Don't you do it. Use "Gets-It." It's marvelous, simple, never fails. Apply it in 2 seconds. Nothing to stick to the stocking, hurt or irritate the toe. Pain stops. Corns come "clean off," quick. "If I Were A Man"

a lady said the other day, "I would let my wife buy the coal, for she certainly ought to know the kind that is best and cheapest for the home."

Let's think that over, men. Maybe there is some truth in the statement.

The fact that a woman is overly particular about the coal she uses for cooking purposes especially is evidence by the thousands of housewives using SUN-GLO COAL.

LAWYERS SHOW ANCIENT MAPS

Counsel for some of the "Hardscrabble" property owners to-day stirred up the dust of yesterday when they presented some yellowed city maps, ordinances and records of long ago realty transfers in taking testimony of witnesses before Commissioner Scott S. Leiby in preparation for the argument on the "Hardscrabble" condemnation proceedings. City Clerk Charles A. Miller, City Engineer M. B. Cowden and Deputy Prothonotary E. E. Hummel were among the officials examined. Some of the maps shown were made as far back as 1869. Frequently City Solicitor D. S. Seitz inquired as to the purpose of the taking of the depositions.

Some curious facts as to the ownership of land and properties in that section way back in years gone by were developed by Attorneys F. F. Nead, George R. Barnett and J. C. Nissley, counsel for the property owners, in their effort to support their contention that the highway in question had long been laid out as a county road and later accepted as a city highway. Their position is that the city need not and can not formally open Front street, as it has already been opened and paved by the city.

CONTINUE JONES ELECTION CASE

Argument on the application for a writ of habeas corpus for William M. Jones, the judge of the election board of the Second ward precinct, held Sixth ward, who was convicted of conspiracy, was postponed to-day to a date to be fixed by the court when the argument will be heard and owing to a bad cold Judge McCarrill is remaining at home for a few days. Consequently no time will be fixed until he retires. Illness of David Goldberg, the plaintiff in the indisposition of Judge McCarrill also caused the continuance of the injunction proceedings brought by Goldberg's faction of the Keshet Israel congregation against Mayor Oscar Sifton. WATERY BLISTERS ITCHED AND BURNED

Terribly on Ankles and Arms. Very Badly Inflamed and Swollen. Could Not Wear Shoes.

PEALED BY CUTICURA SOAP AND OINTMENT

"I had poison ivy on my ankles and arms which started with little watery blisters and it itched and burned terribly. Matter formed in the little blisters, and they would spread in a big patch like a boil. I scratched so that the blood would come, and it would be followed by terrible paining. The parts which were affected were very badly inflamed and swollen and my foot was so bad that I could not wear my shoes.

"I got a sample of Cuticura Soap and Ointment. I bought more and I only needed one cake of Cuticura Soap together with the Ointment to heal the trouble." (Signed) John E. Smith, Center, Pa., Oct. 19, 1915.

Mountain Torrents Harnessed to Electrify a Great Railway

In the fastnesses of the western mountains millions of tons of water have plunged wastefully away for ages. Meanwhile, to haul the country's traffic over the vast ramparts of the Rockies by steam traction has meant the consumption of an enormous quantity of the nation's coal supply and high operating expenses.

It has been reserved for "The St. Paul Road" to change all this—to abandon steam as a motive power in the mountains, and to use the limitless energy of the harnessed streams to electrically operate its trains. The electrification of 440 miles of main line between Harlowton, Mont., and Avery, Idaho, (115 miles between Three Forks and Deer Lodge, Mont., now in operation) passing mile-high over the Great Continental Divide, marks a new era in railroading and erects another milestone in the world's progress. It means the conservation of resources—more efficient and economical operation—better maintenance of schedules—the practical elimination of vexatious delays due to bad weather—and a notable increase in travel delights.

Chicago, Milwaukee & St. Paul Ry.

This line, pre-eminent in scenery and service, is now also the most extensively electrified road in the world, affording the traveler the smoothest, gasless trip through the beautiful scenery of the Belt, Rocky and Bitter Root Mountains. Mark well the advantages of "The St. Paul" so that when arranging your next trip to the Pacific North Coast you will know the way of greatest comfort and charm.

Booklet giving full particulars of "The St. Paul's" electrification and its advantages can be secured at the address below.
