

BEAUTY IS WED ON HER DEATHBED

Pittsburgh Girl Who Set Fashions of World Marries Rich Frenchman

Paris, July 25. — Henry Letellier, formerly the owner of the Paris Journal, large stockholder in the Menier Chocolate Company and one of the wealthiest of Frenchmen, recently married Peggy Gillespie, formerly of Pittsburgh, on her deathbed.

The bride came to France six years ago, and had been a prominent figure at the Longchamps and other race courses, wearing the Paquin gowns. She was not a mannequin, but contented to appear in Paquin's "creations," as she had an extensive circle of friends among wealthy and titled Europeans.

After the war began she became interested in various relief work charities. She consented to marry Letellier about the time she fell ill with quick consumption. When the doctors announced that death was near she tried to break the engagement, but Letellier finally persuaded her to become his wife before she died.

For more than two years little Peggy Gillespie was one of the most brilliant figures of the gay life of Paris. By her wit and charm and the dash with which she dressed she set a pace which the French capital found difficult to follow.

In fact, she set the styles for the whole world. Wherever there was a gathering of the beauty and fashion of Paris, Peggy Gillespie was always there, outshining the others like a star. Her entertainments in her sumptuous apartment in the Avenue Henri Martin were famous for their brilliance, and she numbered among her acquaintances many of the highest title and distinction in Europe.

Not only in Paris, but at Monte Carlo and Trouville where French fashion, which is the fashion of the world, reaches its zenith, Peggy Gillespie, by her extravagance and daring eccentricities, was a remarkable figure. Like an Empire Beauty a French writer described her as ranking with the reckless beauties of the Second Empire. She was then only 24 years old.

As long ago as 1899 a consultation of physicians was called to consider her health, and it was found that she was a victim of tuberculosis. As a result of this she was ordered to the south of France, and at Hyeres she lived for a time in a tent with a special kitchen, two motorcars and a train of servants.

Peggy Gillespie was born at Punxsutawney, Pa., but spent her girlhood in Pittsburgh, where she was married to George McClelland of that city.

If you want to keep your hair in good condition, be careful what you wash it with. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and is very harmful. Just plain mulled coconut oil (which is pure and entirely greaseless), is much better than the most expensive soap or anything else you can use for shampooing, as this can't possibly injure the hair.

Simply moisten your hair with water and rub it in. One or two teaspoonsful will make an abundance of rich, creamy lather, and cleanses the hair and scalp thoroughly. The lather rinses out easily, and removes every particle of dirt, dandruff and excessive oil. The hair dries quickly and naturally, and it leaves it fine and silky, bright, fluffy and easy to manage.

You can get mulled coconut oil at any store. It is very cheap, and a few ounces is enough for last everyone in the family for months.—Advertisement.

Don't Dye Gray Hairs Darken Them in a Natural Way. Remove every trace of prematurely gray, streaked and faded hair, easily, quickly, safely and turn it an even dark, beautiful shade with Hays' Hair Health.

Simple Way To Take Off Fat. There could be nothing simpler than taking a convenient little tablet four times each day until your weight is reduced to normal. That's all—just purchase a case of Marmola Prescription Tablets from your druggist (or if you prefer, send 75c to Marmola Co., 324 Woodward Ave., Detroit, Mich.) and follow directions. No dieting, no exercise. Eat what you want—be as lazy as you like and keep on getting slimmer. And the best part of Marmola Prescription Tablets is their harmlessness. That is your absolute safeguard.

\$300 Dunham PIANO For -- \$145. Taken in exchange on a player-piano and rebuilt like new. You'll be sorry if you want a bargain and miss this one.

MORE ORIENTALS FIGHTING FOR THE ALLIES

The latest contingent of Orientals to arrive in France to fight for the allies are natives of Anam. Some thousands of them have been landed in France and are now on the western front.

DISCREPANCY OF \$243 IN 11 YEARS

[Continued From First Page] The report says: "During the year 1905 a shortage was discovered in the city tax stubs of approximately \$104, which was made good by Mr. Copelin in March, 1916. During the balance of the period the city tax stubs are in agreement with cash received per treasurer's records. A number of differences were also found in water rent stubs, being mostly errors in footings. These differences in all amount to \$243.54 of which \$218.88 occur in 1905 and the remainder at various times during the following years. Mr. Copelin stated to us that he was of the opinion that at the time he had settled the 1905 tax shortage that the \$104 referred to in the report was not the amount of the shortage in water collections. After diligent search we were unable to discover any record of any settlement other than the \$104 referred to above. The difference of \$243.54 mentioned above represents the amount by which the water rent stubs exceed the amount entered in the treasurer's cash book as being received by him."

