

WOMAN COULD HARDLY STAND

Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Fulton, N. Y. — "Why will women pay out their money for treatment and receive no benefit, when so many have proved that Lydia E. Pinkham's Vegetable Compound will make them well? For over a year I suffered so from female weakness I could hardly stand and was afraid to go on the street alone. Doctors said medicines were useless and only an operation would help me, but Lydia E. Pinkham's Vegetable Compound has proved it otherwise. I am now perfectly well and can do any kind of work." Mrs. Nellie Phelps, care of R. A. Rider, R. F. D. No. 5, Fulton, N. Y.

We wish every woman who suffers from female troubles, nervousness, headache or the blues could see the letters written by women made well by Lydia E. Pinkham's Vegetable Compound. If you have had symptoms and do not understand the cause, write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free.

HIGH SCHOOL GIRL

Run-down, Weak and Nervous—Made Strong by Vinol.

For the benefit of Harrisburg school girls who overwork and get into highly nervous, weak and run-down condition, we publish this letter from Morris Copier, of Fort Worth, Texas. —"I go to the high school and take music lessons, and became run-down, weak and very nervous, so I could not do anything. My mother shook all over and could hardly scream at times, and was really unfit to keep on with my studies. Mother purchased a bottle of Vinol for me and within a week I was better, and in two weeks I had gained five pounds and felt fine."

It is the curative, strengthening elements of beef and cod liver peptones, aided by the wood-making, revitalizing effect of iron and manganese peptones and glycerophosphates, contained in Vinol, which made it so successful in building up health and strength and overcoming the nervous condition of Miss Copier, and we ask every school girl in Harrisburg who is in a like condition to try Vinol, on our guarantee to return their money if it fails to benefit.

George A. Gorgas, Drugist; Kennedy's Medicine Store, 321 Market street; C. F. Kramer, Third and Broad streets; Kitzinger's Pharmacy, 222 Derry street, Harrisburg. Also at the leading drug stores in all Pennsylvania towns.

Saxol Salve

REMOVES SKIN AFFECTIONS

One package proves it. Sold and guaranteed by above Vinol druggist.

NO MORE GRAY HAIR FOR YOU

Don't Use Dyes — Sunshine and Air and Q-Ban Restore the Natural Color Evenly and Permanently—"Back to Nature."

We want to recommend Q-Ban Hair Color Restorer, combined with the good, pure, free air and sunshine, for bringing back to you the natural color of your hair in a perfectly healthful way. Dyes and paints are worse than sticky and unpleasant—they are actually dangerous.

Use Nature's own remedies, sunshine and air with Q-Ban and have beautiful, soft, glossy, lustrous hair in abundance with its uniform and natural shade permanently restored. Not a patent medicine.

Simply wet your hair with Q-Ban Restorer and then expose it to air and sunshine. A process of oxidation, from the oxygen in the air, will occur. As you repeat this daily for a little while your hair will naturally and cheerfully return to its original color. It's very simple—not a miracle at all—and safe and certain.

Q-Ban Restorer is all ready to use. It is not a dye, and is guaranteed to be harmless. It is sold by George A. Gorgas, and all other good druggists, at 50c a large bottle under guarantee by the makers or your money back, no questions asked. It is the only guaranteed preparation of the kind. Beware of imitations that claim overnight wonders.

Write Hestis-Ellis Drug Co., Memphis, Tenn., for large, interesting, illustrated, free booklet, "Hair Culture," which tells all about proper care of the hair. Ask your druggist for Q-Ban Hair Restorer, Q-Ban Shampoo, Q-Ban Hair Liquid Shampoo—also Q-Ban Depilatory (odorless).

A Winter Without Coal

Can you imagine a situation of this serious nature? Well, we just escaped it this winter, and those who buy coal by the "hand to mouth" method may still have a taste of it before Spring comes.

The scarcity of coal this winter, due largely to a shortage of cars, will have dire results if war comes and railroads are used exclusively for Government business.

What little coal is above ground will not last long if there is a general clamor for it. Don't delay.

