

Letters From the Front

EXPECTS TO BE IN THE AIR FIGHTING THE BOCHE WITHIN NEXT SIX WEEKS

Walter J. Shaffer in additional letters from a flying camp in France to his parents, Mr. and Mrs. Charles E. Shaffer, says that he expects to be battling the Boche from the air within the next six weeks.

Young Shaffer after completing a course in aviation at Esington joined the Lafayette corps. He is now learning the thrilling spiral nose dives, and other feats used in outwitting the German flyers. He tells briefly, the censor will not allow more of monster new airplanes that are armed with young cannon. Two letters from him follow:

Sunday, Aug. 26, 1917.
Tours, France.

Dear Mother—
I have hung my hat up again and hope to let it here for at least six weeks, when I am supposed to have my wings. So the Captain told me unless they give us a different monitor or split up the class. This monitor is very conservative and won't allow us to take any risks. Of course, I may be impatient, for I have only had two rides, but what always did make me mad about the double command aeroplanes. The movements are so small and delicate that the movement of two figures will serve to place the machine in any position. In fact, this type machine will fly itself as the monitor thoroughly demonstrated, running along level with hands and feet off the controls. He did the same thing when we came down to land, only touching the stick when wanting to land. Listening to his (the monitor's) English is actually painful, but one can understand him if one listens closely. It's full of American regulars here, most sailors and soldiers, and some are being trained for sea-plane patrol work. The army men, of course, for work at the front. There are also a few French men here, but very few are gradually shipping them out as the Americans come in.

Landings Rough
No, we have not been taken over by the Americans and are still stuck in our own quarters. The food is very good and plentiful here, and the air is very pure. The weather is just what we need. We have had a few rain storms, but they are not so bad as they are made out to be. The army men, of course, for work at the front. There are also a few French men here, but very few are gradually shipping them out as the Americans come in.

Planes Carry Cannon
However, I saw some new type machines, one being so large that a ladder was required to get into the seat, it was armed with several propeller would blow a man over. The name of this machine is not known to me, but it is very interesting. We received absolutely new clothing here with a thick wool sweater and heavy gloves, and its surprising how heavy clothing is made here. It is very interesting to see the middle of August and swimming weather. Swimming places there are, for I saw a number where I was aloft, but being strapped in couldn't very well drop in.

Not Letters From Home
It seems to me its about time I got a few answers to these letters. I sent you my address a month ago. Did you receive them? We can get permission to Tours every day if we wish, but sleep is so important and money so scarce in my case that I have not availed myself of the privilege. Besides it is not a whole lot of fun going alone, and if you go with a party, the only thing they go for is a drink and what goes with it.

Lectures and Flying
Monday, Aug. 27, 1917.
Tours, France
12 Noon

Dear Mother—
Am tired of studying French irregular verbs and trying to remember what I heard of lectures, so I turn to you to write about it. Am glad I was sent here, as there is no comparison between the Avord camp and this one. Every day that we cannot fly, lectures are given us, which are very instructive. These lectures were started for the American troops, who will be required to pass a stiff mental examination on aeroplanes, why they fly, their design, in fact the why and wherefore of everything pertaining thereto. We Foreign Legion boys, being Americans too, are receiving the same course, since the lecturer said that in case we were taken over by the American Government we would be able to pass the exams. None of these lectures were given at Avord. As one man aptly put it, they merely turn out sky-chauffeurs there and nothing else. We are being prepared for more than that, as these lectures were required to get into the American Corps. I have attended three of these lectures and learned considerably at 9 o'clock in the morning. The airplanes are all lined up on the field every morning, you know, and they present a very pretty sight thus arranged.

Planes Carry Cannon
However, I saw some new type machines, one being so large that a ladder was required to get into the seat, it was armed with several propeller would blow a man over. The name of this machine is not known to me, but it is very interesting. no other part of the house in sight except the barn, which was merely a large hole filled with hay further up the cliff. Sometimes we would pass whole villages built this way, with ladders leading up to the different levels, which reminded one of pictures of Pueblo and Navajo villages in America. You know we have double mattress affairs with two clean sheets and two blankets. They are very warm and comfortable, but if it keeps on getting colder I fear we shall have snow. Another night like last night and I'll need more blankets. However, I always have my bathrobe and "polly" overcoat to use in a pinch. Fortunately, I have hung onto that bathrobe and never thought, when you bought it that it would travel so much, did you?
Darn the music! They're playing Hawaii stuff now and my feet are getting itchy for a dance floor—and a girl.
Chased me out this morning at 4 to help line up the machines outside the hangars. To hear some of my comrades whining about the job, one would think it was hard work, but I was taking different by the very easy indeed, just hard enough to warm me up, which was a good thing as the morning was very cold. Ten of us must help do this work every morning. The airplanes are all lined up on the field every morning, you know, and they present a very pretty sight thus arranged.
WALTER.

We have been having bad weather consistently for two days now. When it rains we get some rain. Right now it's blowing a gale and will no doubt prevent flying instruction to-night. The airplanes are all lined up on the field every morning, you know, and they present a very pretty sight thus arranged.
WALTER.

Mrs. Biddle's \$3,000 Ring Is Recovered by Diver
Beaumont Point, Me. — Mrs. Alexander Biddle, of Philadelphia, stood on the wharf here recently waiting for the boat to take her to Rockland. A diamond ring, valued at \$3,000, slipped from her finger and dropped into the water, twenty-four feet deep at that point.
Mrs. Biddle appealed to Bob Chase, an expert diver who came from Portland at her request.
Chase let himself down into the water, groped around in the slimy mud four fathoms down and in just four minutes reappeared on the surface with the gem.
Mrs. Biddle was returning from her cottage here to her home in Philadelphia.

