the occupied districts, but after a short time they began to realize that this was a mistake, as it only added to the numbers of their intangible foes.

DRINK HOT WATER AND RID JOINTS OF RHEUMATIC RUST

Why rheumatism and lumbago sufferers should drink phosphated hot water each morning before breakfast

Just as coal, when it burns, leaves behind a certain amount of incalculable material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material, which if not completely eliminated each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste material, toxins and ptomaine-like poisons, called uric acid, is formed and then sucked into the blood where it continues to circulate collecting grain by grain in the joints of the body much like rust collects on the hinge as shown above. Men and women who suffer from lumbago, rheumatism or sore, stiff, aching joints should begin drinking phosphated hot water, not as a means to magic relief from pain, but to prevent more uric acid forming in the system. Before eating breakfast each morning, drink a glass of real hot water with a teaspoonful of limestone phosphate in it. This will first neutralize and then wash out of the stomach, liver, kidneys and bowels the previous day's accumulation of toxins and poisons; thus, cleansing, sweetening, and freshening the entire alimentary canal, each morning, before putting more food into the stomach. A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to make any rheumatic or lumbago sufferer an enthusiast on the morning inside bath. Millions of people keep their joints free from these rheumatic acids by practicing this daily internal sanitation. A glass of hot water with a teaspoonful of limestone phosphate, drunk before breakfast, is wonderfully invigorating; besides, it is an excellent health measure because it cleanses the alimentary organs of all the waste, gases and sour fermentations, making one look and feel clean, sweet and fresh all day. Those who try this for one week may find themselves free from sick headaches, constipation, bilious attacks, salowness, nasty breath and stomach acidity.