Some Recommendations. The method of handling the millions of dollars in the collection of taxes, expenses of public improvement loans, etc., were approved by the auditors and the accounts were found to be correct. In commenting on the city's condition the auditors pointed out that the water department has been paying interest on its share of the first public improvement loan without receiving credit for the same. The auditors recommended that the city should pay interest on its share of the first public improvement loan without receiving credit for the same. The auditors recommended that the city should pay interest on its share of the first public improvement loan without receiving credit for the same.

RAIN BRINGS DEMAND FOR SETTLEMENT

[Continued From First Page] resumed as soon as possible on all lines. No other arrangements have been decided upon, Mr. Musser stated. No disturbances of public improvement work are reported in the morning lines of the company this morning, and the police and sheriff's deputies had little to do. The steady rain of the morning, however, in many places riding the cars but the union leader claimed that public sentiment is still with them.

Plan Mass Meeting. The union men will hold a big public mass meeting at 8 o'clock tomorrow evening in the Technical High school auditorium, when they will present their side of the question with their reasons for striking, and their willingness to submit to arbitration. John Elmer, vice-president of the Amalgamated Association of Street and Electric Railway Employees, will be one of the speakers, and an invitation has been extended to the public and car fare, and a business meeting of the city, to be present.

Cars Run Late. For the first time since the strike started on Sunday morning, July 16, late at night, two cars were kept on the second street line after all of the other ones were sent to the barn, but no violence. Special squads of officers and sheriff's deputies acted as guards all along the line. James Ogilvie, aged 60, of Oberlin, was struck by a jitney near Steelton last evening, sustaining bruises and a fractured left arm. He was taken to the Harrisburg Hospital.

Gross Declares He'll Try to Include Fund For "Basin" in Budget. "My intention is to take up personally with the City Solicitor the question of whether or not I, as superintendent of the Park Department, can include in some way provision in the departmental budget of funds sufficient to provide for the construction and maintenance of bathhouses, bathing beaches and other permanent river improvements. While I do not know whether this can be done, I believe the item might be incorporated in the budget."

In Pulmonary Troubles of Every Nature one of the first needs is rest, combined with pure food and abundance of fresh air night and day. Sometimes these agencies are sufficient to effect relief. In other cases, run-down systems need tonic help. Where the latter is indicated, it is wise to try Eckman's Alternative, a lime-bearing compound which is easily assimilated by the average person. For more than twenty years this preparation has been widely used and many recoveries are attributed to it. Even in advanced cases of pulmonary affections it has proved beneficial. One feature not commonly found in effective medicines is its absolute freedom from poisonous or habit-forming drugs. Therefore a trial is safe. Your druggist's Eckman Laboratory, Philadelphia.

FOODS THEY BUILD OR DESTROY

AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT

(Copyright, 1916, by Alfred W. McCann.) By ALFRED W. McCANN

CHAPTER 87 Physicians, parents and guardians of children will do well to examine into the statement that tuberculosis children succumb more quickly when nourished with sugars and starches and that such children, while appearing plump, rosy and well-nourished, are water-logged and show slight resisting power against the invasion of disease.

We know now positively that granulated sugar, white bread and biscuits, denatured cereal breakfast foods, commercial corn meal, polished rice and glucose provide none of the alkaline bases indispensable to health. We know now positively that the body is tenacious of its fixed alkaline bases, and on a diet deficient in these bases it cannot long supply the necessary amount of alkali required to neutralize the organic acids which are daily elaborated in the blood and tissues as a result of the decomposition of proteins, fats and carbohydrates.

On the one hand there is a deficiency of bases in our refined foods and on the other an excess of carbohydrates. No scientist would dare to claim positively in the presence of these facts that a physiological equilibrium can be maintained permanently on such a broken balance. Glucose, now used in the manufacture of many commercial foods, including nearly all the candies on the market, is a mineral-free carbohydrate of artificial origin.

Packard says cancer is due to a diet of mineral-free carbohydrates. Armand Gautier has demonstrated that the loss of minerals by excretion is offset only by constant intake. Neither glucose nor any other refined food can be substituted for the natural food. Starling and Foster have demonstrated that animals fed on demineralized or refined food die sooner than if not fed at all. The demineralized canned beef, the extractives of which were all boiled out before canning, make beef extract and canned soup, which caused so much sickness among our troops during the Spanish-American war, is a further illustration of this fact.

