Suppose You Couldn't Get Ice? THINK of the great inconvenience and great expense should it be impossible to obtain ice. Nearly every meal would have to be arranged for and purchased separately. Perishable food products could not be kept overnight.

Railroad shipments of meats and milk would be impossible. It would be necessary to drive cows through city streets and use the milk immediately—can you estimate the increased cost of milk obtained by such primitive methods? Packing houses could not be located at advantageous points. Beef would have to be killed locally and used within a minimum time. How much more would this cost you—and meats are already high in price?

Think of the hundreds of commodities you would have to do without; no oranges, fancy fruits and vegetables, etc., etc. Ice is not an expense but your greatest help to reduce high cost of living. Quit thinking of ice as a "necessity," a "luxury" or a "hot weather tax." Think of it as the best friend that comes into your homes these hot days; the friend that keeps your food nutritious, that is always ready to help you reduce the cost of living and makes life easier for you.