NEWS OF THE LEGISLATURE

SCHOOLS TO ASK \$20,000,000 NOW

Chairman Milliron Announces Some of His Plans for the Education Bills

Plans are being made by the appropriations committees of the two houses of the Legislature to take up without delay appropriations so that estimates can be made as to what revenue will be needed. The appropriations made by the last Legislature and approved aggregated over \$7,000,000 and there are members who believe that a limit of \$75,000,000 should be fixed for this session. This would require some revenue raising laws.

The chief places where increases will be asked are for the schools and highways. Chairman Miles A. Milliron, of the House education committee, said to-night that he would like to see an appropriation of \$20,000,000 for the schools, three-fourths of which should be set aside for the common schools, especially to better the rural schools.

While the appropriations are being gotten into shape it is expected that members will bring preparation of their bills and an early date for presentation of bills except by special consent is being talked about. There are now 156 bills in the House and about 150 in the Senate.

They cover about fifty subjects, including some "advanced" legislation. Chairman Woodward, of the House appropriations committee, said that his committee would begin all week and had already fixed a hearing for February 20 on mothers' pensions.

Chairman Woodward said Mr. Woodward "will be here to listen to any committee which may come in. We want to give all a fair hearing."

Increasing the appropriation Mr. Milliron said to-night: "I have found a strong sentiment for increase of the school appropriation. Many people would like to see an appropriation of \$20,000,000 but there may be a compromise on \$18,000,000."

Mr. Milliron said that he was opposed to the plan suggested by some of the men in the educational branch of the government for a lump appropriation from which the department could make its own allowances for various forms of education, including high schools. "If this Legislature allows \$18,000,000 I would set \$15,000,000 at least aside for the elementary schools because in my opinion the best of the money should be for the neglected. In the last appropriation the common schools got \$13,385,400 out of the \$15,000,000 appropriation. If the Legislature gives \$18,000,000 I would favor dividing \$3,000,000 among vocational education, high schools, normal schools and the like."

Mr. Milliron said that he favored a liberal appropriation to enable the State to buy the three remaining State normal schools. It now has title to two and is in the process of establishing the third. The Board of Education.

The education chairman announced to-day that he intended to present a bill to increase the minimum salary for teachers which would provide \$45 for those holding provisional and normal school certificates, an increase of \$5, while the holders of professional certificates would get \$50 and permanent certificates \$60. It is also the plan to present a bill to make \$2,000 the minimum for county school superintendents.

BIG CALENDARS FOR TWO HOUSES

Third Class City and Other Important Bills Are on the List For Tonight

The State government deficiency bill which was cut down over a quarter of a million by the House appropriations committee, in the first bill on the calendar for the House at its session to-night. Several of the items cut out of the bill have been presented in the form of separate bills as it was found the departments had surplus appropriations which could be transferred. There were reports to-day that some questions might be asked on the floor of the House. The bill will be on second reading, the amendment stage.

Among other bills on second reading is the Party bill giving consent of the State to the acquisition of land for the extension of the Frankford arsenal in Philadelphia; for changes in the time of contracts for State paper; permitting burgesses to succeed themselves; providing \$35,000 for the National Guard to take part in the inauguration of President Wilson and the senatorial deficiency bill for the courts.

The Sproul investigation resolution will be at the tail of the second reading calendar.

In the Senate the calendar is larger than even the heavy calendars of last week, among the first bills on third reading being the Snyder measures to establish the Public Service Commission as a branch of the Department of Internal Affairs, establishing procedure on appeals and fixing salary of secretary of internal affairs as chairman of the commission. The third class city bill to provide for filling of vacancies in councils by election on the part of councilmen is also on third reading.

The second reading calendar contains the Jones bill to permit construction of State and State aid highways on the same plan; the Graff "pure liquor" bill; authorizing third class cities to appropriate money for band concerts; forbidding unauthorized use of containers for milk; the Daix optometry bill; the Sproul bill regarding municipal divisions receiving State insurance tax funds for firemen's associations to appropriate a like sum and the State police bill.

NEW MINIMUM AUTO LICENSES

Twelve Dollars Is Now Being Talked of Among Some of the Legislators

Suggestions for a new minimum automobile license of \$12; a State tax of one mill on the dollar value of real estate for road improvement and maintenance; increase of public utility taxation; removal of exemption of manufacturing capital from taxation and taxation of sleeping car companies are among those heard about the Capitol as means to afford increased revenue to meet demands for schools and road appropriations.

