ACHIEVER The New 10c Cigar SMOKERS who demand 10c quality but find most 10c cigars too heavy for them will take instantly to the blend of the NEW ACHIEVER CIGAR, whose filler is grown in the famous Vuelta Abajo district of Cuba. Naturally a cigar that has such a foundation bids for patronage under the most favorable conditions. Here is achievement in blending—the creation of a sweet and mild smoke without the slightest sacrifice of the bouquet of Havana tobacco. Look For the Label Made by C. E. BAIR & SONS

Let's agree right at the start that wherever there are moving mechanical parts and metal-to-metal contact, a certain proportion of friction—that age-old bugbear—is unavoidable. Your job and ours is to see that this proportion is reduced to its lowest possible terms. This is where Atlantic Motor Oils figure.

Atlantic Motor Oils divide themselves naturally into a group of 4 principal lubricants—Atlantic Polarine, Atlantic "Light," Atlantic "Medium" and Atlantic "Heavy." For 8 out of 10 cars, Atlantic Polarine is the 100-percent year-round oil that strikes terror to the hearts of old General Friction and his corps of death-dealers. In certain types of motors and under certain driving conditions, one of the other 3 Atlantic Motor Oils listed above may do the trick better than Atlantic Polarine. This is a matter for you

to decide in conference with your garageman. The big thing to remember is that this group of 4 lubricants—the product of the world's oldest and largest lubricant manufacturers—is the worst enemy the Friction Army ever lined up against. Atlantic Gasoline is the accepted standard motor-fuel. Atlantic Motor Oils are just as efficient and important to proper lubrication as Atlantic Gasoline is to motive power. This lubrication thing is serious—better give it thought.

Read up on this subject. We have published a handsome and comprehensive book about lubrication. It is free. Ask your garage for it. If they cannot supply you, drop us a postal and the book will be sent you without charge.