NASTY MEDICINES BAD FOR CHILDREN
It is not often a child requires medicine of any kind. If the bowels are regular and promptly disposed of, undigested matter discarded by the stomach, the general health is very apt to be excellent. In any case, pills, powders, and nauseating or unpalatable compounds, should never be given to children. Any therapeutic virtue such remedies may possess is largely nullified by the "artificial" natural antagonism.
For most children a mild laxative, administered occasionally, is all that is needed to assure normal regularity and good health. Dr. Caldwell's Syrup Pepsin is a pleasant-tasting combination of simple laxative herbs with pepsin, free from opiate or narcotic drugs, and acts gently yet effectively; children like it and take it readily, so that it is the ideal remedy for the family medicine chest. It is sold in drug stores for fifty cents a bottle. A trial bottle, free of charge, can be obtained by writing to Dr. W. B. Caldwell, 456 Washington St., Monticello, Illinois.

Do Not Purchase Water-Logged Poultry
Washington, D. C. — "When you buy poultry which is packed in ice, you probably are paying poultry prices for from 3 to 14 per cent. of water soaked up by the bird," according to a statement issued by the United States Department of Agriculture. "This means paying from 25 to 50 cents a pound for from 3 to 14 pounds of water in every hundred pounds of chicken purchased."
"Moreover, a broiler allowed to stand in water or ice will lose about one-third per cent. of its edible substance while roasting chickens and fowls lose as much as 1 per cent.," the statement continues. "Along with the edible materials, water dissolves and washes out from the bird substances on which the fine flavor of the flesh largely depends."
"The purchaser who wishes to avoid waterlogged chickens and to make sure that the money is paid for poultry and not poultry plus added water, will do well to insist on buying dry packed and dry chilled birds. It is always advisable to see the package in which the butcher receives the chickens. High-grade dry-packed, dry-picked birds are commonly sent to market in boxes not in barrels. Twelve birds are packed in a box which is neatly lined with white parchment paper. Each individual head is wrapped in paper. The feet of the birds are clean and the entrails are always in place. Wet packed chickens are shipped to market in barrels holding 200 pounds or more. The birds in the bottom of the barrel soak in water that is filthy with dirt washed down from the feet and heads by the melting ice."
"Many persons who have found a bird dry and without flavor attributed to this lack of quality to cold storage, whereas the probability is that wet packing is responsible for the fact that most of the appetizing flavor has disappeared. Usually cold stored poultry which is thawed in the dry, cold air of the ice box is much superior to the water-logged so-called 'Fresh Chicken.'"
PLANTATION MEN WANT HIGHER PAY
Honolulu, Hawaii.—A meeting of the leading Japanese of Honolulu voted recently against assisting plantation laborers in any attempt to go on a strike, should their demands for higher wages be refused by the sugar planters. Preparations are now being made by the laborers for a conference with the planters. A special committee of Japanese is to be appointed and the proper requests for higher wages will be thoroughly discussed before they are presented to the planters. It is planned to organize a society, to be known as the "Association of the Higher Wage Question," and its object will be to see that laborers receive adequate wages.
The association will not be a strictly Japanese one, but will be open to all classes of laborers, regardless of nationality.

Explosion Pencil Tears Fingers Off School Pupil
Green Bay, Wis.—For the second time this summer a child here has been maimed by an exploding pencil. Saturday Charles Johnson, aged 11, found a metal pencil while on his way home from the Norwood school. He picked it up and when he went to examine it two pellets came out of the inside, one of them exploding in his hand. Three fingers on his right hand were torn off.
The first accident of the kind occurred on July 23, when Ludvina Rosloski found a similar pencil, which exploded in her hand, causing the loss of two fingers. Police spent several weeks investigating, but to no purpose, and the story was not given much credence. The second occurrence compels the citizens to take the affair more seriously, and a strict surveillance of all doubtful characters is being kept.

Here Is What Your Neighbors Say

This Big Garage Successfully Heated By a Pipeless Caloric Furnace

A Wonderful Furnace!
Heats Through One Register

PIPELESS CALORIC FURNACE
The Original Patented Pipeless Furnace

It is constantly pouring out revitalized warm air. It's as natural as nature itself and very economical of fuel. The Caloric is positively guaranteed to reduce your fuel bill by a third at least, and the double ribbed firepot (500 square inches more radiating surface than other firepots) for five years' solid service.

Imperial Hardware Co., James R. Ryan, Prop., 1202 N. Third St.
Distributors For Harrisburg and Vicinity

MR. JAMES R. RYAN, Imperial Hardware Co., 1202 N. Third Street, Harrisburg, Pa.
Dear Sir:—
In regard to the Caloric Pipeless Furnace, I was told what they would do, but I thought it would be impossible to do all they claim for it. In view of the unusual guarantee given I consented to take a chance on one. I found it very successful and up to this time I have five Calorics now in use, and can truthfully say they are an excellent heating and fuel saving furnace. I can throw any old junk screenings.
I had two Caloric furnaces in my garage last winter and there was so much heat in the garage, for without forcing the furnaces at all I could get a temperature of 70 degrees in the coldest weather. The garage of which I have enclosed you a picture is 135x100 feet and couldn't get another you could not buy my furnaces, because I can't earn their price in the fuel saved and the comfort obtained. Anytime you want anyone to see them just send them around to Hoffman's garage. I'll be glad to tell them what I know.
Yours Very Sincerely,
B. F. HOFFMAN