The Governor has expressed himself in favor of more money for schools and a higher appropriation for roads. "The propositions are being discussed in advance of the meetings of the joint committee on revenue, which was provided by a resolution introduced into the House by Speaker Baldwin and which will go to the United States district court, New York city, for on that day, an aroused and indignant jury, sitting before Justice Pope, found Ernest Stutz and Otto Stutz, doing business as rotten meat purveyors under the name of Louis Stutz & Sons, 509, 511, 513, 515 and 517 Broadway, Brooklyn, guilty of trafficking in ptomaine-producing meat products and also guilty, with the help of federal officials of stealing United States government inspection and passed labels for the ornamentation of their vicious commodities.

The cold-blooded, deliberate malice of these convicted poisoners, while providing a story which reads like the wildest romance, did not excite the sleeping officials to interfere with the other Brooklyn creatures who, on a vaster scale, were trafficking in disease and death.

Any man who would deliberately declare to any audience that conditions exist such as those which were revealed January 7, 1915, in the meat business would be laughed at.

I say this because I know the kind of public officials that are to be expected of any man who dares tell the truth in connection with this form of human degradation.

In August, 1913, I entered into an agreement with officials of the United States government to keep quiet about the Stutz case in order not to thwart the government's efforts to obtain additional evidence against others engaged in the same vicious business.

I did not violate my agreement with the federal officials and my long silence with regard to the case was broken until a federal grand jury, February 20, 1914, handed down an indictment against the men who were subsequently convicted January 7, 1915.

Although I kept faith with the federal officials they did not keep faith with me. I knew that L. Stutz & Sons, January 4, 1915, delivered to the Clyde Steamship Co., at New York city, fourteen tierces of shank-sour hams and three tierces of maggoty

FOODS THEY BUILD OR DESTROY

AMAZING BUT RARELY SUSPECTED TRUTHS ABOUT THE THINGS YOU EAT

Copyright, 1914, by Alfred W. McCann

January 7, 1915, a memorable day in the history of meat corruption, emphasized the fact that whereas public health officials are usually looked upon as mere officeholders, subject to the meaningless accidents of political fortune, they should be strong, upright, efficient, and zealous representatives of the most essential, most honorable, and most dignified department of public life.

During the year 1915 scarcely a day passed that did not disclose some new evidence of the devilish conditions under which diseased and tainted meats were foisted through underground channels upon an unsuspecting public.

Unbeholder cows continued to limp their way from the diseased dairies, out of which they had been ejected as unprofitable milkers, to the unsuspected slaughtering establishments of towns and cities.

Federal officials, State authorities and city health departments continued in their politically safe occupation of doing nothing.

January 7, 1915, a day of terror in West Washington market, New York city, was also a day of terror in the United States district court, New York city, for on that day, an aroused and indignant jury, sitting before Justice Pope, found Ernest Stutz and Otto Stutz, doing business as rotten meat purveyors under the name of Louis Stutz & Sons, 509, 511, 513, 515 and 517 Broadway, Brooklyn, guilty of trafficking in ptomaine-producing meat products and also guilty, with the help of federal officials of stealing United States government inspection and passed labels for the ornamentation of their vicious commodities.

The cold-blooded, deliberate malice of these convicted poisoners, while providing a story which reads like the wildest romance, did not excite the sleeping officials to interfere with the other Brooklyn creatures who, on a vaster scale, were trafficking in disease and death.

Any man who would deliberately declare to any audience that conditions exist such as those which were revealed January 7, 1915, in the meat business would be laughed at.

I say this because I know the kind of public officials that are to be expected of any man who dares tell the truth in connection with this form of human degradation.

In August, 1913, I entered into an agreement with officials of the United States government to keep quiet about the Stutz case in order not to thwart the government's efforts to obtain additional evidence against others engaged in the same vicious business.

BLOOD AS A NERVE TONIC

"If people would only attend to their blood, instead of worrying themselves ill," said an eminent nerve specialist, "we doctors should not see our consulting rooms crowded with nervous wrecks. More people suffer from worry than from anything else."