Prof. Wilson says mineral starvation is followed by dire consequences. Takaki, Chamberlain, and Vedder have demonstrated that the mineral deficiency of refined food is responsible for high mortality among breast-fed infants. Mother's milk lacks mineral matter in accordance with the mineral deficiency of her food. Drennin attributes the rapid course of tuberculosis, after pregnancy, to mineral starvation. The fetus acts as a mineral parasite, robbing the mother's tissues unless her food supplies its needs.

Caerly declares that natural immunity depends on nutrition and that one-sided nutrition with sugars, syrups and candies destroys this immunity in children. Wegart reports that "tuberculosis children succumb more quickly when nourished with sugars and starches. The water contents of the organism is inversely proportioned to the amount of immunity. Carbohydrate diet increases unnecessarily the amount of water in the tissues and prompts a rapid rise in the body weight."

Such children who appear plump, round and well nourished, are water-logged and show slight resisting power against infection. Various investigators have found that demineralized sweets, sugar, glucose, etc., give rise to many diabetics. Why do they exclude diabetes from the list of these disorders when the chief symptom of diabetes lies in its rebellion against sugar, particularly its rebellion against glucose? Charles as far back as 1852 declared: "Temporary glycosuria may be induced to be a diet too rich in starch and sugars, and this is more liable to occur with a diminished alkalinity of the blood. Permanent glycosuria constitutes diabetes mellitus."

He says, in other words, that if a temporary glycosuria can be induced by an excessive ingestion of refined starch or sugary foods and such excess is contained until the temporary glycosuria becomes permanent, the net result of such excess is diabetes. He also declares that glucose combined with certain acids and bases, as potash and lime, forming glycosates or saccharates, and in alkaline solution has a great tendency to absorb oxygen.

What scientist will say that this selective action of the pancreas on these alkaline bases is devoid of significance or that the normal functioning of the pancreas does not depend in any manner upon its ability to make use of them? Yet in the presence of the fact that glucose has an affinity for these alkaline bases and combines with them, thereby interfering with their ability to conduct themselves in the tissue and internal secretions in accordance with nature's laws, who will say that the excessive ingestion of glucose, in the form of lime and potassium salts by combining with them and carrying them off?

It is deprived of lime and potassium in this manner, does not the pancreas suffer an impairment of its ability to assist in the control of the upper limit of the blood content of glucose? Kleiner and Metzger of the Rockefeller Institute assume (they use the word assume) that it is the failure of the pancreas to perform its function which causes diabetes. But what causes that failure? There is much evidence to support the belief that refined, demineralized starches and sugars, of which glucose is the most conspicuous type, induce the failure of the pancreas to resist the excess glucose assault and, second, by permitting the entrance of glucose into the blood without hindrance after the glucose has been successfully broken down the natural barriers against it.

The experiments of Kleiner and Metzger, indicating that in health the circulation can utilize only a fixed quantity of glucose—0.1 per cent—beyond which the healthy or normal pancreas appears to say, "No more shall enter," support the conclusion, although not intended to do so, that it is the excess of glucose and the excess of other refined and demineralized starches and sugars which causes a temporary glycosuria to be superseded by a permanent diabetes and that the importance which eminent scientists have heretofore attached to the diseased condition of the pancreas in relationship to diabetes is erroneously given to a striking and significant symptom of the disease instead of to its cause.

We shall soon describe the sugar evils as found in adulterated molasses, maple syrup and honey, in order that some adequate appreciation of the virtues of these sugars, when pure, may be attained. before she lets it go, of being little short of a miser. The girl sees the contemptuous glances with which her associates regard her parsimony, and they stab her like so many knives, for she is in reality the most generous soul alive. She would like to be free handed. Also, being a woman, and young and good looking, she would like to have pretty clothes, and to go to the places of amusement whose doors she never enters because she cannot afford to spend a cent on self-indulgence.

And the reason why? This girl's mother, without perhaps realizing what a crime she is committing, is deliberately making her daughter a slave to support three lazy Three Able-Bodied Brothers Take Ease While Girl is at Work. In this particular home not a dollar comes into it that is not earned by the girl. She pays the rent, and the light, the heat, and the food. The mother has no income and furnishes nothing, yet she persists in

SHALL A GIRL KEEP BROTHER? Dorothy Dix Tells Story of How One Lass Works For Lazy Lollers. By DOROTHY DIX. Among my acquaintances is a splendid young woman who holds a responsible position in a big business house. She receives a good salary, enough to enable her to dress well and indulge herself in many luxuries, but she is always poorly clad, scripps on her face, and has a reputation among her co-workers who observe how she looks at a nickel

TWO BEST DRESSED MEN OF CONGRESS. SENATOR JAMES HAMILTON LEWIS. SPEAKER CHARLES CLARK. In the summertime as in the wintertime Senator James Hamilton Lewis, of Missouri, has their own as the best dressed men in Congress. These photographs show them in their summer togs. Their winter togs were soberer, but as good.

