HOW FAT FOLKS MAY BECOME SLIM

A Simple, Safe And Reliable Way That Calls For No Drastic Diet or Tiresome Exercises

Fat people, particularly those who weigh from 10 to 30 pounds more than they should, have been most interested in the remarkable reports that have recently been published of the manner in which weight is being safely reduced by what is known as the fresh air method combined with the use of ordinary oil of korein.

This plan, which is so strongly recommended and endorsed is very simple and makes unnecessary starvation diets, dangerous drugs, sweating or weakening processes or strenuous exercise. Satisfy your appetite with plenty of good substantial food, but do not eat more than you need as this overtaxes your organs of assimilation. It is important to get plenty of fresh air, breathing it deeply into the lungs and to take with each meal a few drops of oil of korein in capsule form which you can obtain from any good druggist.

If you have been getting too stout, this plan is well worth trying. Breathe in all the fresh air you can get as the oxygen in the air consumes fat while the oil of korein capsules, taken one with each meal and one before you go to bed, are designed to reduce fatty accumulations in the system wherever located.

Oil of korein is absolutely harmless, is pleasant to take, helps digestion and costs little.

Even a few days following of these simple directions has been reported to show a noticeable reduction in weight with the flesh firm, the skin smooth and the general health improved. In fact your footsteps may appear lighter, your work seem easier and you go to bed with a sense of gain a pound of health and strength with every pound of flesh you lose. Every person ten pounds or more overweight can well afford to give this reducing system a trial.—Advertisement.

Two Hurt When Strikers Blow Up Wilkes-Barre Car

Wilkes-Barre, Pa., July 21.—A large quantity of dynamite was placed on the track on the West Pittston division of the Wilkes-Barre Railway Company yesterday and it wrecked the first trolley car sent over the line, severely injuring Marvin Renshaw, the motorman, and slightly injuring Anthony Ernst, the only passenger. Conductor J. V. Root escaped injury.

The place was a lonesome stretch of road in Wyoming borough. The explosion blew out five feet of track, smashing every window in the car, scattered the seat in all directions and blew out part of the flooring and the front vestibule. The motor and mechanism were demolished.

Renshaw was hurled against the front of the car and badly bruised. He was cut by flying glass and suffers greatly from shock. He was taken to hospital. Ernst was hurled about in the car and bruised and slightly cut by glass.

The dynamiting, following closely one in this city twenty-four hours before, has caused traction officials to state that an organized move is on to intimidate passengers and damage property. Company officials met to-day and offered a reward of \$1,000 for the arrest and conviction of the men who dynamited the car yesterday.

State troopers working on the case but they have no clues.