The sort of thing which the specialist spoke of is the nervous run-down condition caused by overwork and the many anxieties of today. Sufferers find themselves tired, morose, low-spirited, unable to keep their mind on anything. Any sudden noise hurts like a blow. They are full of groundless fears and cannot sleep at night.

Doctoring the nerves with poisonous medicines is a terrible mistake. The only real nerve tonic is a good supply of rich blood. Therefore the treatment for neurasthenia, nervousness, and run-down health is the new rich blood which Dr. Williams' Pink Pills is able to make. The revived appetite, increased spirits and new strength which come after a few days' use of the pills will delight every sufferer.

The free booklet, "Diseases of the Nervous System," will interest you. Write for it today to the Dr. Williams' Medicine Co., Schenectady, N. Y. Your own druggist sells Dr. Williams' Pink Pills. Price 50 cents per box.

500,000 BATHE INTERNALLY

The marvelous growth of Internal Bathing since the advent of "J. B. L. Cascade" is accounted for not only by the enthusiastic praise of its users to the physicians, but also by the physicians insisting that the bowels must be kept free from waste to insure perfect health and efficiency.

Mary L. Walker, M. L. D., Olean, N. Y., writes:

"I must tell you of a case of constipation which resulted in complete recovery when I used your Cascade treatment."

The physician in charge said the patient had been suffering from stomach and intestinal troubles. The patient, being sixty-two years old, he claimed no help could be given except the knife; but finding the intestines in a very bad state I advised the "J. B. L. Cascade," which resulted in complete recovery. When I took the case she was taking a laxative three times a day and had been for three weeks unable to get along without it. Now she never takes any laxative.

Call at Croll Keller, 405 Market street and George C. Poo's Drug Store at Harrisburg, and ask for a free booklet on this subject, called "Why Man of Today is Only 50 Per Cent. Efficient."

ORRINE FOR DRINKING MEN

We are in earnest when we ask you to give Orrine a trial. You are not going to risk and everything to gain, for your money will be returned if after a trial you fail to get results from Orrine. This offer gives the wives and mothers of those who drink excess an opportunity to try the Orrine treatment. It is a very simple treatment, can be given in the home secretly, without publicity or loss of time from business.

Orrine is prepared in two forms: No. 1 secret treatment; Orrine No. 2, the ordinary treatment. Costs only \$1.00 a box. Ask your druggist for Geo. A. Gorgas, 16 N. 3rd st., Jno. A. McCurdy, Steelton; H. F. Brumhouse, Mechanicsburg.

Ab-h-h-h-h-h-h-h-h-h-h! Catching Cold? Get a Bottle of Mentho-Laxene

Take as directed—right away. Checks and aborts colds and coughs in 24 hours. Guaranteed. No habit forming. Frees the throat in a pint of Cough Syrup. All druggists.

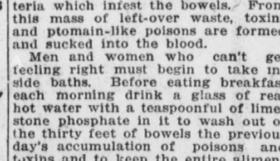

Not a Bite of Breakfast Until You Drink Water

Says a glass of hot water and phosphate prevents illness and keeps us fit.

LOOK AT CHILD'S TONGUE IF SICK, CROSS, FEVERISH

Hurry, Mother! Remove poisons from little stomach, liver, bowels.

Give "California Syrup of Figs" at once if bilious or constipated.

Just as coal, when it burns, leaves behind a certain amount of room-burnable material in the form of ashes, so the food and drink taken day after day leaves in the alimentary canal a certain amount of indigestible material which is not completely eliminated from the system each day, becomes food for the millions of bacteria which infest the bowels. From this mass of left-over waste, toxins and ptomaine poisons are formed and sucked into the blood.

Men and women who can't get feeling right must begin to take inside baths. Before eating breakfast each morning drink a glass of real hot water with a teaspoonful of limestone phosphate in it to wash out of the thirty feet of bowels the previous day's accumulation of poisons and toxins and to keep the entire alimentary canal clean, pure and fresh.

Those who are subject to sick headache, colds, biliousness, constipation, others who wake up with bad taste, foul breath, nervousness, rheumatic stiffness, or have a sour, gassy stomach after meals, are urged to get a quarter pound of limestone phosphate from the druggist, and begin practicing internal sanitation. It costs very little, but is sufficient to make anyone an enthusiast on the subject.

