Rails and Shippings Leads Advance at Gains Extending From Substantial Fractions to 1/2 Points; Reactions Occur

By Associated Press New York, Nov. 10.—Wall Street. The usual week end covering movement contributed to the higher prices at the opening of to-day's stock market. Rails and shippings led the advance at gains extending from substantial fractions to 1/2 points. Coppers and the war group trailed along more moderately and utilities also improved notably.

There are 157 Intermediate societies in the state, with a membership of 4,991. Forty-eight societies were organized since the state convention held in Harrisburg, July, 1916. C. E. NOTES Dr. Grose, vice-president of the United Society of Christian Endeavor, who has charge of promoting the Government plans for food economy, asks the people to have seven wheatless meals, fourteen meatless meals, and twenty-one wasteless meals every week. Some person from Boston says: "I have tried to reduce my food from personal experience. With delicious Johnny-cake, Boston brown bread, brown muffins, oat-cakes, and the various confections made from coarser grains, which would not from choice rather than necessity have at least seven wheatless meals a week? Make it four, five, six, seven, and you will not think you are asking too much." Pine street Presbyterian society promises to hold an interesting meeting to-morrow evening. Miss Ruth Tack will conduct the service. Endeavorers will study the topic, "Seeking Worth-While Things" in the C. E. prayer services tomorrow evening. City Leading in Building Work Harrisburg is One of the First Twenty-five Cities in Gains Made For November Harrisburg was one of the twenty-five leading cities in the country to show a gain in building construction work started in October as compared with the work done last year. According to figures compiled by the American Contractor from 109 cities in the United States, building work which will cost \$56,251,179 when completed was started last month. In these cities 20,435 permits were issued for the work. Last year 23,507 permits were issued for work when completed was started last month. While the percentage increase in Harrisburg is not the largest extent, it is interesting to note that a big part of building work started last month was on houses. Many causes are contributing to the considerable shrinkage in building construction, the American Contractor states, "one is the practical impossibility of preparing structural shapes for the larger type of buildings, the Government rightfully taking priority. There are steadily widening areas throughout the country where buildings are becoming irksomely scarce, not only for the housing of workmen in factory districts but for many purposes, and this scarcity is beginning to quite noticeably increase the cost of living through increased rentals. Public policy would seem to dictate the largest extent of construction w' possible, consistent with the Government necessities."