KAUFMANS MARKET SQUARE UNDERSELLING STORE. IMPORTANT NOTICE. DURING AUGUST this store will close Saturdays at one o'clock and remain open all day Friday and Friday evening. We ask our many friends and patrons to kindly encourage this movement in the interest of hundreds of salespeople by arranging to do your week-end shopping Friday evening instead of Saturday evening. Women's & Misses' Silk Dresses, worth \$6.95... \$2.59. Women's & Misses' Wash Skirts, worth \$1.50... 95c. Men's Palm Beach Suits, worth \$10.00... \$5.95. Men's Sport Shirts, worth to \$1.00... 79c. Women's Voile Waists, worth to 75c... 38c. Boys' Wash Suits, worth to \$1.50... 59c.

thinking of the home as her home and says, "that while I have a roof over my head my boys shall have a place to stay." Every morning the girl gets up early and goes to work leaving her three able-bodied brothers vainly snoring secure that when they choose to arise, along toward noon, mother will have some special dainty prepared for them. And mother thinks that this is all right. She makes a thousand excuses for their idleness, and considers that her daughter is very mean and hard hearted when she objects to supporting a bunch of idlers and would like some of the money that she earns to spend upon herself. And the girl is helpless because she wants to take care of her mother and she can't take care of mother without mother supporting her good-for-nothing sons. Of course this girl, and every other woman who supports a strong and healthy man in an easy mark that the fool killer will assuredly get some day. She gets neither thanks nor hapence, for the man who deliberately sits down and lets a woman take care of him is invariably a yellow cur that bites the hand that feeds him.

Will Really Aid Brothers by Refusing to Support Them. Therefore, I would advise this young woman and every one confronted with the same problem to simply shut their doors on their loafing brothers, and force them to go to work. In that way they will not only rid themselves of a burden that they are under no obligation to bear, but will do the one thing that is possible to make a self-respecting and decent man out of an idler. Laziness is a disease that requires heroic remedies to cure, and the best antidote for it ever devised is simply to chuck a man out into the world where he must either work or starve. Hunger has done more to ally that tired feeling with which so many men are born than any other one thing in the world.

As long as a loafer knows that he's got a warm place to sit, a good bed to sleep in and three square meals a day to eat he isn't going to wear himself out looking for work, and he's going to be mighty particular about the sort of a job he takes. But if he knows that only his own labor stands between him and want, he'll get right down to the real pursuit of a job, and in work he'll find the independence that makes him a man.

The case of this girl who is forced by her mother to support her three lazy brothers is not an isolated one. I have known many other such ones myself and I get hundreds of letters from other working girls telling exactly the same complaint. They love their mothers, they feel a high sense of duty and desire to divide their earnings with their parents, but they feel that a hardship that they have to support brothers far more able to work than they are.

These girls are right. It is most cruelly unjust that their mothers should rob them of their hard earned wages to give the money to trifling and often drunken sons, and the girls should have the courage to rebel and refuse to submit to such treatment. The one who earns the money that supports home is in law the head of it, and the girl who pays the bills has a right to say who shall live in that home and eat of the food that she buys. Certainly no sister is under any obligation to slave herself to death to buy whisky and cargets for an idle man, even though he is mother's darling and mother thinks that she ought to.

MRS. MAY LORENE SANDERS. Mrs. May Lorene Sanders, aged 30, wife of Joseph Stark of Rutherford Heights, died at the Harrisburg hospital, Saturday. She was the daughter of William O. Sanders and his wife, Barbara A. nee Keller, of Hummelstown; and is survived by her husband and two daughters aged 7 and 5 years, respectively, her father, and the following brothers and sisters: Harry of Palmyra, Winfield B. of Harrisburg, Mrs. Joseph Clark of Hookersville, Mrs. J. Youtz of Hummelstown and Mrs. T. Jones of Mifflintown. Funeral services were held Monday afternoon at 2 o'clock at Rutherford Heights conducted by the Rev. J. A. Lyter of Harrisburg, and the Rev. E. L. Brown of Anville. Interment was made at Hummelstown.

JACOB HEISERMAN. Funeral services will be held in the Hawkins Estate chapel, 1207 North Third street, Thursday afternoon at 2 o'clock for Jacob Heiserman, who died at his home in Lancaster, yesterday afternoon. He is survived by one son and one daughter. Burial will be made in the Paxtang cemetery with the Rev. J. M. Warden, pastor of the Bethany Presbyterian Church, officiating.