Remember inside bathing is more important than outside bathing, because and to keep the entire system free from impurities into the blood, causing poor health, while the bowel pores do. Just as soap and hot water cleanses, sweetens and freshens the skin, so limestone phosphate acts on the stomach, liver, kidneys and bowels.

GERARD TO MEET SWISS

Berne, Feb. 11, via Paris, Feb. 12.—Ambassador Gerard will receive President Schulthess and Herr Hoffman, chief of the Swiss foreign department tomorrow. The two Swiss officials will call at the home of Gerard in the Division of Industrial Hygiene and Engineering, of the Department of Labor and Industry, will preside at the conference.

"The Relation of the Physician to the Compensation Law and Its Proposed Amendments," will be discussed by Dr. William Estes, of South Bethlehem, chairman of the Committee of Workers' Compensation of the Medical Society of Pennsylvania, and Dr. Charles A. E. Codman, president, Medical Society of Pennsylvania.

"Compensation for Industrial Diseases," will be discussed by Dr. Frederick L. Hoffman, statistician, Prudential Life Insurance Company, of Newark, N. J., and Dr. Alfred Stengel, of the University of Pennsylvania.

Dr. Edward Martin, professor of Surgery of the University of Pennsylvania, and Dr. John B. Lowman, chief surgeon of Cambria Steel Company, Johnstown, will discuss "Treatment of Fractures of the Long Bones from the Viewpoint of Puncture."

MOST AMERICANS BALD AT 43?

Doleful Portrait of Physical Decrepitude of Average Citizen

New York, Feb. 12.—Life insurance officials, says the "World," are accused of dodging the question of the physical condition of Americans. It is their trade, and they are exceeding apt at it. But not often do they paint so doleful a portrait of physical decrepitude as is contained in E. Rittenhouse's diagnosis of the average citizen, or "per capita person."

This is typical American, it seems, is bald at 43 from trying to crowd the experiences of two lifetimes into one. Muscularly weak and stiff-jointed, because he never walks when he can ride; the health of his teeth and gums is impaired from eating too much soft food; his digestive organs are showing signs of rebellion, and "he is seriously overstraining his heart, arteries, kidneys, nerves and digestion."

A doddering and prematurely old young man, sans teeth, sans taste, sans everything at the very time of life when he should be in his prime. It is a pathetic picture. But where do the insurance men find the original? It is to be feared that their typical American, their per capita person, is an insurance type only—an actual and not an actual man.

There are, of course, men of whom this is a correct diagnosis. They exist in New York and other large cities, and they are paying the penalty of a life of indifference, a life of equal excess in the pursuit of money and of pleasure. Even they are finding in golf and in motoring a partial antidote for the processes of decay. But how negligible is their number by comparison with the tens of millions of workers in industry and agriculture, the vast armies of toilers who make up the population of the United States, and who more truly deserve to be considered average Americans. They, at least, are manifesting no such marked decrepitude.

There is a general impression, indeed, that their relatively good health and length of life is what enables the insurance companies to show such marked prosperity.

But an insurance company, which did not hold the mirror up to physical decay would be untrue to its tradition. Yet it is hardly necessary to set up a bogey man of disease and decrepitude a "type" of American citizen.

BATTLE LESSONS FOR STATE PEOPLE

Doctors Will Discuss What Has Been Found on Battlefield Here on Friday

Advanced surgical methods, developed on the battlefields of Europe since, the outbreak of the war, and their application to wounds received by workers in Pennsylvania's industrial plants, will be outlined at the fourth convention of Industrial Physicians to be held at Harrisburg by the Department of Labor and Industry, Friday, February 16.

Commissioner John Price Jackson announced to-day that Dr. William O'Neil Sherman, Chief Surgeon of the Carnegie Steel Company, and Dr. J. S. Lawrence of Johns Hopkins University, who have just returned from Europe, will discuss the Carrel-Dakin treatment of infected wounds in addresses at the morning session of the conference under the title, "The Dawn of a New Surgical Era."

Major Robert U. Patterson of the Medical Corps of the United States Army with Dr. Joseph C. Bloodgood, of Johns Hopkins, will discuss "National Standards For First Aid."

Dr. Francis D. Patterson, Chief of the Division of Industrial Hygiene and Engineering, of the Department of Labor and Industry, will preside at the conference.

"The Relation of the Physician to the Compensation Law and Its Proposed Amendments," will be discussed by Dr. William Estes, of South Bethlehem, chairman of the Committee of Workers' Compensation of the Medical Society of Pennsylvania, and Dr. Charles A. E. Codman, president, Medical Society of Pennsylvania.

"Compensation for Industrial Diseases," will be discussed by Dr. Frederick L. Hoffman, statistician, Prudential Life Insurance Company, of Newark, N. J., and Dr. Alfred Stengel, of the University of Pennsylvania.

Dr. Edward Martin, professor of Surgery of the University of Pennsylvania, and Dr. John B. Lowman, chief surgeon of Cambria Steel Company, Johnstown, will discuss "Treatment of Fractures of the Long Bones from the Viewpoint of Puncture."

Cat Frightens Recruit; He Is Rejected by U. S.

New York, Feb. 12.—The presence of a pet cat in the Twenty-third street recruiting station of the United States marine corps caused William James, an accepted recruit from Fremont, O., to rush into the street screaming with terror just as he was about to take the oath that would make him a "soldier of the sea."

"I knod I'm a fraidly cat," James told Surgeon Weston, of the marine corps, after he had recovered from the attack of his strange malady, "but I simply can't be in the room where there is a cat. I don't have to see the cat, either. I can feel its presence, and it nearly drives me crazy."

James' case is recognized in medical science as neurophobia. He was rejected.

Pay Envelopes Inked; No More "Hold-Out" on Wives

Pittsburgh, Feb. 10.—The paymaster of the Carnegie Steel Company, on complaint of hundreds of Homestead wives, have taken the joy out of life for many of the company's employes by inked envelopes in which their pay envelopes, the amount contained therein, instead of using a lead pencil as heretofore.

The wives of many employes asserted that their husbands were "holding out on them." Only one way to prevent this appeared open to the Carnegie paymaster — to use ink instead of the easily erased pencil marks.

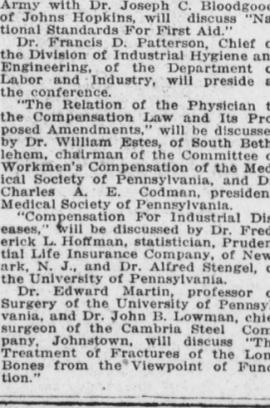

FORESTRY NEEDS FUND TO EXPAND

Budget of Department Will Show What Is Required to Make Service Better

An appropriation of \$600,000, which it is estimated will enable the State Forestry Commission to add 225,000 acres to the State Forestry reserves, will be asked of the Legislature and attention called to the fact that preparations must be made now for the systematic reforestation and food prevention work recommended in the last year by conservationists who have been studying Pennsylvania. The departmental budget will be laid before the Legislature very soon and will call for a total of about \$1,400,000, the largest item being for expansion of the reserves, which are coming to be more and more used for game, recreation and study purposes and which are now yielding a steady income to the State permanent school fund.

Two years ago only \$40,000 was allowed for purchase of additional land and the State had to "pass up" some bargains and also lose the chance to buy lands which would have enabled consolidation of reserves, facilitated reforestation and also enabled work to be done toward improving conditions on headquarters of a number of streams. Several reserves have interior tracts which do not belong to the State and in other localities the State

SCHOOL DAYS

By DWIG

THE MAGIC FLUID

Few drops and corns or calluses loosen and lift off with fingers. No pain!

The world owes thanks to the genius in Cincinnati who discovered freezeone, the new ether drug.

"The Magic Fluid" can now be had at any drug store for a few cents. You simply apply a few drops of this freezeone upon a tender, aching corn or a hardened callus. Instantly the soreness disappears and shortly you will find the corn or callus so loose and shriveled that you lift it off with the fingers. Not a bit of pain or soreness is felt when applying freezeone or afterwards. It doesn't even irritate the skin or flesh.

For a few cents one can now get rid of every hard corn, soft corn, or corn between the toes, as well as painful calluses on bottom of feet. Everyone who tries freezeone becomes an enthusiast because it really doesn't hurt or pain. The genuine Freezeone has a yellow label. Look for yellow label.
